Chapter 1

<i>Sanitation and wastewater technologies in Minoan Era</i>	1
<i>A. N. Angelakis, E. Kavoulaki, and E. G. Dialynas</i>	
1.1 Prolegomena	1
1.2 Physical Setting of the Island Crete	2
1.2.1 Location	2
1.2.2 Climatic conditions	3
1.2.3 Hydrology	4
1.3 Major Sanitary Technologies in Minoan Era	4
1.3.1 Use of harvested water in minoan crete	5
1.3.2 Sewerage and drainage systems	6
1.3.3 Bathrooms and lustral basins	10
1.3.4 Roads	14
1.3.5 Toilets or lavatories	16
1.3.6 Outlets and disposal and reuse sites	19
1.4 Conclusions	20
1.5 References	22

Chapter 2

***Sanitation and wastewater technologies in Harappalindus valley civilization (ca. 2600–1900 BC)* 25**

Saifullah Khan

2.1 Introduction 25

2.2 Physical Settings 26

2.3 History, Culture, and Town Planning of Indus Valley Civilization 27

 2.3.1 Introduction 27

 2.3.2 History 27

 2.3.3 Culture 28

 2.3.4 Town planning 29

2.4 Water and Sanitation 32

 2.4.1 The great bath 32

 2.4.2 Water treatment 33

 2.4.3 Baths and wells 33

 2.4.4 Drainage system 35

 2.4.5 Irrigation system 35

 2.4.6 Rainwater harvesting and storage system 36

 2.4.7 Public toilets 38

 2.4.8 Dockyard at Lothal 39

2.5 Conclusion 39

2.6 References 40

Chapter 3

***Sanitation and water management in ancient South Asia* 43**

Hilal Franz Fardin, Annick Hollé, Emmanuèle Gautier-Costard, and Jacques Haury

3.1 Introduction 43

3.2 Wastewater Management During the Harappan Period 43

 3.2.1 Indus Valley palaeogeography and culture 44

 3.2.2 Sanitation centralised systems 44

 3.2.3 Sanitation decentralised systems 46

 3.2.4 Harappan wastewater management perspectives 46

3.3 Wastewater Management During Early Historic Times 47

 3.3.1 Northern and Central South Asia 47

 3.3.2 Southern South Asia 47

3.4 Discussion: Cultural and Technical Innovations and Diffusions in Ancient South Asia 49

3.5 Conclusion and Perspectives 51

3.6 References 52

Chapter 4

***Evolution of sanitation and wastewater technologies in Egypt through centuries* 55**

Fatma A. El-Gohary

4.1 Introduction 55

4.1.1	Historical perspective	55
4.1.2	Evolution of sanitation in ancient time	56
4.2	Sanitation in Ancient Egypt	61
4.3	Domestic Wastewater Treatment in the Modern World	62
4.3.1	International level	62
4.3.2	Trends in the development of wastewater services in Egypt	63
4.4	Conclusions	67
4.5	References	67

Chapter 5

Sanitation and wastewater in the Central Andean Region, Peru:

***An overview from Pre-Columbian and Colonial times to nowadays*** **69**

A. Reyes-Knoche

5.1	Introduction	69
5.1.1	The environment	69
5.1.2	Indicative timeline	73
5.1.3	Population development	74
5.1.4	Water qualities over time	74
5.1.5	Water availability versus demand	76
5.2	Pre-Columbian Era (ca. 3000 BC to 1532 AD)	76
5.2.1	Eradication of hunger	79
5.2.2	No water-related diseases	80
5.3	From the Spanish Colony (1532–1821) to Early Republican Times Around the Beginning of the XX Century	80
5.3.1	Colonial settlements	80
5.3.2	Water resources management	81
5.3.3	Urban water supply and sanitation	81
5.3.4	Rural water supply and sanitation	85
5.4	From Around the Beginning of the XX Century Till Today	86
5.4.1	Snap-shots of water supply and sanitation development	86
5.4.2	Protection of water sources, pollution hazards, and water qualities	93
5.4.3	Actual developments and trends	94
5.5	Conclusion	95
5.6	References	95

