

National Climate Policies and the Kyoto Protocol

VB TU Darmstadt

51668480

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

Table of Contents

Executive Summary	7
1. Introduction	11
Aim and approach	12
2. The Policy Challenge	15
Climate change and sustainable development	15
International developments	17
Costs of responding to climate change	19
3. Trends: Emissions and Policies	23
Emission trends: OECD 1990-1996	23
OECD and global trends: CO ₂ and energy	30
Policy trends	33
4. Framework for Mitigation Policy	45
Getting the prices right	45
Putting markets to work: domestic tradable permits for greenhouse gas reduction	53
Other policies in the mix	55
Monitoring and assessing performance	62
Institutions for change	63
Fostering international co-operation	65
5. Conclusions	69
Framework for mitigation policy	70
Moving forward	72
Notes	75
References	79

List of Boxes

Climate Change Requires Integrated Policy Responses.	8
1. Key Features of the Kyoto Protocol	16
2. Global Population, Economic, Energy and CO ₂ Trends, 1971-1995	29

3.	A Baseline Scenario through 2010.	34
4.	Multiple policy objectives and early climate change strategies in OECD countries.	36
5.	Renewable Energy Policies.	40
6.	Electricity, regulatory reform and the environment.	50
7.	Carbon taxes in Nordic countries.	51
8.	Examples of environmental technology diffusion schemes.	61
9.	Education and the link to sustainable development.	62
10.	Rapid evolution of climate policies in the United Kingdom.	64
11.	Carbon Charges on Aviation Fuels.	66

List of Tables

1.	UNFCCC Conferences of the Parties : A Chronology.	12
2.	Annex I countries and their commitments.	17
3.	EU Burden-Sharing Agreement.	18
4.	Overview of national emission trends, Kyoto objectives and EU Burden-Sharing.	24
5.	1995/6 Removals from Land-Use Change and Forestry (LUCF).	28
6.	Policy-relevant features of emission sectors and main policy developments by sector.	37
7.	Changes in support levels in OECD countries.	46

List of Figures

1.	1996 OECD greenhouse gas emissions by sector.	25
2.	1996 OECD greenhouse gas emissions by gas.	26
3.	OECD CO ₂ and N ₂ O emissions from transport.	27
4.	Contributors to global CO ₂ emission changes, 1971-1995.	29
5.	World CO ₂ emissions from fossil fuel combustion by region.	31
6.	Trends in energy intensity of GDP by world regions, 1971-1995.	32
7.	CO ₂ emissions from fossil fuel use in OECD Member countries.	33
8.	Decomposition of carbon emissions by region.	35
9.	Growth and decomposition of carbon emissions by source.	35
10.	Shares in total revenues from environmental taxes.	52
