Contents

	Preface		
1	A historical review		1
	1.1	The prosperity question	1
	1.2	Modern business cycles	5
	1.3	Macroeconomics and capital theory	8
2	Dynamic optimization		10
	2.1	Static versus dynamic optimization	10
	2.2	On the existence of a solution to (D)	13
	2.3	Sufficient conditions	15
	2.4	Transversality conditions	17
	2.5	A simple growth model	18
	2.6	Problems with infinite horizons	22
,	. 2.7	Problems of intertemporal planning	26
	2.8	A practical solution to the intertemporal	
		planning problem	30
	Ques	tions	32
3	Hicks	sian temporary equilibrium and	
	comp	arative dynamics	34
	3.1	The concept of temporary equilibrium	34
	3.2	Hicksian temporary equilibrium	35
	3.3	Comparative dynamics	38
	3.4	An example	41
	3.5	Infinite programs and comparative dynamics	48
	3.6	Long-run versus short-run effects	50
	Appendix		51
	Ques	tions	55
4	Rational-expectations models		56
	4.1	The role of expectations in dynamic models	56
	4.2	Brock's equilibrium forecasting	57
	4.3	Rational expectations illustrated	61

v

vi **Contents**

	4.4	Rational expectations and Pareto optimality	64	
	4.5	Rational expectations in macroeconomics	66	
	4.6	Rational expectations under uncertainty	70	
	4.7	Applications of the rational-expectations		
		hypothesis	76	
	Ques	tions	78	
5	Equilibrium theories of Keynesian unemployment		81	
	5.1	The problem	81	
	5.2	The dual-decision hypothesis	83	
	5.3	An evaluation of the dual-decision hypothesis	87	
	5.4	Was Keynes a Keynesian?	91	
	Appendix		92	
	Questions		93	
6	Savings and investment in Keynesian temporary			
	equili	brium	94	
	6.1	The investment function	94	
	6.2	The marginal efficiency of capital	94	
	6.3	A simple model of investment decisions	96	
	6.4	Some Keynesian modifications of the		
		investment theory	99	
	6.5	Keynes's theory of interest rates	100	
	6.6	Tobin's asset-market model	102	
	6.7	Interactions between the goods market		
		and asset markets	106	
	Ques	tions	108	
.7	Markets for stocks in Keynesian temporary			
	equilibrium		110	
	7.1	The problem /	110	
	7.2	The role of stock's: a simple model of a firm	118	
	7.3	The temporary-equilibrium model	127	
	7.4	From temporary equilibrium to short-run	190	
		equilibrium	132	
	7.5	Some concluding remarks	137	
	Questions		138	
8	Capital markets and money		141	
	8.1	Capital markets in macroeconomics	141	
	8.2	The MV theory: personal equilibrium	142	

•

	Contents		vii
	8.3	The MV theory: market equilibrium	146
	8.4	The cost of capital and the optimal	
		capital structure of the firm	148
	8.5	Theories of demand for money	154
	8.6	Money in macroeconomics	157
	Quest	ions	162
9	Stabil	ization policies	164
	9.1	Phillips's three stabilization policies	164
	9.2	Optimal-stabilization policies: deterministic	1.00
		case	168
	9.3	Optimal-stabilization policies: stochastic case	171
	9.4	Stabilization policies: an assessment	173
	Quest	tions	174
10	Infla	tion	175
	10.1	Inflation and welfare	175
	10.2	Friedman's concept of monetary optimum	175
	10.3	A reexamination in a general-equilibrium	
		framework	177
	10.4	Allocation of inflationary shocks	181
	10.5	Wage indexation	181
	10.6	Is there really a trade-off between inflation	
		and employment?	184
	10.7	Inflation in open economies	185
	10.8	Toward a behavioral theory of inflation	187
	Ques	tions	189
11	T 1.		101
11	1 ne	A manufacture of social security	191
	11.1	An overlew	191
	11.2	I he economics of social security	194
	11.5	social sociality problems	909
	0	social security problems	202
	Ques	110115	205
12	Mucl	n ado about nothing?	207
	12.1	The capital-theory controversy	207
·	12.2	Monetarists versus Keynesians	216
	12.3	Some observations	225
	Questions		226
