| Preface to the Second Edition                   | xiii      |
| Preface to the First Edition                    | xv        |
| <b>Chapter 1. Introduction</b>                  | <b>1</b>  |
| 1. What Is Technological Forecasting?           | 1         |
| 2. Why Forecast Technology?                     | 4         |
| 3. Alternatives to Forecasting                  | 5         |
| 4. Will It Come True?                           | 8         |
| 5. Stages of Innovation                         | 9         |
| 6. Remainder of the Book                        | 11        |
| References                                      | 12        |
| For Further Reference                           | 12        |
| Problems  | 12        |
| <b>Chapter 2. Delphi</b>                        | <b>14</b> |
| 1. Introduction                                 | 14        |
| 2. Advantages of Committees                     | 15        |
| 3. Disadvantages of Committees                  | 15        |
| 4. The Delphi Procedure                         | 16        |
| 5. Conducting a Delphi Sequence                 | 17        |
| 6. Variations on Delphi                         | 20        |
| 7. Delphi as a Group Process                    | 22        |
| 8. The Precision of Delphi                      | 24        |
| 9. The Reliability of Delphi                    | 25        |
| 10. Selecting Delphi Panel Members              | 26        |
| 11. Guidelines for Conducting a Delphi Sequence | 29        |
| 12. Constructing Delphi Event Statements        | 33        |
| 13. Summary                                     | 35        |

|   |           |
|---|-----------|
| References                                      | 36        |
| For Further Reference                           | 36        |
| Problems  | 36        |
| <b>Chapter 3. Forecasting by Analogy</b>        | <b>39</b> |
| 1. Introduction                                 | 39        |
| 2. Problems of Analogies                        | 39        |
| 3. Dimensions of Analogies                      | 40        |
| 4. Deviations from a Formal Analogy             | 49        |
| 5. Summary                                      | 50        |
| References                                      | 51        |
| Problems  | 51        |
| <b>Chapter 4. Growth Curves</b>                 | <b>53</b> |
| 1. Introduction                                 | 53        |
| 2. Substitution Curves                          | 54        |
| 3. The Pearl Curve                              | 57        |
| 4. The Gompertz Curve                           | 58        |
| 5. Choosing the Proper Growth Curve             | 58        |
| 6. The Base 10 Pearl Curve                      | 59        |
| 7. The Fisher-Pry Curve                         | 60        |
| 8. Estimating the Upper Limit to a Growth Curve | 61        |
| 9. Selecting Variables for Substitution Curves  | 62        |
| 10. An Example of a Forecast                    | 63        |
| References                                      | 66        |
| For Further Reference                           | 67        |
| Problems  | 67        |
| <b>Chapter 5. Trend Extrapolation</b>           | <b>69</b> |
| 1. Introduction                                 | 69        |
| 2. Exponential Trends                           | 70        |
| 3. An Example of a Forecast                     | 73        |
| 4. A Model for Exponential Growth               | 73        |
| 5. Nonexponential Growth                        | 79        |
| 6. Qualitative Trends                           | 81        |
| 7. A Behavioral Technology                      | 81        |
| 8. Summary                                      | 84        |
| References                                      | 84        |
| For Further Reference                           | 85        |
| Problems  | 85        |
| <b>Chapter 6. Measures of Techology</b>         | <b>86</b> |
| 1. Introduction                                 | 86        |
| 2. Scoring Models                               | 88        |
| 3. Constrained Scoring Models                   | 93        |

|   |            |
|---|------------|
| 4. Planar Tradeoff Surfaces                 | 94         |
| References                                  | 97         |
| Problem                                     | 97         |
| <b>Chapter 7. Correlation Methods</b>       | <b>98</b>  |
| 1. Introduction                             | 98         |
| 2. Lead-Lag Correlation                     | 98         |
| 3. Technological Progress Function          | 103        |
| 4. Maximum Installation Size                | 104        |
| 5. Correlation with Economic Factors        | 106        |
| References                                  | 108        |
| Problems                                    | 109        |
| <b>Chapter 8. Causal Models</b>             | <b>110</b> |
| 1. Introduction                             | 110        |
| 2. Technology-Only Models                   | 111        |
| 3. A Technoeconomic Model                   | 117        |
| 4. A Simulation Model                       | 121        |
| 5. Summary                                  | 126        |
| References                                  | 127        |
| For Further Reference                       | 127        |
| Problems                                    | 127        |
| <b>Chapter 9. Forecasting Breakthroughs</b> | <b>129</b> |
| 1. Introduction                             | 129        |
| 2. Examples of Breakthroughs                | 130        |
| A. Atomic Energy                            | 130        |
| B. The Transistor                           | 133        |
| C. Penicillin                               | 133        |
| 3. Monitoring for Breakthroughs             | 134        |
| 4. Where to Look for Signals                | 136        |
| 5. An Example                               | 138        |
| 6. Summary                                  | 142        |
| References                                  | 142        |
| For Further Reference                       | 143        |
| Problems                                    | 143        |
| <b>Chapter 10. Combining Forecasts</b>      | <b>145</b> |
| 1. Introduction                             | 145        |
| 2. Trend and Growth Curves                  | 145        |
| 3. Trend and Analogy                        | 146        |
| 4. Components and Aggregates                | 147        |
| 5. Scenarios                                | 148        |
| 6. Cross Impact Models                      | 150        |
| 7. Summary                                  | 155        |

| <b>Chapter 14. Technological Forecasting in Business Decision</b>                      | <b>192</b> |
| 1. Introduction  | 192        |
| 2. What Business Are We In?  | 193        |
| 3. Business Planning for Technological Change  | 195        |
| 4. Secondary Impacts   | 199        |
| 5. Summary   | 200        |
| For Further Reference  | 200        |
| Problems   | 201        |

|   |            |
|---|------------|
| <b>Chapter 15. Technological Forecasting<br/>in Government Planning</b> | <b>202</b> |
| 1. Introduction   | 202        |
| 2. Internal Operations of Government                                    | 202        |
| 3. Regulatory Agencies  | 204        |
| 4. Public Goods   | 207        |
| 5. Changes in the Form of Government                                    | 210        |
| 6. Summary  | 212        |
| For Further Reference   | 212        |
| Problems  | 213        |
| <b>Chapter 16. Technology Assessment</b>                                | <b>215</b> |
| 1. Introduction   | 215        |
| 2. Some Historical Cases  | 216        |
| 3. The Role of Technological Forecasting                                | 221        |
| 4. An Example   | 222        |
| 5. Summary  | 224        |
| For Further Reference   | 225        |
| Problems  | 225        |
| <b>Chapter 17. Some Common Forecasting Mistakes</b>                     | <b>226</b> |
| 1. Introduction   | 226        |
| 2. Environmental Factors That Affect Forecasts                          | 229        |
| 3. Personal Factors That Affect Forecasts                               | 235        |
| 4. Core Assumptions   | 240        |
| 5. Summary  | 246        |
| References  | 247        |
| Problems  | 247        |
| <b>Chapter 18. Evaluating Forecasts as Decision Information</b>         | <b>250</b> |
| 1. Introduction   | 250        |
| 2. The Interrogation Model  | 251        |
| 3. Summary  | 259        |
| Problems  | 259        |
| <b>Chapter 19. Presenting the Forecast</b>                              | <b>261</b> |
| 1. Introduction   | 261        |
| 2. Making the Forecast Useful   | 262        |
| 3. Making the Forecast Credible   | 271        |
| 4. A Checklist for Forecasts  | 278        |
| 5. Summary  | 281        |