Chapter 6

History of urban wastewater and stormwater sanitation technologies

***in Hellas*** **99**

*G. P. Antoniou, G. Lyberatos, E. I. Kanetaki, A. Kaiafa, K. Voudouris, and
A. N. Angelakis*

6.1	Prolegomena	99
6.2	Prehistoric Times	101

6.2.1	Minoan crete	101
6.2.2	Other locations	106
6.3	Historical Times	107
6.3.1	Introduction	107
6.3.2	Classical period	108
6.3.3	Hellenistic period	109
6.3.4	Roman period (ca. 67 BC–330 AD)	116
6.4	Medieval Times	123
6.4.1	Introduction	123
6.4.2	The Byzantine period (ca. 330–1453 AD)	124
6.4.3	The Venetian period (ca. 1204–1669 AD)	128
6.5	Modern Times	130
6.5.1	The Ottoman period (ca. mid 14th–1923 AD)	130
6.5.2	The Present times (1900 AD to the present)	135
6.6	Future Trends	135
6.7	Discussion and Conclusions	136
6.8	References	141

Chapter 7

<i>Evolution of sanitation and wastewater technologies in Iran through the centuries: Past and present</i>	147	
<i>Saeid Neirizi, Seyed Ali, Seyed Navid Mahmoudnian, and Jalal Jooshesh</i>		
7.1	Introduction	147
7.2	Traditional Wastewater Disposal Systems in Urban and Rural Regions of Iran	148
7.2.1	Coastal regions near Persian Gulf and Caspian Sea	148
7.2.2	Central regions	149
7.2.3	Mountains	149
7.3	Absorbing Well (Septic and Leaching Cesspool or Cesspit)	149
7.3.1	The location of absorbing well within the building	150
7.3.2	Discharge of absorbing wells	151
7.3.3	The role of absorbing wells in treating domestic wastewater	153
7.3.4	Problems and consequences of absorbing wells	153
7.3.5	Operation and maintenance of absorbing wells	156
7.3.6	Social acceptability	156
7.3.7	The overall economic impacts	156
7.4	Sanitation	157
7.4.1	Comparison between the traditional Iranian baths with those of other nations Common traits	157
7.4.2	The architecture of ancient baths in Iran	158
7.4.3	The bath's spatial connection	158
7.4.4	The climatology of traditional baths	159
7.4.5	The bath's position at the construction site	159
7.4.6	Materials used in the construction of the baths	159
7.4.7	Heating system in traditional baths	160

7.4.8	Water supply	160
7.4.9	Light and lighting	160
7.4.10	Decoration of bath	161
7.4.11	Frameworks and arches	162
7.4.12	Hoorno	162
7.4.13	Bathing rites and customs	162
7.4.14	Customs inside the bath	162
7.4.15	Bathing materials	163
7.4.16	People working in public baths	163
7.4.17	The time for using public baths in the past	164
7.4.18	Ancient baths in Iran	164
7.5	Present Situation	166
7.5.1	Management	166
7.5.2	Technologies	167
7.5.3	Achievements	170
7.6	Conclusions	173
7.7	References	174

Chapter 11

From Volubilis to Fez: Water, witnessed a transfer of an

International Heritage 227

H. Benqilou, S. Bensaid, and M. El Faiz

11.1	Introduction	227
11.2	Volubilis Hydraulic System	228
11.2.1	Public fountains	231
11.2.2	Volubilis houses	232
11.2.3	Thermal baths	233
11.2.4	Latrines	233
11.3	Management and Maintenance of The Volubilis Hydraulic System	234
11.4	Fes Hydraulic System	235
11.4.1	Mosques and Islamic schools	239
11.4.2	Fez houses	241

