

NUCLEAR ENERGY

PRINCIPLES, PRACTICES, AND PROSPECTS

SECOND EDITION

David Bodansky

Springer

**AIP
PRESS**

Contents

| | |
|---|----|
| Preface to the Second Edition | v |
| Preface to the First Edition | ix |
| 1 The Motivation for Nuclear Energy | 1 |
| 1.1 The Need for Energy Sources | 1 |
| 1.1.1 The Importance of Energy | 1 |
| 1.1.2 Energy Use Patterns | 2 |
| 1.1.3 The Role of Electricity | 4 |
| 1.2 Problems with Fossil Fuels | 7 |
| 1.2.1 The Need to Replace Fossil Fuels | 7 |
| 1.2.2 Limitations on Fossil Fuel Supplies | 8 |
| 1.2.3 Global Climate Change | 11 |
| 1.3 Nuclear Power as a Substitute for Fossil Fuels | 14 |
| 1.3.1 Alternatives to Fossil Fuels | 14 |
| 1.3.2 The Potential Role of Nuclear Energy | 17 |
| 1.3.3 The Example of France | 18 |
| 1.3.4 The Status of Nuclear Energy | 18 |
| References | 22 |
| 2 Nuclear Power Development | 25 |
| 2.1 Present Status of Nuclear Power | 25 |
| 2.2 Early History of Nuclear Energy | 27 |
| 2.2.1 Speculations Before the Discovery of Fission | 27 |
| 2.2.2 Fission and the First Reactors | 29 |
| 2.3 Development of Nuclear Power in the United States | 31 |
| 2.3.1 Immediate Postwar Developments | 31 |
| 2.3.2 History of U.S. Reactor Orders and Construction | 33 |
| 2.3.3 Reactor Cancellations | 36 |

| | | |
|----------|--|-----------|
| 2.4 | Trends in U.S. Reactor Utilization | 36 |
| 2.4.1 | Permanent Reactor Closures | 36 |
| 2.4.2 | Capacity Factors | 39 |
| 2.4.3 | Consolidation in the U.S. Nuclear Industry | 41 |
| 2.4.4 | Renewal of Reactor Operating Licenses..... | 41 |
| 2.5 | Worldwide Development of Nuclear Power | 42 |
| 2.5.1 | Early History of Nuclear Programs | 42 |
| 2.5.2 | Nuclear Power Since 1973 | 43 |
| 2.5.3 | Planned Construction of New Reactors..... | 45 |
| 2.6 | National Programs of Nuclear Development | 47 |
| 2.6.1 | France | 47 |
| 2.6.2 | Japan..... | 48 |
| 2.6.3 | Other Countries | 49 |
| 2.7 | Failures of Prediction | 53 |
| | References | 54 |
| 3 | Radioactivity and Radiation Exposures | 57 |
| 3.1 | Brief History | 57 |
| 3.2 | Radiation Doses | 58 |
| 3.2.1 | Radiation Exposure and Radiation Dose | 58 |
| 3.2.2 | Basic Units of Exposure and Dose | 59 |
| 3.2.3 | Effective Dose Equivalent or Effective Dose | 62 |
| 3.3 | Radioactive Decay | 63 |
| 3.3.1 | Half-life and Mean Life..... | 63 |
| 3.3.2 | Units of Radioactivity | 64 |
| 3.3.3 | Specific Activity..... | 65 |
| 3.4 | Natural Radioactivity | 66 |
| 3.4.1 | Origin of Natural Radioactivity | 66 |
| 3.4.2 | Radioactive Series in Nature | 68 |
| 3.4.3 | Concentrations of Radionuclides in the Environment ... | 70 |
| 3.5 | Survey of Radiation Exposures | 73 |
| 3.5.1 | Natural Sources of Radiation | 73 |
| 3.5.2 | Radiation Doses from Medical Procedures | 77 |
| 3.5.3 | Other Sources of Radiation | 78 |
| 3.5.4 | Summary..... | 81 |
| | References | 82 |
| 4 | Effects of Radiation Exposures | 85 |
| 4.1 | The Study of Radiation Effects | 85 |
| 4.1.1 | Agencies and Groups Carrying out Radiation Studies .. | 85 |
| 4.1.2 | Types of Studies | 86 |
| 4.1.3 | Types of Effects: Deterministic and Stochastic | 87 |
| 4.2 | Effects of High Radiation Doses | 87 |
| 4.2.1 | Deterministic Effects..... | 87 |

