1.	<b>INTRODUCTION</b>	13
1.1	Background	13
1.2	Workplace assessment	14
1.3	Purpose of this book	14
1.4	Structure of the book	16
2.	<b>BENEFITS OF WORKPLACE ASSESSMENT</b>	19
2.1	Introduction	19
2.2	Legal context	21
2.3	Costs of workplace assessment	22
2.4	Benefits for companies	23
2.5	Additional benefits for workers	28
3.	<b>BASICS AND FUNDAMENTALS</b>	31
3.1	Introduction	31
3.2	What is workplace assessment?	32
3.3	National context	34
3.4	Goals	35
3.5	Types of assessments	36
4.	<b>GETTING STARTED WITH WORKPLACE ASSESSMENT</b>	49
4.1	Introduction	49
4.2	Selecting goals and specifying outcomes	50
4.3	Persons involved	52
4.4	Workers' participation	55
4.5	Selecting scope and subjects	62
4.6	Setting up criteria	63
4.7	Planning	66
4.8	Follow-up	66

5.	<b>CARRYING OUT WORKPLACE ASSESSMENTS</b>	67
5.1	Introduction	67
5.2	Collecting information	67
5.3	Evaluating results	78
5.4	Selection of priorities	83
5.5	Action planning	90
6.	<b>IMPROVING PERFORMANCE</b>	93
6.1	Introduction	93
6.2	Measurement and review	94
6.3	The management cycle	98
6.4	Introducing safety and health management	102
6.5	Investigating performance: the audit	106
7.	<b>SUMMARY AND GUIDELINES</b>	109
8.	<b>GLOSSARY</b>	113
9.	<b>REFERENCES AND FURTHER READING</b>	117

	<b>LIST OF FIGURES</b>	67
		67
	Figure 1.1 Structure of the book.	67
	Figure 2.1 Factors which prompted health actions. survey in seven EU countries.	78
	Figure 2.2 The benefits of health actions. Results from seven EU countries.	83
	Figure 2.3 Spectrum of occupational safety and health.	90
	Figure 3.1 Inspection of working situations according to Grundmethodik Gefährdungsanalyse, general overview of the instrument and visualisation.	93
	Figure 3.2 Inspection of working situations according to Grundmethodik Gefährdungsanalyse, general checklist.	94
	Figure 3.3 Inspection of working situations according to Grundmethodik Gefährdungsanalyse, detailed structure.	98
	Figure 3.4 Importance of knowledge about real working situations.	102
	Figure 3.5 Knowledge of reference situations in the project.	106
	Figure 3.6 Model for noise assessment, starting from real situations.	109
	Figure 3.7 Assessment of stress problems, part of a project.	113
	Figure 3.8 Strategic assessments. Part of the method of evaluation of working conditions.	117
	Figure 4.1 Schematic outline of a workplace assessment.	
	Figure 4.2 Organization of activities for workplace assessment according to the 'internal control' principle.	
	Figure 4.3 Workgroups in redesign project at 'Le Miroir'.	
	Figure 4.4 Part of the "do it yourself" checklist for redesign of administrative work at computer screens.	
	Figure 4.5 Possible structure of the workplace assessment.	
	Figure 5.1 Part of an ergonomic observation sheet with a cycle time of less than 6 minutes.	

## LIST OF FIGURES

67	Figure 1.1	Structure of the book.	17

93	Figure 2.3	Spectrum of occupational safety and health.	29
94	Figure 3.1	Inspection of working situations according to the cascade approach: Grundmethodik Gefährdungsanalyse, general overview of the instrument and visualisation of the structure.	37
98			
102	Figure 3.2	Inspection of working situations according to the cascade approach: Grundmethodik Gefährdungsanalyse, global checklist.	38
106			
109	Figure 3.3	Inspection of working situations according to the cascade approach: Grundmethodik Gefährdungsanalyse, detailed structure.	39
113			
117	Figure 3.4	Importance of knowledge about real work in reference situations.	41
	Figure 3.5	Knowledge of reference situations in the context of a design project.	42
	Figure 3.6	Model for noise assessment, starting from three different situations.	43
	Figure 3.7	Assessment of stress problems, part of a checklist.	44
	Figure 3.8	Strategic assessments. Part of the method for the evaluation of working conditions.	46
	Figure 4.1	Schematic outline of a workplace assessment process.	51
	Figure 4.2	Organization of activities for workplace assessment according to the 'internal control' principle.	53
	Figure 4.3	Workgroups in redesign project at 'Le Monde'.	58
	Figure 4.4	Part of the "do it yourself" checklist for the evaluation of administrative work at computer screens.	59
	Figure 4.5	Possible structure of the workplace assessment process.	64
	Figure 5.1	Part of an ergonomic observation sheet suited for tasks with a cycle time of less than 6 minutes.	70

