HYDROSOFT 86 – HYDRAULIC ENGINEERING SOFTWARE

Proceedings of the 2nd International Conference, Southampton, U.K. September 1986

Editors: M. Radojkovic C. Maksimovic C.A. Brebbia

> Bibliothek des Fachgebietes Hydraulik und Hydrologie

Technische Hechschule Darmstadt D-8100 Darmstadt/Petersenstraße

Inv. Nr. 2240

4.3,87

A Computational Mechanics Publication

Springer-Verlag Berlin Heidelberg New York Tokyo

CONTENTS

PREFACE		
SECTION 1	SOFTWARE FOR HYDRAULICS	Page
New Applicati C.A. Brebbia	ons of Boundary Element Software in Hydraulics	3
Contributions Models M.B. Abbott	of Expert Systems to the Quality Assurance of Numerical	15
	rs for Wave Problems Prtiz and J.M. Santamaria	19
SECTION 2	OPEN CHANNEL FLOW, FLOOD PLAINS AND ROUTING	
NUFLOW – and Pipelines B.R. Poole	A Program to Analyse Non-Uniform Flows in Channels	33
Complex Hyd: C. Popovska	rosystems and Engineering Software	41
	lows with Large Displacements by Finite Elements <i>Hittinger and P. Ravier</i>	51
Variable Time E.M. Laurensor	-Step Nonlinear Flood Routing	61
Channel Flow	f Hydraulic and Hydrologic Routing Methods for a II, J.D. DeVries and A.J. Nestlinger	73
Channel Rout	of Hydraulic Routing Methods for One-Dimensional ing Problems 11, A.J. Nestlinger and J.D. DeVries	85
SECTION 3	TIDAL FLOW AND CIRCULATION PROBLEMS	
The Control as G.A. Walters	nd Monitoring of a Tidal Model of the Exe Estuary	101
	nulation of Fine Sediment Motion in Estuaries E.M. Partheniades	111
Mathematical Simulation of Two-Dimensional Lake Circulation R. Rajar, M. Cetina		
Predictive Abi A. Langerak, J.	lity of Two-Dimensional Models for Mixing in Estuaries J. Leendertse	135

÷.

Sea State Synthesis Using a Microcomputer C.D. <i>Christian</i>		
Culculation of Flow Around Several Ship Hulls by a Rankine Source Method G. Delhommeau, J.J. Maisonneuve		
Depth-Average Model with Body Fitted Co-ordinates for the Calculation of Strongly Curved Elliptic Flows M. Djurić, R. Kapor and R.N. Pavlović		
Mathematical Modelling of Alluvial River-Bed Phenomena E. Mohamed-Abdalla, J.P. Chollet and M. Bouvard		
Large Eddy Simulation of a Shear Driven Flow in a Test Reservoir M. Ivetic, Y. Iwasa and K. Inoue		
SECTION 4 HYDRAULIC STRUCTURES		
Engineering Software for Frequency Analysis of Flow-Induced Vibrations in Hydraulic Systems A. Bergant		
The Use of Microcomputers for the Hydraulic Design of Highway Culverts in Scotland <i>C. Jefferies, R.M. Ashley and N.D. Butter</i>		
Vectorized Finite Element Model for Time-History Analysis of Old Masonry Dams A. Peters, W. Pelka and M. Vogt		
SECTION 5 COMPUTER AIDED EXPERIMENTING AND CONTROL		
High Resolution Time-Space Investigations of Rainfall Events Through Timevariable Data Recording H. Bergmann, T. Zeyringer	257	
Sampling of Spatial Functions: The Aliasing Problem and Statistical Errors A. Mueller	267	
Concurrent LDA Data Acquisition and Analysis P. Steffler, R. Gitzel and A. W. Peterson		
Software for a Fast Minicomputer Based Data Acquisition System <i>B. Cuche</i>		
SECTION 6 GROUNDWATER FLOW		
A Simulation Model of the Global Use of Surface Water and Groundwater	301	

Groundwater A. Iglesias, M.P. Perez and R. Medina

.