11.4.3	Public latrines	241
11.4.4	Handicraft	242
11.4.5	Bathhouse	242
11.5	The Issue of Maintenance of The Fez Hydraulic System: The Al-Fachtali Model	242
11.5.1	The legal constraints of the model	242
11.5.2	The mathematical formulation of the model	243
11.5.3	The terminological aspects of the problem	245
11.5.4	Scope and contributions of the mathematical model of al-Fachtali	245
11.6	Similarities Between Fes and Volubilis Hydraulic Systems	246
11.7	Evolution of The Hydraulic System of Fes and Volubilis	247
11.8	Discussion and Conclusions	248
11.9	References	249

Chapter 12

Sanitation and wastewater technologies in ancient Roman cities **251**

Giovanni De Feo, Sabino De Gisi, and Meisha Hunter

12.1	Introduction	251
12.2	Sanitation and Wastewater Technologies in Pompeii	252
12.2.1	Toilets and cesspits	252
12.2.2	Drainage and sewerage systems	253
12.3	Sanitation and Wastewater Technologies in Herculaneum	255
12.3.1	Toilets and cesspits	255
12.3.2	Drainage and sewerage systems	256
12.4	Sanitation and Wastewater Technologies in Ostia	261
12.4.1	Toilets and cesspits	262
12.4.2	Drainage and sewerage systems	262
12.5	Conclusions	266
12.6	References	266

Chapter 13

The sanitary system in ancient Roman civilization: An insight on Tunisia **269**

Olfa Mahjoub and Mohamed Thameur Chaibi

13.1	Introduction	269
13.1.1	A historical glimpse on Roman Tunisia (<i>Africa Proconsularis</i>)	269
13.1.2	Chapter structure and scope	270
13.2	Water Resources and Supply	271
13.3	Sanitary System in Roman Tunisia	275
13.3.1	Sanitary system and urban planning	275
13.3.2	Access to sanitation and social considerations	277
13.4	Connection to Sewers and Wastewater Collection	278
13.4.1	Public premises	279
13.4.2	Private houses	281

13.5 Wastewater Treatment and Reuse	282
13.6 Roman Sanitary System and Public Health	283
13.7 Conclusion	285
13.8 Sanitary Facilities in Selected Roman Cities in Tunisia	286
13.8.1 Sanitation facilities in Carthage	286
13.8.2 Sanitation and water facilities in <i>Bulla Regia</i> (Henchir Hammam Darradji)	291
13.8.3 Sanitation facilities in <i>Tuburbo Majus</i> (Henchir Kasbat)	293
13.8.4 Sanitation facilities in Thugga (Dougga)	293
13.9 Conclusions	296
13.10 References	296

Chapter 14

Revisiting the technical and social aspects of wastewater management in ancient Korea

Mooyoung Han and Mikyeong Kim

14.1 Introduction	301
14.2 Wastewater Management in Traditional Houses of Ancient Korea	302
14.2.1 Water and wastewater flow in a traditional household	302
14.2.2 Nutrient flow generated by typical traditional house	303
14.2.3 Wastewater management system in a traditional village	303
14.3 Technical Aspects of Traditional Wastewater Treatment	305
14.3.1 Water dropwort fields	305
14.3.2 <i>Jetgan</i> toilet	305
14.3.3 <i>Pit latrine</i> toilet	306
14.3.4 Separated excreta jars (<i>Ojum-janggun</i> and <i>Ddung-janggun</i>)	307
14.4 Social Education for Wastewater Management	307
14.5 Importance and Characteristics of Traditional Wastewater Management Practices	308
14.5.1 The separation of faeces with urine	308
14.5.2 Resource recovery from wastewater	308
14.5.3 Small-scaled and decentralized management	308
14.5.4 Ecological concepts in wastewater management system	308
14.5.5 Emphasis on social responsibility	309
14.6 Lessons from the Past for the Improvement of Current Wastewater Management Systems	309
14.7 Conclusions	310
14.8 References	311

