Computational Mechanics Publications

# Contents

## Preface

### Chapter 1

Materials engineering of cement-based composites using lattice type models 1

*J.G.M. van Mier, A. Vervuurt & M.R.A. van Vliet*

### Chapter 2

Computational damage mechanics 33

*R. de Borst, M.G.D. Geers & R.H.J. Peerlings*

### Chapter 3

Continuum damage applied to concrete modelling 71

*G. Pijaudier-Cabot, S. Fichant, N. Burlion*

### Chapter 4

Integral equation method for modeling cracking concrete 103

*J. Planas, G.V. Guinea & M. Elices*

### Chapter 5

A discrete crack numerical model 133

*J. Alfaiate & E.B. Pires*

### Chapter 6

Boundary element method for analysis of cracking in plain and reinforced concrete 163

*M.H. Aliabadi & A.L. Saleh*

### Chapter 7

Creep crack growth in concrete structures: cohesive crack model in mode I and mixed-mode loading conditions 193

*A. Carpinteri, S. Valente, F.P. Zhou, G. Ferrara & G. Melchiorri*
