

Appropriate Sanitation Alternatives

A Planning and Design Manual

John M. Kalbermatten, DeAnne S. Julius,
Charles G. Gunnerson, and D. Duncan Mara

Published for The World Bank
The Johns Hopkins University Press
Baltimore and London

Contents

Foreword	ix	<i>Part Two. Sanitation Program Planning</i>	
Preface	xi	5. Comparison of Sanitation Technologies	39
Acronyms and Abbreviations	xiii	Water Supply Service Levels	39
1. An Overview	3	Soil Conditions	42
Dimensions of the Problem	3	Housing Density	42
The Constraints	4	Costs	43
Incremental Sanitation	4	Other Factors	44
Sanitation Program Planning	5	Environmental Factors Affecting Choice of Technology	45
<i>Part One. Socioeconomic Aspects of Sanitation Program Planning</i>		Institutional Constraints	45
2. Health Aspects of Sanitation	11	6. Selection of Sanitation Technologies	46
A Southeast Asian Family	11	Selection Algorithms	46
A North African Family	13	Postselection Questions	51
Excreted Infections	15	7. Sanitation Upgrading Sequences	52
Environmental Classification of Excreted Infections	17	Composting Toilets	52
Health Benefits of Sanitation Improvements	20	Three-Stage Septic Tanks	52
Excreted Infections and Children	21	Vault Toilets	52
Groundwater Pollution from On-site Excreta Disposal	21	VIP Latrines and ROEC's	55
3. Community Participation	23	PF Toilets	55
Characteristics of Community Participation	23	Sample Staged Solutions	55
Institution-Community Linkage	25	<i>Part Three. Sanitation Technology Options</i>	
4. Economic Analysis of Sanitation Technologies	27	8. Latrine and Toilet Superstructures	61
Economic Costing	27	9. Latrine and Toilet Fixtures	64
Financial Costing	31	Squatting Plates for VIP Latrines	64
Costing of Community Support Services	32	Squatting Plates for ROEC's	66
Appendix. Examples of Economic Costing	32	Pedestal Seats for VIP Latrines and ROEC's	66
		Squatting Plates for Composting, PF, and Vault Toilets	69
		Pedestal Seats for PF and Vault Toilets	72
		10. VIP Latrines	73
		VIP Latrines	73
		ROEC's	77
		Pit Design	77
		Factors Affecting Suitability	81