Branched Irrigation System Network Optimization with More Than One State of Operation. Software for Microprocessors L.S. Vamvakeridou-Lyroudia 321 SECTION 7 HYDRAULIC SOFTWARE CODES 333 Computerised Forecasting System: A General Software Product for Interactive Management of Hydrology Data Banks and Real-Time River Discharge Forecasting M. Erlich, P. Sauvaget 337 International Database on Urban Drainage Modelling and its Application M. Radojkovic, C. Maksimovic 357 Role of Simplified Micro-Computer Models as Parts of Multilevel Hydrological Packages P. Wisner, D. Consuegra, J.F. Sabourin and A. Lam 393 Applications of a Two-Dimensional Diffusion Hydrodynamic Model J.D. DeVries, T. V. Hromadka and A.J. Nestlinger 393 Maximization of Firm Energy Production of Hydroelectric Systems H.D. Altinbilek, E. Aygün 413 Automatic Optimization of Irregular Triangular Meshes for Natural Flow Computations I.J. Westwood, KP. Holz 437 Hydrodynamics of Axisymmetric Bodies at Finite Water Depth S.M. Calisal, J.L.K. Chan 437 SECTION 8 WATER SUPPLY AND SEWER NETWORKS 461 FSEWER - A Program for the Design of Foul Sewerage Systems A.R.D. Thorley, D.J. Wood 471 Velocity, Pressure and Pressure-Velocity-Correlation Measurements in A.R.D. Thorley, D.J. Wood 487	Estimation of Hydraulic Conductivity and the Flow Types in the Rock by Using a Model Simulation and Hydraulic Test Results A. Ylinen		
Computerised Forecasting System: A General Software Product for Interactive Management of Hydrology Data Banks and Real-Time River Discharge Forecasting M. Erlich, P. Sauvaget333International Database on Urban Drainage Modelling and its Application M. Radojkovic, C. Maksimovic357Role of Simplified Micro-Computer Models as Parts of Multilevel Hydrological Packages P. Wisner, D. Consuegra, J.F. Sabourin and A. Lam371Applications of a Two-Dimensional Diffusion Hydrodynamic Model J.D. DeVries, T.V. Hromadka and A.J. Nestlinger393Maximization of Firm Energy Production of Hydroelectric Systems H.D. Altinbilek, E. Aygün413Automatic Optimization of Irregular Triangular Meshes for Natural Flow Computations I.J. Westwood, KP. Holz437Hydrodynamics of Axisymmetric Bodies at Finite Water Depth S.M. Calisal, J.L.K. Chan437SECTION 8WATER SUPPLY AND SEWER NETWORKS461Microcomputer Modelling of Flow Conditions in Pipe Distribution Systems A.R.D. Thorley, D.J. Wood471Velocity, Pressure and Pressure-Velocity-Correlation Measurements in Submerged Gate Flows487	One State of Operation. Software for Microprocessors		
Interactive Management of Hydrology Data Banks and Real-Time River Discharge Forecasting M. Erlich, P. Sauvaget 357 International Database on Urban Drainage Modelling and its 357 Application 357 M. Radojkovic, C. Maksimovic 371 Role of Simplified Micro-Computer Models as Parts of Multilevel 371 Hydrological Packages 371 P. Wisner, D. Consuegra, J.F. Sabourin and A. Lam 393 Applications of a Two-Dimensional Diffusion Hydrodynamic Model 393 J.D. DeVries, T.V. Hromadka and A.J. Nestlinger 413 Maximization of Firm Energy Production of Hydroelectric Systems 413 Automatic Optimization of Irregular Triangular Meshes for Natural 423 Flow Computations 1.J. Westwood, KP. Holz 437 Hydrodynamics of Axisymmetric Bodies at Finite Water Depth 437 S.M. Calisal, J.L.K. Chan 437 SECTION 8 WATER SUPPLY AND SEWER NETWORKS 461 Microcomputer Modelling of Flow Conditions in Pipe Distribution 471 Systems A.R.D. Thorley, D.J. Wood 471 Velocity, Pressure and Pressure-Velocity-Correlation Measurements in 487	SECTION 7 HYDRAULIC SOFTWARE CODES		
Application M. Radojkovic, C. Maksimovic371Role of Simplified Micro-Computer Models as Parts of Multilevel Hydrological Packages P. Wisner, D. Consuegra, J.F. Sabourin and A. Lam371Applications of a Two-Dimensional Diffusion Hydrodynamic Model J.D. DeVries, T.V. Hromadka and A.J. Nestlinger393Maximization of Firm Energy Production of Hydroelectric Systems H.D.
