Contents

1 Introduction 1

2 Symmetry and Point Groups 7
- 2.1 Symmetry Operations and Elements . . . 7
- 2.2 Conjugacy Classes in Point Groups . . . 10
- 2.3 Subgroups of Point Groups . . . 10
- 2.4 Conjugate and Normal Subgroups of Point Groups . . . 12
- 2.5 Non-Redundant Set of Subgroups for a Point Group . . . 13

3 Permutation Groups 17
- 3.1 Permutations and Cycles . . . 17
- 3.2 Permutation Groups . . . 19
- 3.3 Transitivity and Orbits . . . 20
- 3.4 Symmetric Groups . . . 21
- 3.5 Parity . . . 24
- 3.6 Alternating Groups . . . 25

4 Axioms and Theorems of Group Theory 29
- 4.1 Axioms and Multiplication Tables . . . 29
- 4.2 Subgroups . . . 31
- 4.3 Cosets . . . 32
- 4.4 Equivalence Relations . . . 35
- 4.5 Conjugacy Classes . . . 37
- 4.6 Conjugate and Normal Subgroups . . . 38
- 4.7 Subgroup Lattices . . . 40
- 4.8 Cyclic Groups . . . 40

5 Coset Representations and Orbits 45
- 5.1 Coset Representations . . . 45
- 5.2 Transitive Permutation Representations . . . 48
- 5.3 Mark Tables . . . 53
- 5.4 Permutation Representations and Orbits . . . 56

6 Systematic Classification of Molecular Symmetries 63
- 6.1 Assignment of Coset Representations to Orbits . . . 63
- 6.2 SCR Notation . . . 66

7 Local Symmetries and Forbidden Coset Representations 75
- 7.1 Blocks and Local Symmetries . . . 76
- 7.2 Forbidden Coset Representations. . . . 84

8 Chirality Fittingness of an Orbit 89
8.1 Ligands . . . 89
8.2 Behavior of Cosets on the Action of a CR . . . 90
8.3 Chirality Fittingness of an Orbit . . . 94

9 Subduction of Coset Representations 101
9.1 Subduction of Coset Representations . . . 101
9.2 Subduced Mark Table . . . 103
9.3 Chemical Meaning of Subduction . . . 106
9.4 Unit Subduced Cycle Indices . . . 109
9.5 Unit Subduced Cycle Indices with Chirality Fittingness . . . 111
9.6 Desymmetrization Lattice . . . 112

10 Prochirality 117
10.1 Desymmetrization of Enantiospheric Orbits . . . 117
10.2 Prochirality . . . 121
10.3 Further Desymmetrization of Enantiospheric Orbits . . . 122
10.4 Chiral *syntheses* . . . 127

11 Desymmetrization of Para-Achiral Compounds 135
11.1 Chiral Subduction of Homospheric Orbits . . . 135
11.2 Desymmetrization of Homospheric Orbits . . . 137
11.3 Chemoselective and Stereoselective Processes . . . 140

12 Topicity and Stereogenicity 147
12.1 Topicity Based On Chirality Fittingness of an Orbit . . . 147
12.2 Stereogenicity . . . 151

13 Counting Orbits 163
13.1 The Cauchy-Frobenius Lemma . . . 163
13.2 Configurations . . . 167
13.3 The Pólya-Redfield Theorem . . . 171

14 Obligatory Minimum Valencies 181
14.1 Isomer Enumeration under the OMV Restriction . . . 182
14.2 Unit Cycle Indices . . . 189

15 Compounds with Achiral Ligands Only 197
15.1 Compounds with Given Symmetries . . . 197
15.2 Compounds with Given Symmetries and Weight . . . 205

16 New Cycle Index 215
16.1 New Cycle Indices Based On USCIs . . . 215
16.2 Correlation of New Cycle Indices to Pólya's Theorem . . . 217
16.3 Partial Cycle Indices . . . 223

17 Cage-Shaped Molecules with High Symmetries 227
17.1 Edge Strategy . . . 228
17.2 Tricyclodecanes with T_d and Its Subsymmetries . . . 229
17.3 Use of Another Ligand-Inventory . . . 236
17.4 New Type of Cycle Index . . . 236

18 Elementary Superposition 241
18.1 The USCI Approach . . . 241
18.2 Elementary Superposition . . . 245
18.3 Superposition for Other Indices . . . 251

19 Compounds with Achiral and Chiral Ligands 255
19.1 Compounds with Given Symmetries . . . 255
19.2 Compounds with Given Symmetries and Weights . . . 262
19.3 Compounds with Given Weights . . . 265
19.4 Special Cases . . . 266
19.5 Other Indices . . . 268

20 Compounds with Rotatable Ligands 271
20.1 Rigid Skeleton and Rotatable Ligands . . . 271
20.2 Enumeration of Rotatable Ligands . . . 273
20.3 Enumeration of Non-Rigid Isomers . . . 276
20.4 Total Numbers . . . 283
20.5 Typical Procedure for Enumeration . . . 286

21 Promolecules 297
21.1 Molecular Models . . . 297
21.2 Proligands and Promolecules . . . 298
21.3 Enumeration of Promolecules . . . 300
21.4 Molecules Based on Promolecules . . . 307
21.5 Prochiralities of Promolecules and Molecules . . . 313
21.6 Concluding Remarks . . . 317

22 Appendix A. Mark Tables 321
A.1 $\mathbf{T}_d$ Point Group and Its Subgroups . . . 321
A.2 $\mathbf{D}_{3h}$ Point Group and Its Subgroups . . . 325

23 Appendix B. Inverses of Mark Tables 327
B.1 $\mathbf{T}_d$ Point Group and Its Subgroups . . . 327
B.2 $\mathbf{D}_{3h}$ Point Group and Its Subgroups . . . 332

24 Appendix C. Subduction Tables 335
C.1 $\mathbf{T}_d$ Point Group and Its Subgroups . . . 335
C.2 $\mathbf{D}_{3h}$ Point Group and Its Subgroups . . . 341

25 Appendix D. Tables of USCIs 343
D.1 $\mathbf{T}_d$ Point Group and Its Subgroups . . . 343
D.2 $\mathbf{D}_{3h}$ Point Group and Its Subgroups . . . 349

26 Appendix E. Tables of USCI-CFs 351
E.1 $\mathbf{T}_d$ Point Group and Its Subgroups . . . 351
E.2 $\mathbf{D}_{3h}$ Point Group and Its Subgroups . . . 357

27 Index 359
