

BIOTECHNOLOGY FOR CLEAN INDUSTRIAL PRODUCTS AND PROCESSES

Towards Industrial Sustainability

ORGANISATION FOR ECONOMIC CO-OPERATION AND

TABLE OF CONTENTS

Executive Summary	7
Preface	13
<i>Chapters</i>	
1. Industrial Sustainability and the Role of Biotechnology	15
2. Current Industrial Applications of Biotechnology	29
3. Science and Technology Trends and Potential	63
4. Evaluating the Cleanliness of Biotechnological Industrial Products and Processes	87
5. Public Attitudes and Education	117
6. National and International Policies	131
7. Conclusions and Policy Implications	137
<i>Annexes</i>	
1.1. Models of Industrial Sustainability	141
1.2. Novel Clean Chemistry	143
2.1. Recent Biotechnological Developments Addressing the Needs of Process Chemistry	145
2.2. Pulp and Paper	146
2.3. Metals and Minerals	151
4.1. LCA Methodology	155
4.2. LCA Standardisation	164
4.3. Review of Life Cycle Assessments	166
4.4. Research Requirements	173
6. Policies and Legislation in Canada, Japan and Germany	179
Glossary	195
List of Participants	199
