1	STOCHASTIC PROCESSES: Description and Definition		
	1.1	Introduction	1
	1.2	Description and Definition	5
	1.3	Probability Distributions	8
	1.4	The Markov Process	9
	1.5	The Renewal Process	12
	1.6	The Stationary Process	13
	1.7	A Plan for the Remaining Chapters	14
	References		14
	Exercises		16
	Elementary Review Exercises		18
	Advanced Review Exercises		22
2	MARKOV CHAINS		27
	2.1	Introduction	27
	2.2	The <i>n</i> -Step Transition Probability Matrix	31
	2.3	Classification of States	32
	2.4	A Canonical Representation of the Transition Probability Matrix	40
	2.5	Classification of States in Practice	43
	2.6	Finite Markov Chains with Transient States	45

	Refe	rences	54 54
	LACI		54
3	IRREDUCIBLE MARKOV CHAINS WITH ERGODIC STATES		
	3.1	Transient Behavior	63
	3.2	Limiting Behavior	69
	3.3	First Passage and Related Results	86
	References		96
	Exercises		97
4	BRANCHING PROCESSES AND OTHER SPECIAL TOPICS		
	4.1	Branching Processes	111
	4.2	Markov Chains of Order Higher than 1	116
	4.3	Lumpable Markov Chains	118
	4.4	Reversed Markov Chains	123
	Refe	rences	125
	Exer	cises F	125
5	STATISTICAL INFERENCE FOR MARKOV CHAINS		
	5.1	Estimation of the Elements in a Transition Probability Matrix	129
	5.2	Hypothesis Testing Issues for Markov Chains	133
	5.3	Inference From Partially Observable Markov Chains	141
	5.4	Statistical Inference for Branching Processes	144
	5.5	Additional Comments	146
	References		147
	Exercises		149
6	APPLIED MARKOV CHAINS		157
	6.1	Queueing Models	157
	6.2	Inventory Systems	167
	6.3	Storage Models	169
	6.4	Industrial Mobility of Labor	172
	6.5	Educational Advancement	176
	6.6	Human Resource Management	179
	6.7	Term Structure	181
	6.8	Income Determination under Uncertainty	184
	6.9	A Markov Decision Process	185
	References		190
7	SIMPLE MARKOV PROCESSES		
	7.1	Examples	193
	7.2	Markov Processes: General Properties	195
	7.3	The Poisson Process	200
	7.4	The Pure Birth Process	209

	7.5	The Pure Death Process	212
	7.6	Birth and Death Processes	213
	7.7	Limiting Distributions	221
	7.8	Markovian Networks	224
	7.9	Additional Examples	231
	Refe	rences	235
	Exer	cises	235
8	STA	FISTICAL INFERENCE FOR SIMPLE MARKOV PROCESSES	247
	8.1	Estimation of Parameters	247
	8.2	Hypothesis Testing for Simple Markov Processes	254
	8.3	Statistical Inference for Queues	256
	8.4	Additional Examples	263
	Refe	rences	266
	Exer	cises	268
9	APPLIED MARKOV PROCESSES		
	9.1	Queueing Models ^{1'}	271
	9.2	The Machine Interference Problem	277
	9.3	Queueing Networks	278
	9.4	Flexible Manufacturing Systems	285
	9.5	Inventory Systems	287
	9.6	Reliability Models	293
	9.7	Markovian Combat Models	304
	9.8	Stochastic Models for Social Networks	317
	9.9	Recovery, Relapse, and Death Due to Disease	320
	Refe	rences	323
10	RENEWAL PROCESSES		
	10.1	Introduction	327
	10.2	Renewal Processes when Time is Discrete	328
	10.3	Renewal Processes when Time is Continuous	335
	10.4	Alternating Renewal Processes	344
	10.5	Markov Renewal Processes (Semi-Markov Processes)	346
	10.6	Renewal Reward Processes	350
	10.7	Statistical Inference for Renewal Processes	351
	10.8	Additional Examples	353
	Refe	rences	357
	Exer	cises	358
11	STA	TIONARY PROCESSES AND TIME SERIES ANALYSIS	365
	11.1	Definition	365
	11.2	Some Examples	370
	11.3	Ergodic Theorems	378

11.4 Covariance Stationary Processes in the Frequency Domain	379		
11.5 Time Series Analysis: Introduction	388		
11.6 Stochastic Models for Time Series	391		
11.7 The Autoregressive Process	396		
11.8 The Moving Average Process	401		
11.9 A Mixed Autoregressive Moving Average Process	403		
11.10 Autoregressive Integrated Moving Average Processes	405		
11.11 Time Series Analysis in the Time Domain	408		
11.12 Spectral Analysis of Time Series Data	413		
References	417		
Exercises	418		
12 SIMULATION AND MARKOV CHAIN MONTE CARLO	421		
12.1 Introduction	421		
12.2 Simulation	422		
12.3 Markov Chain Monte Carlo	426		
References j	430		
Answers to Selected Exercises	433		
Appendix
