Helmut Krcmar / Bettina Schwarzer (Eds.)

The Impact of Information Technology on the European Transport Sector

TECHNISCHE HOCHSCHULE DARMSTADT
Fachbereich 1
Gesamtbibliothek
Betriebswirtschaftslehre
Inv.-Nr. : 46868
Abstell-Nr. : A08/887
Sachgebiete:

DeutscherUniversitätsVerlag

Contents

Part I Introduction

1. Background of the study **3**

2. Methodology **4**

Part II Cases

1. SNCF's SOCRATE system (France) **11**

Jelassi, T.; Arnesen, A.; Nordin, E.; Paulus, F.; Rechatin, D.

1.1. Abstract 11
1.2. Passenger transport in Europe 11
1.3. Changes in SNCF's ctrategy 15
1.4. The SOCRATE concept 16
1.5. Problems with the implementation of SOCRATE 19
1.5.1. Initial choices 19
1.5.2. Project management 19
1.5.3. Launch of SOCRATE 20
1.5.4. Inadequate training 21
1.5.5. Questionable system ergonomics 22
1.5.6. Poor public relations 23
1.5.7. Organisational transformation issues 24
1.6. Summary 24
1.7. Appendix : Socrate Architecture 25
1.8. References 26

2. Deutsche Bahnen (DB) (Germany) **27**

Beckmann, A.; Krcmar, H.

2.1. Abstract 27
2.2. Company Profile 27
2.3. Use of information technology in combined traffic 29
2.3.1. Transport control system of the 90's (TS'90) 30
2.3.2. Disposition and information system of combined traffic (DISK) 31
2.4. The DISK System 32
2.4.1. Objectives of DISK 32

2.4.2. Development and introduction of DISK 33
2.4.3. DISK-Terminal 34
2.4.4. Central DISK 36
2.4.5. Terminal information system 36
2.4.6. A Centralised Controlling System for superior freight trains 37
2.5. Evaluation 38
2.6. References 39

3. The "Quality Project" of FS 41
Pasini, P.; Giacomelli, S. (Italy)
3.1. Abstract 41
3.2. Introduction 41
3.3. The improvement of the internal processes 43
3.4. The creation and reinforcement of external relations 46
3.5. The internationalisation of the service 48
3.6. The scheduling of the "Quality Project" 49
3.7. Conclusions 50
3.8. References 50

4. The port of Santander: The EDISAN and ARCANTEL projects (Spain) ... 51
O´Callaghan, R.
4.1. Abstract 51
4.2. EDISAN 51
4.2.1. Objectives 51
4.2.2. The players 52
4.2.3. Information flow before and after EDISAN 52
4.2.4. A sampling of Results 54
4.3. ARCANTEL 55
4.3.1. Objectives 55
4.3.2. Information flow before ARCANTEL 57
4.3.3. Benefits expected from ARCANTEL 57
4.4. Conclusions 58

5. The port of Valencia: The STED project (Spain) 61
O´Callaghan, R.
5.1. Abstract 61
5.2. STED Objective 62
5.3. Information flow between customs and other agents previous to STED 62
5.4. Information flow between customs and other agents after STED. 63
5.5. Expected benefits 64
5.6. Problems encountered 65
5.7. Future directions 66

6. Timmermans Diessen B.V. (the Netherlands) 67
Ribbers, P.
6.1. Abstract 67
6.2. The company 67
6.3. Strategy 68
6.4. Information technology 69
6.5. Areas of opportunity 70
6.6. Conclusions 71
6.7. References 72

7. Kühne&Nagel (Germany) 73
Eistert, T.; Beckmann, A.; Krcmar, H.
7.1. Abstract 73
7.2. Company profile 73
7.3. The Information Usage at Kühne&Nagel 74
7.3.1. Traffic System 76
7.3.2. KNIE System 76
7.3.3. PCFACTS System 77
7.3.4. POCS System 78
7.3.5. Centralised EDIFACT System 79
7.4. Evaluation of EDI applications 80
7.5. KN's position in the industry 81
7.6. References 82

8. IT at Calberson (France) 83
Jelassi, T.; Loebbecke, C.
8.1. Abstract 83
8.2. Company overview 83
8.3. Calberson's national services 85
8.4. "Calberson Logistique" 86
8.5. Calberson's international services 86
8.6. Motivation for leveraging IT 87
8.7. Calberson on Minitel: A Videotex application 87
8.8. CRISTAL: A PC-based IT service 89
8.9. Calberson's EDI application 90
8.10. IT and EDI infrastructure at Calberson 92
8.11. Resulting benefits 93
8.12. Conclusion 95
8.13. References 95

9. SCANSPED HOLLAND, member of the Bilspedition group (the Netherlands) Ribbers, P. **97**
9.1. Abstract 97
9.2. Company profile 97
9.3. Strategy 99
9.4. General IT awareness 100
9.5. Existing applications 101
9.6. Areas of opportunity 102
9.7. Conclusions 102
9.8. References 103

10. Tramite (Italy) **105**
Pasini, P.; Giacomelli, S.
10.1. Abstract 105
10.2. Introduction 105
10.3. The creation of an electronic market of transportation 106
10.4. The complementary information services 109
10.5. The "Tracking & Tracing" services 111
10.6. Towards the integration of information services 113
10.7. Conclusions 113
10.8. References 114