| | | |
|----------|---|------------|
| 4.2.2 | Stochastic Effects: Observational Evidence for Cancer at High Doses | 88 |
| 4.3 | Effects of Low Radiation Doses | 91 |
| 4.3.1 | Importance of Low Doses | 91 |
| 4.3.2 | Observational Evidence for Cancer at Low Dose Rates | 92 |
| 4.3.3 | The Shape of the Dose-Response Curve | 96 |
| 4.3.4 | Conclusions of Advisory Bodies on Low-Dose Effects | 100 |
| 4.3.5 | Genetic Effects | 104 |
| 4.4 | Radiation Standards and Health Criteria | 105 |
| 4.4.1 | Standards for the General Public | 105 |
| 4.4.2 | Standards for Occupational Exposures | 107 |
| 4.4.3 | Alternative Risk Criteria | 108 |
| 4.4.4 | Collective Doses and de Minimis Levels | 110 |
| 4.5 | Radionuclides of Special Interest | 111 |
| 4.5.1 | Radium-226 | 111 |
| 4.5.2 | Radon-222 | 112 |
| 4.5.3 | Neptunium-237 | 115 |
| | References | 118 |
| 5 | Neutron Reactions | 123 |
| 5.1 | Overview of Nuclear Reactions | 123 |
| 5.1.1 | Neutron Reactions of Importance in Reactors | 123 |
| 5.1.2 | Reaction Cross Sections | 125 |
| 5.1.3 | Neutron Reactions in Different Energy Regions | 128 |
| 5.2 | Cross Sections in the Resonance Region | 128 |
| 5.2.1 | Observed Cross Sections | 128 |
| 5.2.2 | Shape of the Resonance Peak | 130 |
| 5.2.3 | Level Widths and Doppler Broadening | 131 |
| 5.3 | Cross Sections in the Continuum Region | 132 |
| 5.4 | The Low-Energy Region | 134 |
| 5.4.1 | Low-Energy Region and the $1/v$ Law | 134 |
| 5.4.2 | Thermal Neutrons | 134 |
| | References | 136 |
| 6 | Nuclear Fission | 139 |
| 6.1 | Discovery of Fission | 139 |
| 6.2 | Simple Picture of Fission | 141 |
| 6.2.1 | Coulomb and Nuclear Forces | 141 |
| 6.2.2 | Separation Energies and Fissionability | 141 |
| 6.2.3 | Fission Cross Sections with Fast and Thermal Neutrons | 143 |
| 6.3 | Products of Fission | 144 |
| 6.3.1 | Mass Distribution of Fission Fragments | 144 |

| | | |
|----------|---|------------|
| 6.3.2 | Neutron Emission | 146 |
| 6.3.3 | Decay of Fission Fragments | 148 |
| 6.4 | Energy Release in Fission | 149 |
| 6.4.1 | Energy of Fission Fragments | 149 |
| 6.4.2 | Total Energy Budget | 150 |
| | References | 151 |
| 7 | Chain Reactions and Nuclear Reactors | 153 |
| 7.1 | Criticality and the Multiplication Factor | 153 |
| 7.1.1 | General Considerations | 153 |
| 7.1.2 | Formalism for Describing the Multiplication Factor | 155 |
| 7.1.3 | Numerical Values of Thermal Reactor Parameters | 157 |
| 7.2 | Thermalization of Neutrons | 158 |
| 7.2.1 | Role of Moderators | 158 |
| 7.2.2 | Moderating Ratio | 160 |
| 7.3 | Reactor Kinetics | 162 |
| 7.3.1 | Reactivity | 162 |
| 7.3.2 | Buildup of Reaction Rate | 162 |
| 7.4 | Conversion Ratio and Production of Plutonium in Thermal Reactors | 164 |
| 7.5 | Control Materials and Poisons | 166 |
| 7.5.1 | Reactor Poisons | 166 |
| 7.5.2 | Controls | 166 |
| 7.5.3 | Xenon Poisoning | 167 |
| | References | 168 |
| 8 | Types of Nuclear Reactors | 171 |
| 8.1 | Survey of Reactor Types | 171 |
| 8.1.1 | Uses of Reactors | 171 |
| 8.1.2 | Classifications of Reactors | 172 |
| 8.1.3 | Components of Conventional Reactors | 173 |
| 8.1.4 | World Inventory of Reactor Types | 176 |
| 8.2 | Light Water Reactors | 181 |
| 8.2.1 | PWRs and BWRs | 181 |
| 8.2.2 | Components of a Light Water Reactor | 181 |
| 8.2.3 | PWR Reactor Cores | 185 |
| 8.3 | Burners, Converters, and Breeders | 186 |
| 8.3.1 | Characterization of Reactors | 186 |
| 8.3.2 | Achievement of High Conversion Ratios in Thermal Reactors | 186 |
| 8.3.3 | Fast Breeder Reactors | 188 |
| 8.4 | The Natural Reactor at Oklo | 191 |
| | References | 192 |