Chapter 15

Drainage and sewerage systems at ancient Athens, Hellas

E. D. Chiotis and L. E. Chioti

15.1 Introduction	313
15.2 Types of Drainage and Sewerage Structures: Pipelines, Channels and Galleries	315

15.3	Drainage of Representative Areas	317
15.3.1	Drainage in the hydrologic basin north of the Acropolis hill	317
15.3.2	Drainage at the southern slopes of the Acropolis hill	318
15.4	Underground Structures of Doubtful Interpretation	320
15.5	Lavatories and Latrines	322
15.6	Possible Sanitation Problems	323
15.6.1	Sanitation and water supply at the excavation for the New Acropolis Museum	323
15.6.2	The Plague during the Peloponnesian war	325
15.7	Conclusions	326
15.8	References	327

Chapter 16

<i>Sewerage system of Diocletian's Palace in Split – Croatia</i>		331
<i>Jure Margeta, Katjia Marasović, and Snježana Perojević</i>		
16.1	Introduction	331
16.2	Palace Water System	333
16.3	Drainage System of the Palace	334
16.3.1	The concept	334
16.3.2	Elements of the sewerage system and its characteristics	336
16.3.3	After roman period	338
16.4	The Discussion and Conclusion – Lesson Learned	341
16.5	References	343

Chapter 17

<i>The evolution of sanitation in the rural area of Southwest China: With case of Dai villages of Xishuangbana, Yunnan province</i>		345
<i>Xiao Yun Zheng and Yao Yu Zheng</i>		
17.1	Introduction	345
17.2	Sanitation in the Dai Traditional Society	346
17.2.1	Personal sanitation	346
17.2.2	Water facilities of daily life	347
17.2.3	Tap water	350
17.3	Transformation of Sanitation in Dai Areas	350
17.3.1	Water supply	350
17.3.2	Current situation of water use	350
17.3.3	Sanitation change	351
17.3.4	Popularization of toilet	352
17.3.5	The changes of the wastewater management	353
17.4	Evaluating the Impact of the Development of Sanitation	354
17.4.1	The social changes	354
17.4.2	Environmental impacts	355
17.4.3	Cultural impacts	356
17.5	Discussion and Conclusions	358
17.6	References	359

Chapter 18

***Evolution of sanitation services in the city of Rome between urban development and environmental quality* 361**
Renato Drusiani, Alessandro Zanobini, and Gianmarco Margaritora

18.1 Introduction 361

18.2 The *Cloaca Maxima* 362

18.3 The Role of the Roman Sewer System 364

 18.3.1 Management aspects 364

 18.3.2 Organizational and regulatory aspects 370

18.4 Development of the Sewerage-Water Treatment System after the Fall of the Roman Empire 373

 18.4.1 Sewer network development from the Middle Ages until the end of the 19th century 373

 18.4.2 Present-day configuration of the sewer system of the Capital 377

 18.4.3 Future development of a sustainable urban drain system for the city of Rome 379

18.5 Discussion and Conclusions 381

18.6 References 382

Chapter 19

***History of the Sewerage System in Barcelona, Spain: From its Origins to Garcia Faria Plan* 383**
Montse Martinez, Pere Malgrat, Cristina Vila, Roman Llagostera, and Miquel Salgot

19.1 Introduction 383

19.2 Roman Sewerage 385

19.3 Medieval Barcelona 387

19.4 18th and 19th Century 389

19.5 The Problem of Soil's and Water's Putrefaction: The Miasmas 390

19.6 Characteristics of the Sewer System in Barcelona Before the Cerdà Plan 392

19.7 From Cerdà to García Fària 392

19.8 'Salus Populi Suprema Lex Est': The Utopia of Garcia Faria 394

19.9 Conclusions 398

19.10 References 398

Chapter 20

***A brief history of the sewerage system in Prague and the role of William Heerlein Lindley* 401**
Jan Palas, Jaroslav Jásek, and Ondrej Benes

