Functional Programming, Concurrency, Simulation and Automated Reasoning

International Lecture Series 1991-1992
McMaster University, Hamilton, Ontario, Canada
## Contents

On the Use of Theory Based Systems to Traverse Educational Gaps in Computer Related Activities ........................................ 1
*Peter E. Lauer*

Reflections on Standard ML ................................................................. 32
*David B. MacQueen*

An Introduction to the High-Level Language Standard ML ................ 47
*John Ophel*

Generating an Algorithm for Executing Graphical Models .................. 71
*Jawahar Malhotra and Robert M. Shapiro*

Modeling a NORAD Command Post Using SADT and Colored Petri Nets ..... 84
*Robert M. Shapiro, Valerio O. Pinci and Roberto Mameli*

Propositional Temporal Logics and Their Use in Model Checking .......... 108
*Jeffery Zucker*

The Propositional $\mu$-Calculus and Its Use in Model Checking .......... 117
*Jeffery Zucker*

Analyzing Concurrent Systems Using the Concurrency Workbench .......... 129
*Rance Cleaveland*

Reasoning About Functional Programs in Nuprl ................................. 145
*Douglas J. Howe*

Concurrent ML: Design, Application and Semantics ............................ 165
*John H. Reppy*

A Taste of Rewrite Systems ............................................................... 199
*Nachum Dershowitz*

Programming in OBJ and Maude .......................................................... 229
*Tim Winkler*

Supporting the Attribute Grammar Programming Paradigm in a Lazy Functional Programming Language ............................. 278
*R.A. Frost and S. Karamatos*

Specification and Simulation with ExSpect ........................................ 296
*K.M. van Hee, P.M.P. Rambags and P.A.C. Verkoulen*

An Overview of Larch ................................................................. 329
*Stephen J. Garland, John V. Guttag and James J. Horning*

The EVES System ............................................................................. 349
*Sentot Kromodimoeljo, Bill Pase, Mark Saaltink, Dan Craigen and Irwin Meisels*

A Systolizing Compilation Scheme for Nested Loops with Linear Bounds ...... 374
*Michael Barnett and Christian Lengauer*
