Introduction	ix
Economics and natural-resource scarcity	ix
Towards an economics of sustainable development	xv
1. Historical Approaches to Natural-Resource Scarcity	1
Malthusian and Ricardian scarcity	1
Smith, Malthus and Ricardo	4
Mill, Jevons and Marshall	11
The special case of Marx	19
<i>Conclusion:</i> The modern conventional view	22
<i>Appendix:</i> The Malthus-Ricardo theory of diminishing returns	26
2. Non-Economic Influences	34
Conservationism	34
Ecology	38
Thermodynamics	51
<i>Summary and conclusion:</i> Towards an alternative view	55
3. Conventional Theory: Optimal Rates of Depletion	62
Conventional theories of natural-resource scarcity	62
Exhaustible resources	63
Renewable resources	66
<i>Summary and conclusion</i>	70
4. Conventional Theory: Pollution and Natural Environments	75
Pollution as an externality	75
Optimal pollution control: charges versus standards	78

	The preservation of natural environments over time	81
	<i>Summary and conclusion</i>	84
5.	An Alternative View Of Natural-Resource Scarcity	92
	An alternative view of natural-resource scarcity	93
	A theoretical model	100
	Wider implications: Technology, tastes and time	105
	<i>Summary and conclusion</i>	109
	<i>Appendix: A model of economic-environmental interaction</i>	110
6.	Two Examples: Deforestation in Amazonia and the Global Greenhouse Effect	120
	Deforestation in Amazonia	120
	<i>Summary and conclusion</i>	132
	The global greenhouse effect	133
	<i>Summary and conclusion</i>	152
7.	Upper Watershed Degradation in Java	160
	On- and off-site effects	161
	Incentives for soil conservation	163
	Economic policies and investment strategies	167
	<i>Summary and conclusion</i>	178
8.	Conclusion: An Economics of Sustainable Development	184
	Some definitions and conditions	184
	Sustainable development and advanced economies	189
	Sustainable development and developing economies	192
	<i>Summary and conclusion</i>	204
	<i>Appendix: A model of optimal sustainable economic growth</i>	205
	Index	217