20.1 A Short History of Sanitation in the City of Prague 401

 20.1.1 Prague – history and first sewers 401

 20.1.2 Progress over next centuries 402

20.2 Towards a Modern Concept of Sanitation System 402

 20.2.1 The first tender for the Prague master plan 402

20.2.2 The second master plan tender	404
20.3 The Arrival of W. H. Lindley	405
20.3.1 When two are fighting	405
20.3.2 Building the new sewers of prague	407
20.4 The First Wastewater Treatment Plant	409
20.4.1 Construction and operation start-up	409
20.4.2 Between the wars	413
20.4.3 Post-war years	415
20.5 Epilogue	416
20.6 References	416
Appendix I	417
Appendix II	417

Chapter 21

Waterborne diseases in the Hippocratic treatise: Airs, Waters, Places **419**

Maria E. Galanaki

21.1 Introduction	419
21.2 Cities Exposed to Warm Winds – Profusive and Saltish Waters	420
21.3 Cities Exposed to Cold Winds – Hard and Cold Waters	423
21.4 Cities which Lie Between the Summer and the Winter Rising of the Sun	423
21.4.1 Cities lying towards sunrise	423
21.4.2 Cities lying towards sunset	423
21.5 Other Kinds of Healthy and Unhealthy Waters	424
21.5.1 Stagnant waters	424
21.5.2 Waters flowing from rocks and from soils which produce thermal waters	424
21.5.3 Salty waters	424
21.5.4 Rain and snow waters	425
21.5.5 River and lake waters	425
21.6 Conclusion	426
21.7 Appendix of Hippocratic Medical Terms	426
21.8 References	427

Chapter 22

Ancient Greek and Roman authors on health and sanitation **429**

Heikki S. Vuorinen

22.1 Introduction	429
22.2 Therapeutics Above All	429
22.3 <i>Airs, Waters, Places</i>	431
22.4 Galen	431
22.5 Sanitation After All	432
22.6 Non-Medical Authors on Sanitation	433
22.7 Epilogue	434

22.8 References	435
Appendix I	436

Chapter 23

<i>Historical development of sanitation from the 19th century to nowadays: Centralized vs decentralized wastewater management systems</i>	437
<i>Paolo Roccaro, Antonella E. Santamaria, and Federico G.A. Vagliasindi</i>	

23.1 Introduction	437
23.2 Wastewater Collection and Treatment in the 19th Century	438
23.3 Centralized Wastewater Treatment Plants: The Gold Technology	444
23.4 Decentralized Systems	448
23.5 Kuhn and the Scientific Revolution: Is Back Progress the Future ECO-Sanitation?	454
23.6 References	454

Chapter 24

<i>The history of land application and hydroponic systems for wastewater treatment and reuse</i>	457
---	------------

*V. A. Tzanakakis, S. Koo-Oshima, M. Haddad, N. Apostolidis, and
A. N. Angelakis*

24.1 Introduction	457
24.2 Evolution of Wastewater Collection and Land Application and Hydroponic Treatment Systems	458
24.2.1 Bronze ages (ca. 3200–1100 BC)	458
24.2.2 Indus valley civilizations (ca. 2600–1900 BC)	459
24.2.3 Historical times (ca. 800 BC–330 AD)	460
24.2.4 Medieval times (ca. 300–1500 AD)	463
24.2.5 Aztecs (ca. 1100–1521 AD)	464
24.2.6 Modern times (ca. 15th to the present)	464
24.3 Environmental Concerns and Public Health	468
24.4 Emerging Trends	472
24.5 Discussion and Conclusions	473
24.6 References	474

Chapter 25

<i>Evolution and impacts of water and industrial wastewater management in Lavrion, Hellas</i>	481
--	------------

*Kostas Komnitsas, Anthimos Xenidis, Nymphodora Papassiopi,
Andreas Angelakis*

25.1 Introduction	481
25.2 Ancient Activities	483
25.3 Modern Activities and Related Environmental Impacts	485
25.4 Conclusions	491
25.5 References	491

Chapter 26***The Water Court of Valencia, Spain (Wastewater)* 493***F. Hernández-Sancho and M. Molinos-Senante*
