

International conference on:

Terrain and geohazard challenges facing onshore oil and gas pipelines

Evaluation – Routing – Design – Construction – Operation

Proceedings of a three day international conference on terrain and geohazard challenges facing onshore oil and gas pipelines, organised by the Institution of Civil Engineers in association with BP Exploration and held at the Institution of Civil Engineers, London, UK, on 2 – 4 June 2004

Edited by Mike Sweeney

Sponsored by:

Engineering Group of the
Geological Society of London

ice
Institution of Civil Engineers

Contents:

Keynote papers

Technical and geo-political challenges facing onshore oil and gas pipelines and their influence on routing

J. L. JETER

1

Geohazards and pipeline engineering

D. BRUNSDEN

8

Construction

M. THIELE

28

Terrain and geohazard assessment

Terrain and geohazard challenges facing onshore oil and gas pipelines: historic risks and modern responses

M. SWEENEY

37

Lessons learned from fifty years of terrain evaluation in northern regions especially as applied to major pipelines

R. A. KREIG and M. C. METZ

52

Terrain, ground conditions and geohazards: evaluation and implications for pipelines

J. H. CHARMAN, P. G. FOOKES, J. V. HENGESH, E. M. LEE,
S. POLLOS-PIRALLO, D. T. SHILSTON and M. SWEENEY

78

Geohazards and risk assessment for pipeline route selection

E. M. LEE AND J. H. CHARMAN

95

Mapping of landslide hazard and risk along the pipeline route

F. NADIM and S. LACASSE

117

A case study: geohazards risk assessment for a proposed pipeline across diverse geological environments in Papua New Guinea

J. C. BRAYBROOKE, M. Y. BROISE, P. G. FOOKES and
M. SWEENEY

129

In Salah Gas project, Algeria – part 1: terrain evaluation for desert pipeline routing

P. G. FOOKES, E. M. LEE and M. SWEENEY

144

In Salah Gas project, Algeria – part 2: detailed terrain evaluation for site design	
D. T. SHILSTON, E. M. LEE, P. G. FOOKES and I. STANDISH	162
A framework for assessing earthquake hazards for major pipelines	
J. BIRD, T. O'ROURKE, T. BRACEGIRDLE, J. BOMMER and I. TROMANS	175
Thirty years of terrain evaluation for route corridor engineering	
G. J. HEARN	190
Remote sensing for terrain evaluation and pipeline engineering	
J. MANNING, M. WILLIS, A. DENNISS and M. INSLEY	212
Pipeline engineering team's response to challenges of terrain and geology	
P. O'CONNELL, G. BOYD, M. INSLEY and P. MURPHY	224
Hazards in mountainous terrain: lessons for linear infrastructure from the Canadian forest industry	
R. H. GUTHRIE and D. T. SHILSTON	232
Aligning oil and gas pipelines through the Makarov Mountains, Sakhalin Island, Russia	
P. G. FOOKES, G. J. HEARN and B. TOLLIN	243
Andean pipelines – a challenge for natural hazard and risk managers	
M. PORTER, F. ESFORD and K. W. SAVIGNY	259
Debris flow risk to pipeline facilities in mountainous terrain: a quantitative risk assessment approach	
R. MOORE, E. M. LEE and S. R. HENCHER	271
Assessment – BTC Pipeline examples	
<hr/>	
Terrain evaluation and site investigations for design of the trans-Caucasus oil and gas pipelines in Georgia	
D. T. SHILSTON, E. M. LEE, S. POLLOS-PIRALLO, D. MORGAN, J. CLARKE, P. G. FOOKES and D. BRUNSDEN	283
Geohazard assessment of a major crude oil pipeline system – the Turkish section of the BTC Pipeline route	
M. LOTTER, J. H. CHARMAN, E. M. LEE, J. V. HENGESH, D. T. SHILSTON and G. POSCHER	301

The Sivas Karst – from terrain evaluation to ground truth	
J. C. R. ARTHUR, C. HAAS, D. T. SHILSTON and A. C. WALTHAM	311

Use of terrain analysis as a basis for erosion risk assessment along pipeline rights-of-way: a case study from Georgia	
R. P. C. MORGAN, M. J. HANN, D. T. SHILSTON, Ts. E. MIRTSKHOULAVA, V. NADIRASHVILI, A. H. GASCA, J. CLARKE and M. SWEENEY	324

