## Theory of Vector Optimization

---

Fachbereich Mathematik  
Technische Hochschule Darmstadt

Bibliothek

Inv.-Nr. 3 22 063

Springer-Verlag

Berlin Heidelberg New York London Paris Tokyo

# Contents

<b>Chapter 1: Analysis over Cones</b>	<b>1</b>
1.Convex cones .....	1
2.Recession cones .....	8
3.Cone closed sets .....	13
4.Cone monotonic functions .....	18
5.Cone continuous functions .....	22
6.Cone convex functions .....	29
7.Set-valued maps .....	33
<b>Chapter 2: Efficient Points and Vector Optimization Problems</b>	<b>37</b>
1.Binary relations and partial orders .....	37
2.Efficient points .....	39
3.Existence of efficient points .....	46
4.Domination property .....	53
5.Vector optimization problems .....	57
<b>Chapter 3: Nonsmooth Vector Optimization Problems</b>	<b>62</b>
1.Contingent derivatives .....	63
2.Unconstrained problems .....	67
3.Constrained problems .....	70
4.Differentiable case .....	74
5.Convex case .....	77
<b>Chapter 4: Scalarization and Stability</b>	<b>80</b>
1.Separation by monotonic functions .....	81
2.Scalar representations .....	86

3.Completeness of scalarization .....	95
4.Stability .....	101
<b>Chapter 5: Duality</b>	<b>109</b>
1.Lagrangian duality .....	110
2.Conjugate duality .....	117
3.Axiomatic duality .....	120
4.Duality and alternative .....	129
<b>Chapter 6: Structure of Optimal Solution Sets</b>	<b>135</b>
1.General case .....	135
2.Linear case .....	137
3.Convex case .....	139
4.Quasiconvex case .....	148