11. Composting Toilets	83	Bibliography	153
Continuous Composting Toilets	83	Index	157
Batch Composting Toilets	83		
Vault Design	87	Figures	
Factors Affecting Suitability	88	1-1. Recommended Structure of Feasibility Studies for Sanitation Program Planning	6
12. PF Toilets	89	5-1. Generic Classification of Sanitation Systems	40
PF Toilet Design	89	6-1. First-stage Algorithm for Selection of Sanitation Technology	47
Factors Affecting Suitability	91	6-2. Second-stage Algorithm for Selection of Sanitation Technology	48
Sewered PF Systems	91	6-3. Third-stage Algorithm for Selection of Sanitation Technology	49
13. Aquaprivies	94	7-1. Potential Sanitation Sequences	53
Technical Appropriateness	94	7-2. Sample Sanitation Sequences	54
Self-topping or Sullage Aquaprivy	99	8-1. Alternative Materials for Latrine Superstructures	62
Tank Design	99	9-1. Concrete Squatting Plate	65
Factors Affecting Suitability	100	9-2. Tanzanian "Flap-trap" Design for VIP Latrines and DVC Toilets	66
14. Septic Tanks, Soakaways, and Drainfields	101	9-3. Pedestal Seats for Dry Latrines and Chute Designs for ROEC's	67
Effluent Disposal	101	9-4. Water-seal Squatting Plate for PF Toilets Located Immediately above the Pit	68
Technical Appropriateness	104	9-5. Galvanized Sheet-metal Water-seal Unit for PF Toilets Located Immediately above the Pit	69
Factors Affecting Suitability	107	9-6. Plastic or Fiberglass Water-seal Toilet	70
15. Conventional Sewerage	109	9-7. PF Units for Displaced Pits	71
Excreta Disposal	109	10-1. Conventional Unimproved Pit Latrine	74
Sewage Collection	109	10-2. VIP Latrine	75
16. Small-bore Sewers	114	10-3. VIPD Latrine	76
Technical Appropriateness	114	10-4. ROEC	78
Design Criteria	114	10-5. Alternative Pit Designs	80
17. Bucket Latrines	116	11-1. "Multrum" Continuous-composting Toilet	84
18. Vault and Cartage Systems	118	11-2. DVC Toilet Used in Vietnam	85
Design Criteria	118	11-3. DVC Toilets	86
Factors Affecting Suitability	120	12-1. Alternative Designs for PF Toilets	90
19. Communal Sanitation Facilities	122	12-2. PF Toilet-Septic-tank Systems	92
Effluent Disposal	122	13-1. Conventional Aquaprivy	95
Design Criteria	122	13-2. Formal Equivalence of Sullage Aquaprivy to VIP Latrine with Separate Sullage Soakaway or to PF Toilet	96
20. Disposal and Treatment of Sullage	125	13-3. Formal Equivalence of Sewered Aquaprivy to Sewered PF Toilet	97
Sullage Volume and BOD	125		
Health Aspects	126		
Design Criteria	126		
21. Off-site Treatment	128		
Waste Stabilization Ponds	128		
Night-Soil Treatment Ponds	133		
Thermophilic Composting	133		
Appendix. Examples of Waste Treatment Calculations	135		
22. Resource Recovery	145		
Agricultural Reuse	145		
Aquacultural Reuse	148		
Biogas Production	151		
Social, Institutional, and Economic Aspects of Reuse	151		

13-4. Improved Sewered Aquaprivy with Sullage Disposal	98
14-1. Schematic of Conventional Septic Tank	102
14-2. Alternative Septic Tank Designs	103
14-3. Schematic of Soakaway	104
14-4. Drainfield for Septic Tank Effluent	105
14-5. Evapotranspiration Mounds	106
15-1. Influence of Time and Temperature on Selected Pathogens in Night Soil and Sludge	112
17-1. Bucket Latrine and Cartage	117
18-1. Alternative Designs for Vault Toilets	119
19-1. Schematic of a Communal Sanitation Facility	123
20-1. Improved Stormwater Channels for Drainage of Sullage	127
21-1. Stabilization Pond Layout and Details	129
21-2. Inlet Structures for Stabilization Ponds	130
21-3. Alternative Interpond Connections	131
21-4. Outlet Structures for Stabilization Ponds	132
21-5. Beltsville Agricultural Research Center (BARC) System for High-rate Thermophilic Composting	134
21-6. Alternative Flow Diagrams for Composting Night Soil by BARC System	138
22-1. Reuse Potential of Wastes	146
22-2. Schematic of Typical Biogas Digesters	150

Tables

2-1. Viral, Bacterial, and Protozoan Pathogens Found in Excreta	12
2-2. Helminthic Pathogens Found in Feces	13
2-3. Environmental Classification of Excreted Infections	18
4-1. Annual Economic Costs of a Ventilated Improved Pit (VIP) Latrine	33
4-2. Shadow-priced Collection and Treatment Costs of a Conventional Sewerage Scheme Constructed over Five Years	33
4-3. Costs and Wastewater Flows for Conventional Sewerage Scheme	34
4-4. Present Values (PV) of Costs and Wastewater Flows for Conventional Sewerage Scheme	34
5-1. Descriptive Comparison of Sanitation Technologies	41
5-2. Summary of Annual Economic Costs per Household	43
6-1. Critical Information Needed for Selection and Design of Sanitation Systems	50
7-1. Costs of Sample Sanitation Sequences	56
14-1. Minimum Required Distances from Various Physical Features for Septic Tanks and Soakaways Located in Common Well-developed Soils	104
16-1. Slopes and Capacities of Circular Pipes Flowing Full	115
21-1. Equipment Needed for Night-Soil Composting	143
