

WATER RESOURCES ENGINEERING in KARST

Library of Congress
Call Number: TA 657 .M53
Date of Acquisition: 10/1/70
Institution: University of California
San Diego

Petar T. Milanović

CRC PRESS

Boca Raton London New York Washington, D.C. Institut für Geotechnik

- BIBLIOTHEK -
Prof. Dr.-Ing. R. Katzenbach
Technische Universität Darmstadt
Petersenstr. 12, 61007 D

Contents

Chapter 1	General Introduction to Karst	1
1.1	Origin and Meaning of the Term Karst.....	3
1.2	Types of Karst.....	3
1.3	The Karstification Process.....	6
1.4	Role of Tectonics in the Process of Karstification.....	7
1.5	Depth of Karstification.....	8
1.6	Karst Porosity.....	11
1.7	Basic Geomorphological Features.....	13
1.8	Karst Springs.....	20
1.9	Ponors (Swallowholes).....	22
1.10	Estavelles.....	23
1.11	Submarine Springs.....	24
1.12	Subsidence and Collapse.....	25
	References.....	29
Chapter 2	Groundwater in Karst	31
2.1	Basic Theories on Karst Groundwater Circulation.....	33
2.2	Karst Aquifer.....	34
2.3	Evolution of Karst Aquifers.....	36
2.4	Fluctuation of the Water Table.....	38
2.5	Average Velocity of Water Flow in Karst.....	38
	References.....	40
Chapter 3	Underground Water Tapping	43
3.1	General Approach.....	45
3.2	Examples.....	45
3.2.1	Spring Lez, France.....	45
3.2.2	Spring Oko, Herzegovina.....	47
3.2.3	Intake Structure, Zvir, Croatia.....	47
3.2.4	Jergaly Spring, Slovakia.....	48
3.2.5	Spanish Examples.....	49
3.2.5.1	Atrita Spring.....	49
3.2.5.2	Algeria Spring.....	49
3.2.5.3	Deifontes Spring.....	49
3.2.5.4	Los Santos Spring.....	49
3.2.6	Brestovica Tapping Structure, Slovenia.....	49

3.2.7	Rižana Spring, Slovenia	49
3.2.8	Palata, Mali Zaton Spring, Croatia	50
3.2.9	Kiveri Marine Dam, Greece	50
3.2.10	Jama Spring, Herzegovina	50
3.2.11	Opačica Spring, Yugoslavia	52
3.2.12	Almiros Iraklion Spring, Crete	55
3.2.13	Kotor Bay Springs, Yugoslavia	56
3.2.14	Deep Wells in Kazerun, Iran	57
3.2.15	Mrljiš Spring, Yugoslavia	58
3.3	Tapping Galleries	59
3.4	Tapping of Water Intrusion under Pressure	61
	References	64

Chapter 4 Dams and Reservoirs: Inherent Risk..... 67

4.1	Introduction	69
4.2	Geological Predisposition to Risk	71
4.3	Risk Types	73
4.4	Time as a Risk Component	74
4.5	Risk of an Ecological Nature	75
4.6	Induced Seismicity	75
4.7	Risk Reduction Strategy	75
4.8	Acceptance of Risk	76
	References	77

Chapter 5 Dams and Reservoirs: Prevention and Remediation..... 79

5.1	Introduction	81
5.2	Data Needed for Grout Curtain Design.....	82
5.3	Water Pressure Test: Lugeon Test.....	83
5.3.1	Relationship between Water Pressure Tests (Lu) and Hydraulic Conductivity (k)	85
5.4	Grout Curtain Position	86
5.5	Grouting Criteria	87
5.6	Grouting Depth	88
5.7	Grouting Pressure.....	89
5.8	Hydraulic Fracturing and Hydraulic Jacking	92
5.9	Grouting Procedure	93
5.9.1	Operational Procedures	93
5.9.2	Grout Mass Consumption	95
5.9.3	The GIN Principle.....	97
5.10	Karstified Rock Flushing for Grouting.....	98
5.11	Concentrated Leakage Impermeabilization	100
5.11.1	Impermeabilization at the Surface of the Terrain.....	101
5.11.2	Underground Sealing (Karst Channel Plugging).....	109

5.11.2.1	General Approach	109
5.11.2.2	Materials and Technologies	110
5.11.2.3	General Plugging Procedure	112
5.11.2.4	Examples of Karst Channel Plugging	113
5.11.2.5	Cut-Off (Diaphragm) Wall Sealing Technology	118
5.12	Case Studies of Dams and Reservoirs: Watertightness, Failures, and Rehabilitation	121
5.12.1	Douglas Dam, U.S.	121
5.12.2	Hales Bar Dam, U.S.	122
5.12.3	Great Falls Reservoir, U.S.	122
5.12.4	Lar Dam, Iran	123
5.12.5	Keban Dam, Turkey	126
5.12.6	Sklope Dam, Croatia	128
5.12.7	Canelles Dam, Spain	131
5.12.8	Špilje, FYR Macedonia	135
5.12.9	Khao Laem Dam, Thailand	136
5.12.10	Karun I, Iran	139
5.12.11	Camarassa, Spain	139
5.12.12	Wolf Creek, U.S.	142
5.12.13	Višegrad Dam, Bosnia and Herzegovina	142
5.12.14	Grabovica Dam, Bosnia and Herzegovina	144
5.12.15	El Cajón (Francisco Morazan) Dam, Honduras	145
5.12.16	Oymapinar Dam, Turkey	151
5.12.17	Mratinje (Piva) Dam, Yugoslavia	153
5.12.18	Grančarevo Dam, Herzegovina	156
5.12.19	Marun Dam, Iran	158
5.12.20	Hutovo Compensation Reservoir, Bosnia and Herzegovina	160
5.12.21	Buško Blato Reservoir, Bosnia and Herzegovina	163
5.12.22	Nikšićko Polje Reservoirs, Yugoslavia	165
5.12.22.1	Slano Reservoir	166
5.12.22.2	Vrtac Retention Basin	169
5.12.23	Mornos Reservoir, Greece	170
5.12.24	Perdika, Greece	170
5.12.25	Mavrovo Reservoir, Macedonia (FYUR)	171
5.12.26	May, Turkey	172
5.12.27	Apa, Turkey	172
5.12.28	Onac, Turkey	173
5.12.29	Cevizli, Turkey	173
5.12.30	Lone Pine, U.S.	173
5.12.31	Dokan Dam, Iraq	173
5.12.32	Ataturk Dam, Turkey	174
5.12.33	Salakovac Dam, Bosnia and Herzegovina	176
5.12.34	Wujiangdu Dam, China	177
5.12.35	Berke Dam, Turkey	179
5.12.36	Salman Farsi Dam, Iran	180