- Figure 5.2 Closed checklist in order to find lighting problems.
- Figure 5.3 Safety and health circles at Asea Brown Boveri.
- Figure 5.4 Part of the Volkswagen questionnaire on health and wellbeing.
- Figure 5.5 The projects in the programme of the European Foundation for the Improvement of Living and Working Conditions relating to health and safety at work.
- Figure 5.6 Classification of risks and selection of actions according to the German DIN 19250 standard.
- Figure 5.7 Relative ranking techniques for prioritizing risks. Sequence for determining whether action is required.
- Figure 5.8 Costs - effects analysis of possible measures as a tool in action planning.
- Figure 5.9 Sample action plan.
- Figure 6.1 Overview of a risk management system.
- Figure 6.2 Four step safety management system.
- Figure 6.3 Three level safety and health management system.
- Figure 6.4 Possible options for organizing integrated quality, environmental and safety and health control.
- Figure 6.5 Audit as a part of safety and health management systems.

#### LIST OF TABLES

- Table 3.1 Differences between workplace assessment and risk assessment.
- Table 3.2 Overview of some workplace assessment methods.
- Table 3.3 Some instruments for thematic assessments.
- Table 3.4 Selection aid for assessment types.
- Table 4.1 Overview of possible persons or groups involved, tasks and responsibilities.
- Table 4.2 Overview of practices and comments on worker participation.
- Table 4.3 Overview of models for the planning of workplace assessment.
- Table 5.1 Examples of databases and catalogues.
- Table 5.2 Possible sources of criteria.

- 72 Table 5.3 Overview of risk estimation techniques. semi-quantitative techniques are summarised.
- 73
- 75 Table 5.4 Injury/illness-cause model.
- Table 6.1 Overview of audit instruments for safety

76

#### LIST OF EXAMPLES

- 82 Example 2.1 Motives for management support of safety and health.
- 86 Example 2.2 Obligations according to the Council Directive 89/391/EEC.
- 90 Example 2.3 Working conditions in the international management and quality system elements.
- 90 Example 2.4 Safety pays.
- 94 Example 2.5 Beneficial effects of lower absenteeism on performance.
- 96
- 97 Example 3.1 Occasions on which workplace assessment is required.
- 102 Example 4.1 Overview of activities to perform at the assessment process.
- 104 Example 4.2 Workgroups as a means of participation.
- Example 4.3 Eleven-step approach to planning workplace assessment.
- Example 5.1 Workload assessment in the chemical industry assessment at DAF.
- 33 Example 5.2 Health circles at a German steel mill.
- 40 Example 5.3 Company safety and health reports (OSHA).
- 42 Example 6.1 Objectives of performance standards.
- 47 Example 6.2 Tasks and responsibilities with respect to safety and health in Norway.
- 54 Example 6.3 Total Safety Management at ABB.
- 60 Example 6.4 Organization and structure of combined occupational safety and health, environmental and organization management system.
- 77
- 79 Example 6.5 Overview of the contents of the OSA.

72	Table 5.3	Overview of risk estimation techniques. Both quantitative and semi-quantitative techniques are summarized.	81
73			
75	Table 5.4	Injury/illness-cause model.	87
	Table 6.1	Overview of audit instruments for safety.	104
76	<b>LIST OF EXAMPLES</b>		
82	Example 2.1	Motives for management support of occupational safety and health.	20
86	Example 2.2	Obligations according to the Council Directive.	21
90	Example 2.3	Working conditions in the international standard for quality management and quality system elements (ISO 9004).	25
90	Example 2.4	Safety pays.	26
94	Example 2.5	Beneficial effects of lower absenteeism on company performance.	27
96			
97	Example 3.1	Occasions on which workplace assessments may be started.	35
102	Example 4.1	Overview of activities to perform at the start of a workplace assessment process.	51
104	Example 4.2	Workgroups as a means of participation.	58
	Example 4.3	Eleven-step approach to planning workplace assessments.	65
	Example 5.1	Workload assessment in the chemical industry; workplace assessment at DAF.	69
33	Example 5.2	Health circles at a German steel mill.	74
40	Example 5.3	Company safety and health reports (Germany).	84
42	Example 6.1	Objectives of performance standards.	95
47	Example 6.2	Tasks and responsibilities with respect to internal control of safety and health in Norway.	99
54			
60	Example 6.3	Total Safety Management at ABB.	100
64	Example 6.4	Organization and structure of combined quality, occupational safety and health, environment and organization management system.	103
77			
79	Example 6.5	Overview of the contents of the OSART questionnaire.	105