| | | |
|-----------|---|-----|
| 9 | Nuclear Fuel Cycle | 193 |
| 9.1 | Characteristics of the Nuclear Fuel Cycle | 193 |
| 9.1.1 | Types of Fuel Cycle | 193 |
| 9.1.2 | Steps in the Nuclear Fuel Cycle | 195 |
| 9.2 | Front End of the Fuel Cycle | 195 |
| 9.2.1 | Uranium Mining and Milling | 195 |
| 9.2.2 | Enrichment of Uranium | 198 |
| 9.2.3 | Fuel Fabrication | 204 |
| 9.2.4 | Other Fuel Types | 205 |
| 9.3 | Fuel Utilization | 205 |
| 9.3.1 | Burnup as a Measure of Fuel Utilization | 205 |
| 9.3.2 | Uranium Consumption and Plutonium Production | 208 |
| 9.3.3 | Energy from Consumption of Fuel | 210 |
| 9.3.4 | Uranium Ore Requirement | 212 |
| 9.4 | Back End of Fuel Cycle | 213 |
| 9.4.1 | Handling of Spent Fuel | 213 |
| 9.4.2 | Reprocessing | 214 |
| 9.4.3 | Alternative Reprocessing and Fuel Cycle Candidates | 218 |
| 9.4.4 | Waste Disposal | 220 |
| 9.5 | Uranium Resources | 221 |
| 9.5.1 | Price of Uranium | 221 |
| 9.5.2 | Estimates of Uranium Resources | 222 |
| 9.5.3 | Uranium from Seawater | 225 |
| 9.5.4 | Impact of Fuel Cycle Changes and Breeder Reactors | 226 |
| | References | 227 |
| 10 | Nuclear Waste Disposal: Amounts of Waste | 231 |
| 10.1 | Categories of Nuclear Waste | 231 |
| 10.1.1 | The Nature of the Problem | 231 |
| 10.1.2 | Military and Civilian Wastes | 232 |
| 10.1.3 | High- and Low-Level Wastes | 233 |
| 10.1.4 | Inventories of U.S. Nuclear Wastes | 234 |
| 10.1.5 | Measures of Waste Magnitudes | 235 |
| 10.2 | Wastes from Commercial Reactors | 237 |
| 10.2.1 | Mass and Volume per GWyr | 237 |
| 10.2.2 | Radioactivity in Waste Products | 238 |
| 10.2.3 | Heat Production | 242 |
| 10.3 | Hazard Measures for Nuclear Wastes | 244 |
| 10.3.1 | Approaches to Examining Hazards | 244 |
| 10.3.2 | Comparisons Based on Water Dilution Volume | 245 |
| 10.3.3 | Comparisons of Activity in Spent Fuel and in Earth's Crust | 249 |
| | References | 251 |