Part III Country Analysis

1. Country Analysis of Germany **117**
Beckmann, A.; Krcmar H.
1.1. Overview 117
1.2. Impact of information technology in the vertical dimension 118
1.2.1. The use of EDI to improve vertical interconnection 118
1.2.2. Logistics outsourcing 121
1.2.3. Factory transport 124
1.2.4. Just in Time delivery 125
1.2.5. Integration of the transporter into the information flow 128
1.3. Impact of information technology in the horizontal dimension 130
1.3.1. Market power of customers 130
1.3.2. Market power of suppliers 133
1.3.3. Changed rivalry in the transportation sector 133
1.3.4. Specialisation and differentiation 134

1.3.5. Electronic markets 134
1.3.6. Information technology as a barrier against newcomers 138
1.4. Impact of information technology in the international dimension 139
1.4.1. Concentration versus fragmentation 140
1.4.2. Strategic alliances in Europe 142
1.5. Impacts on small and medium sized companies 143
1.6. Conclusions 144
1.7. References 146

2. Country Analysis of France 147
Jelassi, T.; Eistert, T.
2.1. Transport in France: An overview 147
2.1.1. The main sectors 147
2.1.2. The main actors 148
2.1.3. Inter-modal transport 149
2.1.4. Analysis in three dimensions 150
2.2. Impact of information technology in the vertical dimension 152
2.2.1. Overview 152
2.2.2. Integrating logistics: Parcel carriers in Europe 153
2.2.3. Inter-modal transport: Aéroports de Paris 155
2.2.4. Rail and Ports: The EDIFRET service of SNCF 155
2.2.5. Example of electronic coordination: SENARDIS 155
2.3. Impact of information technology in the horizontal dimension 156
2.3.1. Acquisitions in the transport sector 156
2.3.2. Airline reservation systems 157
2.3.3. Example of electronic coordination via Minitel: TELEROUTE 158
2.3.4. Example of an electronic market: TRANSPOTEL 159
2.4. Impact of information technology in the international dimension 159
2.4.1. Globalisation of forwarders 159
2.4.2. TEDIS Program 160
2.4.3. Example of a European service provider: Transponet 161
2.4.4. European network of high-speed trains 161
2.4.5. The DOCIMEL project for international rail transport 162
2.5. International comparisons 162
2.6. Concluding remarks 163
2.7. References 164

3. Country Analysis of Spain **167**
O´Callaghan, R.
3.1. Overview: Information technology in the Spanish transport sector. 167
3.1.1. Internal information systems: 167
3.1.2. External information technology systems: 168
3.1.3. Problems that information systems face in the Spanish transport sector. .. 170
3.1.4. Conclusion 171
3.2. Impact in the vertical dimension 172
3.2.1. Trends in logistics 172
3.2.2. Relations in the transport chain 175
3.2.3. Conclusions 175
3.3. Impact in the horizontal dimension 176
3.3.1. Shippers 176
3.3.2. Carriers 177
3.3.3. Forwarders and other intermediate parties 177
3.3.4. Customs 178
3.3.5. Ports 178
3.3.6. Conclusions 179
3.4. Impact in the international dimension 179
3.5. Impact on small and medium sized enterprises 181
3.6. Other issues 183
3.6.1. Electronic markets 183
3.6.2. Label and bar coding 183
3.6.3. Conclusions 184
3.7. General conclusions 184
3.8. References 185

4. Country analysis of Italy **189**
Pasini, P.; Giacomelli, S.
4.1. Introduction: some peculiar aspects of the Italian transport sector 189
4.2. Impact of information technology in the vertical dimension 192
4.2.1. The use of EDI 193
4.2.2. The usage of "Tracking & Tracing" services 195
4.2.3. The use of electronic markets 196
4.3. Impact of information technology in the horizontal dimension 198
4.3.1. Market power of customers 198
4.3.2. Market power of suppliers 200
4.3.3. Changed rivalry within the transport sector 201
4.3.4. Information technology as an entry barrier against newcomers 203

4.4. Impact of information technology in the international dimension 204
4.4.1. The impacts of EDI in the international dimension 204
4.4.2. The impacts of "Tracking & Tracing" in the international dimension 205
4.4.3. The impacts of electronic markets in the international dimension 205
4.5. Conclusions 206
4.6. References 206

5. Country Analysis of the Netherlands 209
Ribbers, P.
5.1. Overview 209
5.2. Impacts of information technology in the vertical dimension 210
5.2.1. Introduction 210
5.2.2. The logistic chain 211
5.2.3. Information intermediaries in the vertical chain 215
5.2.4. Case example: Informore B.V. - Transport Management Systems 215
5.2.5. The use of EDI 217
5.2.6. The use of Tracking and Tracing 218
5.3. Impact of information technology in the horizontal dimension 219
5.3.1. Inter-modal and multi-modal transport 219
5.3.2. Information intermediaries and horizontal integration 220
5.3.3. Case example: International Distribution Systems (IDS) 220
5.3.4. Electronic markets 222
5.3.5. Case example: Teleroute/Tradicom 222
5.4. Impact of information technology in the international dimension 224
5.5. Impact on small and medium sized enterprises (SMEs) 225
5.6. Conclusions 226
5.7. References 228

Part IV Summary

1. Development in the European transport sector 233

2. Importance of information technology for the transport sector 233

3. Issues 234
3.1. Concentration vs. fragmentation in the European transport sector 234
3.2 Electronic markets 236
3.3 Conservatism towards information usage 237
3.4. Infrastructure and standardisation 238

4. Recommendations 238