5.13	Dam and Reservoir Construction on Conglomerate, Gypsum, and Anhydrite.....	182
5.13.1	McMillan Dam, U.S.....	185
5.13.2	Kamskaya, Russia.....	185
5.13.3	Mosul Dam, Iraq.....	186
5.13.4	Huoshipo Reservoir, China.....	187
	References.....	188
Chapter 6	Underground Dams and Reservoirs.....	193
6.1	Introduction.....	195
6.2	General Underground Reservoir Classification.....	195
6.3	Basic Features of Artificial Underground Storage.....	195
6.4	Possible Concepts of Watertight Structures.....	197
6.5	Advantages and Shortcomings of Underground Storage and Dams.....	197
6.6	Examples and Projects.....	198
6.6.1	Examples in China.....	198
6.6.1.1	Yuhong Power Plant.....	199
6.6.1.2	Beilou Power Plant.....	200
6.6.1.3	Wulichong Reservoir.....	200
6.6.2	Miyako Project, Japan.....	202
6.6.3	Ombla Power Plant, Croatia.....	205
6.7	Some Unfavorable Consequences of Underground Storage.....	209
6.7.1	Flood Provoking.....	209
6.7.2	Induced Collapse Failure.....	209
6.8	Rock Instability and Local Seismic Activity.....	211
	References.....	212
Chapter 7	Karst Spring Submergence.....	215
7.1	Introduction.....	217
7.2	Trebišnjica Spring Submergence.....	217
7.3	Dumanli Spring Submergence.....	220
7.4	Neraidha Spring Submergence.....	220
7.5	Pivsko Oko (Sinjac) Spring Submergence.....	222
7.6	Rama Spring Submergence.....	222
7.7	Yarg Spring Submergence.....	222
	References.....	222
Chapter 8	Tunneling in Karst: Common Problems.....	223
8.1	Introduction.....	225
8.2	Nature of Problems.....	225
8.3	Investigation Needs.....	225
8.4	Defects and Remediations.....	226
8.5	Tunnel-Boring Machines in Karst.....	231

8.6	Relocation of Tunnel Route.....	232
8.7	Tunneling beneath Groundwater Level	235
8.8	Role of Hydrogeology in Tunnel Construction Planning	237
8.9	Plugging of Massive Inflows under Pressure into the Tunnel	240
	References.....	241

Chapter 9 Proposed Criteria for Groundwater Protection Zoning in Karst Regions..... 243

9.1	Introduction	245
9.2	Actual Zoning Concept Applied in Nonkarstic Areas	245
9.3	Basic Hydrogeological Parameters for Zoning Criteria in Karst	245
9.4	Criteria for Zoning.....	247
9.4.1	Zone I: Protection Area of a Spring or Intake Structure for Drinking Water.....	247
9.4.2	Zone II: Immediate Protection Area: Zone Requiring Very Severe Protection and Restriction.....	247
9.4.3	Zone III: Protection Area.....	247
9.4.4	Zone IV: External Protection Area.....	248
9.5	Restrictions in Protection Zones.....	248
9.6	Particulars of Zoning Procedures in Karst	249
9.7	Water Quality Monitoring.....	250
9.8	Protection Planing.....	250
9.9	Case Study: Groundwater Protection Zones in Highly Developed Karst (Dubrovnik Area).....	250
	References.....	254

Chapter 10 Groundwater Tracing Techniques 255

10.1	Introduction	257
10.2	Dye Tracers	257
10.3	Common Salt.....	262
10.4	Radioactive Isotopes	263
10.4.1	Bromine-82.....	263
10.4.2	Iodine-131	264
10.4.3	Chromium-51	265
10.4.4	Tritium (3H).....	266
10.5	Postactivated Isotopes	267
10.6	Smoke and Gaseous Tracers.....	267
	References.....	269

Chapter 11 Application of Geophysical Methods in Karst..... 271

11.1	Introduction	273
11.2	Geoelectrical Methods	273
11.3	Geophysical Logging of Boreholes	280

11.4 Geothermal Effects as a Consequence of Water Circulation through the Karst Conduits	284
11.4.1 Investigation Procedure.....	285
11.4.2 Ombla Spring: Thermal Measurements for Underground Flow Determination	287
11.4.3 Temperature Measurements for Determination of Water Losses from Buško Blato Reservoir	287
11.4.4 Maotiaohe 4th Dam: Geothermal Measurements.....	290
11.5 Borehole Radar Method.....	291
11.5.1 Borehole Radar Technique.....	291
11.5.2 Ombla Spring Radar Investigations.....	292
11.6 Electromagnetic VLF Method	292
11.7 Geo-Bomb Method	297
References.....	297
Glossary	301
Author Index	305
Subject Index.....	307
