# Pricing and Output Decisions

## John Arnold Lecturer in Accounting University of Manchester

# Accountancy Age Books

#### Contents

#### Preface

#### Introduction

### 1 A Framework for Decision Making 1

- 1.1 The Need for a Theory of Decision Making
- 1.2 The Contribution of the Economist
- 1.3 Risk and Uncertainty
- 1.4 The Use of Models in Decision Making
- 1.5 A General Decision Model

#### 2 The Development of a Decision Model

- 2.1 A Business Decision Model
- 2.2 The Business Decision Model and 'Profit Maximisation'
- 2.3 Objectives in the Private Sector
- 2.4 The Conventional Accounting Approach
- 2.5 Restrictions on the Scope of the Study

#### **3** Principles of Cost Evaluation

- 3.1 Basic Principles of Cost Evaluation
- 3.2 The Concept of Opportunity Cost
- 3.3 A Comparison with the Conventional Accounting Approach

#### PRICING AND OUTPUT DECISIONS

55

73

85

#### 4 Cost Behaviour

- 4.1 Patterns of Cost Behaviour
- 4.2 Fixed Costs and the Contribution Approach
- 4.3 A Further Example of the Contribution Approach

#### 5 Cost Estimation

- 5.1 The Prediction of Costs
- 5.2 Statistical Cost Estimation : Linear Regression
- 5.3 The Coefficient of Correlation
- 5.4 Advantages and Limitations of Cost Prediction by Linear Regression

#### 6 Cost-Volume-Profit Analysis

- 6.1 Cost-Volume-Profit Relationships
- 6.2 The Economist's Approach
- 6.3 Break-even Analysis and Flexible Budgeting
- 6.4 Multi-product Firms

#### 7 Decision Making with Scarce 99 Resources: Linear Programming

- 7.1 Internal Opportunity Cost
- 7.2 The Situation with One Scarce Resource
- 7.3 The Situation with More than One Scarce Resource
- 7.4 Linear Programming : Formulation
- 7.5 Linear Programming: Solution
- 7.6 Limitations and Assumptions of Linear Programming

#### 8 Dual Prices

- 8.1 Internal Opportunity Cost with Two or More Scarce Resources
- 8.2 Interpretation of Dual Prices
- 8.3 Limitations of Dual Prices
- 8.4 Applications of Dual Prices

#### 9 Pricing Problems

- 9.1 The Economist's Basic Pricing Model
- 9.2 The Cost-plus Formula for Pricing
- 9.3 Minimum Price Setting
- 9.4 Optimal Price Setting

#### 10 Some Specialised Analytical Models

- 10.1 Decision Trees
- 10.2 Dynamic Programming
- 10.3 Critical Path Analysis
- 10.4 Inventory Control

#### 11 Conclusion

- 11.1 A Brief Review
- 11.2 Control

ŧ

Ì

- 11.3 Behavioural Effects of Budgets
- 11.4 Simulation
- 11.5 General Limitations Reviewed
