<b>Symbols</b>	<b>xiii</b>
<b>PART I BASIC CONSIDERATIONS</b>	<b>1</b>
<b>One Introduction</b>	<b>3</b>
1.1 Need for Control of Seepage	3
1.2 Examples of Drainage Failures Caused by Piping	6
1.3 Examples of Failures Caused by Uncontrolled Saturation and Seepage Forces	10
1.4 How Can Seepage Failures Be Prevented?	13
1.5 Degree of Conservatism Needed	18
1.6 Scope of This Work	19
1.7 Conclusions	20
References	20
<b>Two Permeability</b>	<b>22</b>
2.1 General Considerations	22
2.2 Coefficient of Permeability	25
2.3 Factors Influencing Permeability	28
2.4 Indirect Methods for Determining Permeability	42
2.5 Laboratory Methods for Determining Permeability	43
2.6 Field Methods Which Depend on Pumping or Changing the Head in Holes	47
2.7 Field Methods Which Depend upon Seepage Velocities	86
References	92
<b>Three Seepage Principles</b>	<b>94</b>
3.1 Darcy's Law	94
3.2 Flow Nets	98
	ix

	3.3 Seepage Quantities	113
	3.4 Seepage Forces and Uplift Pressures	116
	3.5 Moving Saturation Lines	133
	References	146
<b>Four</b>	<b>Flow Net Construction</b>	<b>148</b>
	4.1 Introduction	148
	4.2 General Suggestions	149
	4.3 Types of Flow Nets	150
	4.4 Confined Flow Systems (Phreatic Line Known)	151
	4.5 Unconfined Flow Systems (Phreatic Line Unknown)	158
	4.6 Composite Sections with Phreatic Line Unknow	162
	Supplemental Reading	169
	References	170
<b>PART II</b>	<b>APPLICATIONS</b>	<b>171</b>
<b>Five</b>	<b>Filter Design</b>	<b>173</b>
	5.1 Basic Requirements of Filters and Drains	173
	5.2 Prevention of Piping	174
	5.3 Examples of Filter Designs to Prevent Piping	179
	5.4 Permeability Requirements of Filters and Drains	184
	5.5 Examples of the Use of Darcy's Law in Designing Drains	189
	5.6 Examples of the Use of Flow Nets in Designing Drains	193
	5.7 Darcy's Law Nomograph	199
	5.8 Specifications for Filters and Drains	204
	References	206
<b>Six</b>	<b>Seepage Control in Earth Dams and Levees</b>	<b>208</b>
	6.1 General	208
	6.2 Seepage Control by Methods That Reduce Quantity	212
	6.3 Seepage Control by Drainage Methods	229
	6.4 Effective Drainage and Earthquake Resistance	247
	6.5 Nonsteady Seepage in Dams and Levees	250
	6.6 Summary	254
	Supplemental Reading	254
	References	254

<b>Seven</b>	<b>Foundations</b>	<b>256</b>
	7.1 Construction Dewatering	256
	7.2 Foundation Improvement by Drainage	276
	References	297
<b>Eight</b>	<b>Slope Stabilization with Drainage</b>	<b>299</b>
	8.1 General Considerations	299
	8.2 Influence of Important Conditions on Slope Stability	311
	8.3 Drainage Methods for Stabilizing Slopes	326
	8.4 Influence of Soil and Geological Details on Drainage	340
	8.5 General Conclusions	343
	References	344
<b>Nine</b>	<b>Roads, Airfields, and Other Surface Facilities</b>	<b>346</b>
	9.1 Importance of Protecting Paved Areas from Water	346
	9.2 Physical Factors Compounding the Problem of Draining Pavements and Other Surface Facilities	348
	9.3 The Basic Solutions	356
	9.4 Roadbed Drainage	360
	9.5 Airfield Drainage	380
	9.6 Miscellaneous	390
	Supplemental Reading	398
	References	398
<b>Ten</b>	<b>Structural Drainage</b>	<b>400</b>
	10.1 Problems of Structures Caused by Water	400
	10.2 Retaining Structures	402
	10.3 Partially Submerged Structures	412
	10.4 Masonry Dams	429
	10.5 Storage Reservoirs	438
	10.6 Overflow Weirs and Spillway Chutes	446
	References	466