Characterization of surface rupture hazards for BTC Pipeline fault crossings, Turkey	
J. V. HENGESH, M. ANGELL and W. R. LETTIS	348

Environment

Environmental impact assessment of large pipeline projects in remote environments: integrating engineering and environmental design	
D. KERR	361

Understanding the dynamics of plant propagation and soil mechanics in the management of successful reinstatement	
S. SLJIVIC and T. R. HARWOOD	370

The case for early contractor involvement to minimise risks associated with routing and construction of pipeline projects	
D. A. WILLIS, R. DOMENEY and L. ROACH	380

Design

Terrain and geohazard challenges to pipelines in Canada	
K. W. SAVIGNY and A. E. ISHERWOOD	403

Modelling of frost heave of gas pipelines in Arctic conditions	
V. MORGAN, J. CLARK and B. HAWLADER	417

Geotechnical engineering for landslide stability management along the trans-Caucasus oil and gas pipelines at Kodiana Pass – Sakire in Georgia	
I. CHKHEIDZE, G. LOMINADZE, D. J. FRENCH, D. T. SHILSTON, M. J. WHITBREAD, E. M. LEE, D. MORGAN and J. CLARKE	428

Management of geohazards in the interest of owners and operators of onshore pipelines	
K. W. SAVIGNY, M. PORTER, F. ESFORD, C. DUNLOP and M. T. REED	446

Evolution of mountainous pipeline design in Colombia M. GARCÍA-LÓPEZ and J. V. AMÓRTEGUI	459
Mitigation of fault crossing hazards for the AGT Pipelines project through Azerbaijan and Georgia D. J. NYMAN, P. C. THENHAUS and G. MOSCARDA	468
AGT Pipelines project overview – engineering, design and construction of significant river crossings in Azerbaijan and Georgia C. WALKER, C. SKIPPER and R. BETTESS	480
Impact of eolian sand hazards on desert pipeline construction G. K. SCHOLEY	492
Well field development in the Komi Republic, Russia P. A. NOWAK	506
Construction	
Pipeline insurance – technical aspects of underwriting and claims R. RADEVSKY and D. SCOTT	517
In Salah Gas project, Algeria – part 3: prediction and performance of large chain trenchers on a desert pipeline project M. SWEENEY, G. S. PETTIFER, D. T. SHILSTON, P. BEL-FORD and M. STOCKBRIDGE	529
Pipelining in rugged terrain: costs, cost drivers and routing principles A. GASCA and M. SWEENEY	549
The practicality of drilling very long pipelines under hazardous terrain – 5km, 10km? A. LUKAS, S. LONERAGAN and D. MACDONALD	565
Pipelines and peat: a review of peat formation, pipeline construction techniques and reinstatement options A. RYDER, D. TAYLOR, F. WALTERS and R. DOMENEY	576
Performance of chain trenchers in rock: database and prediction M. SWEENEY, S. A. LENG, G. S. PETTIFER and L. HAUSERMANS	596

Pipeline girth-weld joint corrosion protection: remote project field installation challenges	
R. BUCHANAN, R. DUNN and N. GRITIS	610

A summary of recent experience in the characterisation and remediation of peatlands	
A. P. GUNNING, D. HORNE and J. BEAN	621

Operations and reinstatement

Pipelines and landslides in rugged terrain: a database, historic risks and pipeline vulnerability	
M. SWEENEY, A. H. GASCA, M. GARCÍA-LÓPEZ and A. C. PALMER	641

Bridging the gap between field operations and risk management	
M. LEIR	660

Vegetation establishment and management for the restoration of pipeline rights-of-way	
M. J. HANN, R. P. C. MORGAN, D. T. SHILSTON, TS. E. MIRTSKHOULAVA, V. NADIRASHVILI, A. H. GASCA, J. CLARKE and M. SWEENEY	672

Performance management for site restoration in rugged terrain	
M. SWEENEY, A. H. GASCA, R. P. C. MORGAN and J. CLARKE	687

Monitoring and analysis of the effects of ground movement on pipeline integrity	
V. MORGAN, S. KENNY, D. POWER and R. GAILING	701

Towards automated monitoring of ground instability along pipelines	
G. AGER, S. MARSH, P. HOBBS, R. CHILES, M. HAYNES, N. THURSTON and R. PRIDE	713
