1	X Objectives and Strategy	1
	1.1 Our Objective and Its Context	1
	1.2 The Product's Marketing System	1
	1.3 Our Model-Building Strategy	3
	1.4 The Need for Coding	5
	1.5 Organization of the Study	5
2	X The Data	8
	2.1 Introduction	8
	2.2 The Audit	8
	2.3 Coding Procedures and Initial Variable Definitions	11
	X 2.4 Summary	17
3	X Single-Equation Analysis	18
	3.1 Introduction	18
	3.2 Logical Flow of the Analysis	19
	3.3 A Methodological Comment on the Single- Equation Variable Specifications	19
	X 3.4 Initial Formulation of the Model	22
	X 3.5 Store Differences in Response	30
	X 3.6 Reformulating the Model	39
	3.7 Concluding Comment	42
4	Theory of the Multiple-Equation Model	44
	4.1 Introduction	44
	4.2 Promotional Interaction	45
	4.3 Definition of the Multiple-Equation System	50
	4.4 Estimation Methods for the Multiple-Equation Model	62
	X Appendix 4A	65
	Matrix Representation of the Multiple-Equation Model	
	Appendix 4B	66
	The Instrumental Variables Estimating Procedure	
5	Experiments with the Multiple-Equation Model	69
	5.1 Introduction	69
	5.2 Empirical Comparison of Least Squares and Instrumental Variables Estimation	69
	5.3 An Alternative Set of Y-Summary Variable Definitions	73
	5.4 Time Trend and AD-NPL Interaction Experiments	75
	5.5 Absolute AD-Price Definitions	80
	X 5.6 The Final Multiple-Equation Model	84

6	Results of the Multiple-Equation Analysis	87
	× 6.1 Introduction	87
	× 6.2 Predictive Efficacy	87
	× 6.3 Structure: Main Effects	91
	6.4 Reduced Form Analysis	109
	6.5 Concluding Statement	116
7	Results of the Residuals Analysis	117
	× 7.1 Introduction	117
	× 7.2 Needed: A “Cleaner” Measure of Sales	118
	7.3 Method of Analysis	120
	7.4 Results	122
	7.5 Concluding Statement	130
8	Simulation of Promotional Effects	132
	× 8.1 Overview of the Model	132
	8.2 Detailed Description of the Simulation	138
	8.3 Technical Considerations	162
	× 8.4 Conclusions	171