| | | |
|-----------|--|-----|
| 11 | Storage and Disposal of Nuclear Wastes | 253 |
| 11.1 | Stages in Waste Handling | 253 |
| 11.1.1 | Overview of Possible Stages | 253 |
| 11.1.2 | Storage of Spent Fuel at Reactor Sites | 254 |
| 11.1.3 | Interim Storage of Waste or Spent Fuel at Centralized Facilities | 257 |
| 11.1.4 | Nuclear Waste Transportation | 260 |
| 11.2 | Deep Geologic Disposal | 266 |
| 11.2.1 | Multiple Barriers in Geologic Disposal | 266 |
| 11.2.2 | Alternative Host Rocks for a Geologic Repository | 267 |
| 11.2.3 | Motion of Water and Radionuclides Through Surrounding Medium | 269 |
| 11.2.4 | Thermal Loading of the Repository | 272 |
| 11.2.5 | The Waste Package | 273 |
| 11.3 | Alternatives to Deep Geologic Disposal | 277 |
| 11.3.1 | Variants of Geologic Disposal | 277 |
| 11.3.2 | Subseabed Disposal | 278 |
| 11.3.3 | Partitioning and Transmutation of Radionuclides | 281 |
| 11.3.4 | Summary of Status of Alternatives to Geologic Disposal | 285 |
| 11.4 | Worldwide Status of Nuclear Waste Disposal Plans | 285 |
| | References | 287 |
| 12 | U.S. Waste Disposal Plans and the Yucca Mountain Repository | 291 |
| 12.1 | Formulation of U.S. Waste Disposal Policies | 291 |
| 12.1.1 | Brief History of Planning Efforts | 291 |
| 12.1.2 | Organizations Involved in Waste Management Policy | 293 |
| 12.1.3 | Congressional Role in the Site-Selection Process | 296 |
| 12.2 | The Planned Yucca Mountain Repository | 297 |
| 12.2.1 | Schedule for the Yucca Mountain Project | 297 |
| 12.2.2 | Physical Features of the Site | 299 |
| 12.2.3 | The Waste Inventory | 301 |
| 12.2.4 | The Nuclear Waste Fund | 302 |
| 12.3 | Protective Barriers in Repository Planning | 303 |
| 12.3.1 | The Protection Requirement | 303 |
| 12.3.2 | Defense-in-Depth | 304 |
| 12.3.3 | Engineered Barriers | 305 |
| 12.3.4 | Natural Barriers | 308 |
| 12.3.5 | The Thermal Loading of the Repository | 311 |
| 12.4 | Total System Performance Assessments | 312 |
| 12.4.1 | The TSPA Approach | 312 |
| 12.4.2 | The DOE Nominal Scenario | 316 |
| 12.4.3 | Disruptive Scenarios | 320 |
| 12.4.4 | EPR1's TSPA Calculations | 324 |

| | | |
|-----------|---|------------|
| 12.5 | Resolving Questions About the Repository Performance | 326 |
| 12.5.1 | Evaluations of Yucca Mountain Analyses | 326 |
| 12.5.2 | Continuing Technical Issues | 329 |
| 12.5.3 | Further Institutional Measures | 330 |
| 12.5.4 | Overview of Yucca Mountain Prospects | 331 |
| | References | 332 |
| 13 | Policy Issues in Nuclear Waste Disposal | 337 |
| 13.1 | The Importance of the Nuclear Waste Disposal Issue | 337 |
| 13.1.1 | The Centrality of the Issue | 337 |
| 13.1.2 | General Considerations in Nuclear Waste Disposal | 338 |
| 13.2 | EPA Standards for Nuclear Waste Disposal | 339 |
| 13.2.1 | The Original Formulation of 40CFR191 | 339 |
| 13.2.2 | The ¹⁴ C Problem | 340 |
| 13.2.3 | The Overturn of 10CFR191 | 342 |
| 13.2.4 | The NAS Recommendations | 342 |
| 13.2.5 | EPA's 2001 Standards: 40CFR197 | 344 |
| 13.3 | Responsibilities to Future Generations | 347 |
| 13.3.1 | The General Recognition of the Problem | 347 |
| 13.3.2 | Picture of Future Generations | 349 |
| 13.3.3 | Discounting with Time | 351 |
| 13.4 | Special Issues in Considering Waste Disposal | 353 |
| 13.4.1 | The Decision-Making Process | 353 |
| 13.4.2 | Technological Optimism and Its Possible Traps | 357 |
| 13.4.3 | A Surrogate Issue? | 358 |
| 13.5 | Possible Approaches to Nuclear Waste Disposal | 359 |
| 13.5.1 | A Step-by-Step Approach | 359 |
| 13.5.2 | Framework for Considering Intergenerational Responsibilities | 362 |
| 13.5.3 | Putting the Risks into Perspective | 363 |
| | References | 367 |
| 14 | Nuclear Reactor Safety | 371 |
| 14.1 | General Considerations in Reactor Safety | 371 |
| 14.1.1 | Assessments of Commercial Reactor Safety | 371 |
| 14.1.2 | The Nature of Reactor Risks | 372 |
| 14.1.3 | Means of Achieving Reactor Safety | 374 |
| 14.1.4 | Measures of Harm and Risk in Reactor Accidents | 377 |
| 14.2 | Accidents and their Avoidance | 379 |
| 14.2.1 | Criticality Accidents and Feedback Mechanisms | 379 |
| 14.2.2 | Heat Removal and Loss-of-Coolant Accidents | 381 |
| 14.3 | Estimating Accident Risks | 383 |
| 14.3.1 | Deterministic Safety Assessment | 383 |
| 14.3.2 | Probabilistic Risk Assessment | 384 |
| 14.3.3 | Results of the Reactor Safety Study | 389 |

| | | |
