Introduction	
H. W. DE JONG	xi
I. Market structures in the European Economic Community	
HENK WOUTER DE JONG	1
1. Market structure: principles	1
2. Overall concentration or inter-market competition	3
3. Sectors and product markets: intra-market competition	8
4. The dynamics of market structure	14
5. Some central concepts	18
6. Routes to increased combination of firms	28
7. Conclusion	37
II. Oil refineries and petrochemical industries: moving into maturity	
WIM MOLLE	41
1. Introduction	41
2. General features	41
3. Oil refining	48
4. Petrochemicals	54
5. Conclusions	59
III. Hard-coal mining: a divided and protected market	
HANS OTTO LENEL	61
1. Early history of European coal-mining	61
2. Long-term developments in the coal industry	64
3. Economic measures and their influence	70
4. The present structure and future prospects	74
IV. The steel industry: a crisis of adaptation	
PETER OBERENDER and GEORG RÜTER	81
1. Introduction	81
2. Institutional frame work	81
3. Market structure	83
4. The development of the European steel industry since 1953	88
5. Policy conclusions	95

V.	The paper industry in the European Economic Community	
	ROBERTO ZAVATTA	105
	1. Introduction	105
	2. Basic characteristics	106
	3. Structure	109
	4. Conduct	115
	5. Performance	119
	6. Public policy	121
VI.	The food and drinks industry: large firm strategies	
	REMO LINDA	127
	1. Introduction	127
	2. Salient features of f.d.t. mega-firms' strategies	127
	3. Market structures	131
	4. The strategies: goals and means	136
	5. Strategies of external growth	141
	6. Public policies	151
VII.	Evolutionary aspects of the European brewing industry	
	MARIA BROUWER	157
	1. Introduction and early history	157
	2. Production and consumption of beer in some EEC countries	159
	3. International competition	160
	4. Structural changes in the industry	163
	5. Explanation for the evolution of market structure	165
	6. The effects of vertical integration on competition	170
	7. Product differentiation	171
	8. The process of industrialization reconsidered	176
	9. The effects of variety	177
	10. Profitability	179
VIII.	The European textile industries: widely varying structures	
	BENOÎT BOUSSEMART and JACQUES DE BANDT	183
	1. The evolution of the structure of the European textiles industries	185
	2. Typologies of the observed structural evolutions	196
	3. How are the structural transformations to be explained?	201
	4. Conclusion	205
IX.	The pharmaceutical industry: structure, intervention and competitive strength	
	PETER DE WOLF	211
	1. Introduction	211
	2. Characteristics of the demand for prescription drugs	213
	3. Market structure	214
	4. Research and innovation	221
	5. Drug prices and price policies	225
	6. Parallel imports	231

7. Generic pharmaceuticals	232
8. Performance and competitive strength of the European pharmaceutical industry	236
9. European integration	240
X. Motor-cars: between growth and protectionism	
HARTMUT BERG	245
1. The uneasy triangle of competition policy	245
2. The fifties: a period of peaceful coexistence	249
3. The sixties: rapid growth and increasing competition	255
4. The seventies and the eighties: new challenges – unsolved problems	258
5. Perspectives of international competitiveness – the threat of protectionism	262
XI. The European domestic appliance industry, 1945–1987	
PATRIZIO BIANCHI and LUIGI FORLAI	269
1. Introduction	269
2. Oligopoly, barriers to entry, differentiation	270
3. The first period of stability (1945–1958)	275
4. The period 1958–1964	277
5. The period 1964–1970	279
6. The second period of stability (1970–1982)	284
7. The second period of reorganisation (1982 onwards)	291
8. Conclusions	294
XII. Telecommunications: an industry in transition	
ANNEMIEKE J. ROOBEEK	297
1. Introduction	297
2. The telecommunications industry in transition: an overview	298
3. Telecommunications: the structure of an internationalising industry	301
4. The impact of new technologies	307
5. Changing regulatory environment in Europe	312
6. The structure of the European telecommunications equipment industry	316
7. European consortia to survive the telecommunications battle	321
8. The paradox of liberalisation: higher concentration	324
XIII. Aerospace: the political economy of an industry	
KEITH HARTLEY	329
1. Introduction	329
2. The market	329
3. The economics of aerospace industries	332
4. Structure and performance	339
5. Collaboration	346
6. Conclusion	352

XIV. Public enterprise: criteria and cases	
WILLIAM G. SHEPHERD	355
1. Actual public enterprise: extent, trends and origins	356
2. Concepts of public enterprise	363
3. Regulatory and anti-monopoly policies	371
4. Experience with public enterprises	374
Index	389
