

Materials Chemistry

An Emerging Discipline

Leonard V. Interrante, EDITOR
Rensselaer Polytechnic Institute

Lawrence A. Caspar, EDITOR
University of Wisconsin—Madison

Arthur B. Ellis, EDITOR
University of Wisconsin—Madison

Developed from a symposium sponsored
by the Division of Industrial and Engineering Chemistry, Inc.,
at the 204th National Meeting
of the American Chemical Society,
Washington, D.C.,
August 23–28, 1992

American Chemical Society, Washington, DC 1995

CONTENTS

Preface	xv
----------------------	-----------

THE SOCIETAL AND EDUCATIONAL CONTEXT

1. Government, Academic, and Industrial Issues	3
Critical Technologies and U.S. Competitiveness: The Materials Connection.....	4
Robert M. White	
Materials Science and Engineering for the 1990s: A National Academies Study.....	12
Praveen Chaudhari	
The National Science Foundation's Program in Materials Science: New Frontiers, New Initiatives, New Programs, and New Prospects	18
Kenneth G. Hancock	
Development and Commercialization of Advanced-Performance Materials.....	28
Mary L. Good	
Partnerships with Universities.....	37
Mark Wrighton	
2. Educational Issues	43
Materials Education for and by Chemists	44
Rustum Roy	
Industrial Perspective on Materials Chemistry Education.....	55
Glen H. Pearson	
Funding Opportunities for Materials Science Education	60
C. T. Sears and S. H. Hixson	
Chemistry of Materials Courses at Rensselaer Polytechnic Institute	62
Gary E. Wnek and Peter J. Ficalora	
New Curricular Materials for Introducing Polymer Topics in Introductory Chemistry Courses.....	66
John P. Droske	
General Chemistry as a Curriculum Pressure Point: Development of <i>Teaching General Chemistry: A Materials Science Companion</i>	71
Arthur B. Ellis	
How Scientists and Engineers Can Enhance Science Education in Grades K-12	76
Kenneth H. Eckelmeyer	

SELECTED RESEARCH TOPICS

3. New Directions in the Design of Lithographic Resist Materials: A Case Study.....	85
Elsa Reichmanis and Larry F. Thompson	
4. High-Conductivity, Solid Polymeric Electrolytes.....	107
Michael S. Mendolia and Gregory C. Farrington	
5. Preceramic Polymers: Past, Present, and Future.....	131
Dietmar Seyferth	
6. Molecular Magnets: An Emerging Area of Materials Chemistry.....	161
Joel S. Miller and Arthur J. Epstein	
7. Optimization of Microscopic and Macroscopic Second-Order Optical Nonlinearities.....	189
Seth R. Marder	
8. Materials Chemistry of Organic Monolayer and Multilayer Thin Films.....	211
Christine M. Bell, Huey C. Yang, and Thomas E. Mallouk	
9. Orientation-Dependent NMR Spectroscopy as a Structural Tool for Layered Materials.....	231
Mark E. Thompson, David A. Burwell, Charlotte F. Lee, Lori K. Myers, and Kathleen G. Valentine	
10. Nanoscale, Two-Dimensional Organic-Inorganic Materials.....	259
E. Giannelis	
11. Nanoporous Layered Materials.....	283
Thomas J. Pinnavaia	
12. Catalytic Materials.....	301
Bruce C. Gates	
13. Molecular Sieves for Air Separation.....	321
John N. Armor	
14. Nanomaterials: Endosemiconductors and Exosemiconductors.....	335
Geoffrey A. Ozin	
15. Molecule-Based Syntheses of Extended Inorganic Solids.....	373
Michael L. Steigerwald	
16. Organometallic Chemical Vapor Deposition of Compound Semiconductors: A Chemical Perspective.....	397
Klavs F. Jensen	

17. Interfaces, Interfacial Reactions, and Superlattice Reactants	425
Thomas Novet, David C. Johnson, and Loreli Fister	
18. Oxide Superconductors	471
Arthur W. Sleight	
19. Characterization of Complex Materials by Scanning Tunneling Microscopy: A Look at Superconductors with High Critical Temperatures	479
Zhe Zhang and Charles M. Lieber	
20. Biomimetic Mineralization	509
Patricia A. Bianconi	
21. Inorganic Biomaterials	523
Larry L. Hench	

INDEXES

Author Index.....	551
Affiliation Index.....	551
Subject Index	552
