

Inflation, the Quantity Theory, and Rational Expectations

EDUARD JAN BOMHOFF

Erasmus University

Rotterdam

The Netherlands

1980

NORTH-HOLLAND PUBLISHING COMPANY
AMSTERDAM • NEW YORK • OXFORD

CONTENTS

Chapter 1	AN ECONOMIC THEORY OF INFLATION	
	1.1 Introduction	1
	1.2 Rational behaviour	5
	1.3 Rational expectations	11
	1.4 Calculation of expectations	14
	1.4 The rest of the book	18
Chapter 2	THE QUANTITY THEORY AND THE PRICE EQUATION	
	2.1 Introduction	21
	2.2 The ARIMA (0,1,1) model	31
	2.3 Variables with the simplest term structure of expectations	36
	2.4 Dynamics of the money supply	38
	2.5 The demand for money	42
	2.6 The behaviour of the monetary authorities	51
	2.7 The determination of real income	61
	2.8 The actual rate of price change	71
Chapter 3	APPLYING THE QUANTITY THEORY: THE CASE OF THE U.S.	
	3.1 Introduction	76
	3.2 Models for money growth	79
	3.3 The determination of output	83
	3.4 The price equation	89
	3.5 A simulation with the two models	96
	3.6 Summary	102
Chapter 4	INFLATION IN THE NETHERLANDS	
	4.1 Introduction	104
	4.2 Money growth in the Netherlands	105
	4.3 The determination of output	116
	4.4 The price equation	121
	4.5 Foreign influences on Dutch prices	127
	4.6 The official Dutch forecasts of inflation	133
	4.7 Summary	145

Chapter 5	STRUCTURAL MODELS AND RATIONAL EXPECTATIONS	
5.1	Introduction	149
5.2	Expectations about the exogenous variables	153
5.3	The modelling of expectations inside the model	162
5.4	Rational forecasts from non-rational models?	168
5.5	Making changes in non-rational models	175
5.6	Irrationality in a model of the Dutch economy	180
5.7	Simulations with a slightly altered model	187
5.8	Conclusions	202
Chapter 6	CONCLUDING COMMENTS, 1979	205
Appendix 1	NOTATIONS AND DATA	215
Appendix 2	UNIVARIATE MODELS FOR EXPECTATIONS	221
