Fundamentals of Sailplane Design

Grundlagen für den Entwurf von Segelflugzeugen

Fred Thomas

Professor of Aerodynamics,
Technical University of Braunschweig

Former Director, DLR
Braunschweig Research Center

Judah Milgram, translator and contributor

College Park Press

Contents

Foreword by L. M. M. Boermans vii

Foreword ix

Basics of Aerodynamics and Flight Mechanics 1
Fluid Dynamics and the Sailplane . . . 1
Inviscid Incompressible Flow . . . 1
Lift and Potential Flow . . . 8
Induced Drag . . . 14
Viscous Effects and Boundary Layers . . . 15
Concluding Remarks . . . 23
Airfoil and Wing Theory . . . 24
Wing/Airfoil Geometry and Airfoil Coefficients . . . 24
Airfoil Geometry and Aerodynamic Characteristics . . . 31
Wing Planform and Lift Distribution . . . 38
Performance and Flying Qualities . . . 43
Performance . . . 43
Dynamic Stability . . . 45
Static Stability . . . 49
Aeroelasticity . . . 57
Static Aeroelasticity . . . 57
Dynamic Aeroelastic Problems . . . 58

Design Requirements 61
Certification Requirements . . . 61
Cross-Country Theory . . . 62
Modeling Cross-Country Flight . . . 62
Climb Performance in Thermals . . . 63
Interthermal Glide . . . 69

Sailplane Design Optimization 73
Basic Considerations . . . 73
Wing Design . . . 73
Setting the Aspect Ratio . . . 73

Wing Loading . . . 86
Airfoil Selection . . . 90
Wing Planform and Twist . . . 99
Winglets and Unconventional Planforms . . . 103
Variable Geometry . . . 105
Flying Wings . . . 114
The SB 13 . . . 115
Genesis . . . 116
The World Class . . . 116
The "eta" . . . 118
Fuselage and Wing-Fuselage Junction . . . 120
Cockpit and Tail Boom . . . 120
Wing-Fuselage Interference . . . 123
Empennage and Controls . . . 126
Control System Elements on Wing . . . 126
Horizontal Stabilizer and Elevator . . . 130
Stabilizer Volume . . . 136
Stabilizer Planform and Empennage Arrangement . . . 147
Stick-Force Gradient with All-Flying Tails . . . 149

Evaluation of Performance and Flying Qualities **155**
Theoretical Methods . . . 155
Drag Polars . . . 155
Typical Drag Polars . . . 156
Experimental Methods . . . 157
Wind-tunnel testing . . . 157
Flight Test . . . 158

Trends in Sailplane Development **173**
Class Definitions . . . 173
Evolution of the Sailplane . . . 174
Wooden Sailplanes . . . 174
Metal Sailplanes . . . 177
Fiberglass Sailplanes . . . 177
Outlook . . . 185

Appendix: Sailplane Design Data and Drawings **195**

Appendix: Flight Test Protocol **245**

Nomenclature **261**

Index **266**

Aircraft Index **273**
