Preface
CHAPTER 1
Introduction
1.1 Aquifers, Ground Water and Oil Reservoirs
1.1.1 Definitions
1.1.2 The Moisture Distribution in a Vertical Profile
1.1.3 Classification of Aquifers
1.1.4 Properties of Aquifers
1.1.5. The Oil Reservoir
1.2 The Porous Medium
1.3 The Continuum Approach to Porous Media
1.3.1 The Molecular and Microscopic Levels
1.3.2 Porosity and Representative Elementary Volume
1.3.3 Areal and Linear Porosities
1.3.4 Velocity and Specific Discharge
1.3.5 Concluding Remarks
CHAPTER 2
CHAPTER 2 Fluids and Porous Matrix Properties
CHAPTER 2         Fluids and Porous Matrix Properties         2.1 Fluid Density         2.1 Fluid Density
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         27       27
CHAPTER 2       Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.1 Definition       32
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       27         2.1.3 Measurement of Density       30         2.1.4 Viscosity       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35         2.3 Fluid Compressibility       37
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       27         2.1.3 Measurement of Density       30         2.1.4 Definition       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35         2.3 Fluid Compressibility       37         2.4 Statistical Description of Porous Media       38
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       27         2.1.3 Measurement of Density       30         2.1.4 Viscosity       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35         2.3 Fluid Compressibility       37         2.4 Statistical Description of Porous Media       38         2.4.1 Particle-Size Distribution       39
CHAPTER 2       Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       27         2.1.3 Measurement of Density       30         2.1.4 Definition       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35         2.3 Fluid Compressibility       37         2.4 Statistical Description of Porous Media       38         2.4.1 Particle-Size Distribution       39         2.4.2 Pore-Size Distribution       41
CHAPTER 2         Fluids and Porous Matrix Properties       27         2.1 Fluid Density       27         2.1.1 Definitions       27         2.1.2 Mixture of Fluids       30         2.1.3 Measurement of Density       31         2.2 Fluid Viscosity       32         2.2.1 Definition       32         2.2.2 Non-Newtonian Fluids       33         2.2.3 Units       34         2.2.4 Effect of Pressure and Temperature       34         2.2.5 Measurement of Viscosity       35         2.3 Fluid Compressibility       35         2.3 Fluid Compressibility       37         2.4 Statistical Description of Porous Media       38         2.4.1 Particle-Size Distribution       39         2.4.2 Pore-Size Distribution       41         2.4.3 Other Statistical Descriptions       42

Interface	. 521
9.5.3 The Boundary Conditions along an Interface	. 524
9.5.4 Horizontal Interface Displacement	. 526
9.5.5 Interface Displacement in the Vertical Plane	. 533
9.5.6 Numerical and Graphic Methods	. 536
9.5.7 Approximate Solutions based on Linearization	. 538
9.5.8 Interface Stability	. 544
9.6 Determining the Steady Interface by the Hodograph Method	. 547
9.6.1 Boundary Conditions	. 548
9.6.2 Description of Boundaries in the Hodograph Plane	. 549
9.6.3 Examples	. 549
9.7 The Interface in a Coastal Aquifer	. 557 `
9.7.1 Occurrence	. 557
9.7.2 The Ghyben-Herzberg Approximation	. 559
9.7.3 Determining the Shape of a Stationary Interface by the Dupu	it-
Ghyben-Herzberg Approximation	. 561
9.7.4 Approximate Solution for the Moving Interface	. 563
9.7.5 Interface Upconing	. 569
9.7.6 The Dupuit-Ghyben-Herzberg Approximation for an Unstead	ly
Interface in a Thick Aquifer	. 573

٥

Hydrodynamic Dispersion	/9
10.1 Definition of Hydrodynamic Dispersion	79
10.2 Occurrence of Dispersion Phenomena	32
10.3 Review of Some Hydrodynamic Dispersion Theories	32
10.3.1 Capillary Tube and Cell Models	33
10.3.2 Statistical Models	37
10.3.3 Spatial Averaging	)3
10.4 Parameters of Dispersion	)5
10.4.1 The Coefficients of Mechanical Dispersion and Hydrodynamic	
Dispersion	)5
10.4.2 The Medium's Dispersivity	11
10.4.3 Dispersivity-Permeability Relationship	15
10.5 The Governing Equations and Boundary Conditions	17
10.5.1 The Partial Differential Equation in Cartesian Coordinates 6	17
10.5.2 The Partial Differential Equation in Curvilinear Coordinates 61	19
10.5.3 Initial and Boundary Conditions	22
10.5.4 Solving the Boundary Value Problems	24
10.5.5 The Use of Nondimensional Variables	26
10.6 Some Solved Problems	26
10.6.1 One-dimensional Flow	27
10.6.2 Uniform Flow in a Plane	33
10.6.3 Plane Radial Flow	34
10.7 Heat and Mass Transfer	<b>41</b>
10.7.1 Modes of Heat Transfer in a Porous Medium	<b>1</b> 1
10.7.2 Formulation of the Problem of Heat and Mass Transfer in a Fluid	
$Continuum \dots $	<b>43</b>
10.7.3 Formulation of the Problem of Heat and Mass Transfer in a Porous	
$\operatorname{Medium} \ldots 64$	<b>14</b>
10.7.4 Comments on Some Heat and Mass Transfer Coefficients 6	<b>47</b>
10.7.5 Simplifying the Macroscopic Heat and Mass Transfer Equations 6	51
10.7.6 Convective Currents and Instability	53
10.7.7 Some Similitude Considerations.	60
CHAPTER 11	
Models and Analogs	65
11 1 General 6	65

	5																				
11.1	General	•							•				•			•					665
11.2	Scaling Principles and Procedure	е	·			•										•		•	•	•	668
	11.2.1 The Two Systems	•					•	•	•	•				•	•		•	•			668
	11.2.2 Geometric Similarity .	•	•	•	•		•	•	•	•		•	•	•	•	•	•	•	•		669
	11.2.3 Kinematic Similarity .	•	•	•	•	•				•			•		•	•		•		•	670
	11.2.4 Dynamic Similarity		•	•	•		•	•	•	•		•	•	•		•	•	•	•	•	670
	11.2.5 Dimensional Analysis .		•		•	•				•	•		•	•	•	•		•	•	•	671

11.2.6 Inspectional Analysis	. 673
11.2.7 Modified Inspectional Analysis	. 676
11.3 The Sand Box Model	. 678
11.3.1 Description	. 678
11.3.2 Scales	. 680
11.4 The Viscous Flow Analogs	. 687
11.4.1 General	. 687
11.4.2 Description of the Vertical Hele-Shaw Analog	. 687
11.4.3 Establishing the Analogy between Analog and Prototype	. 690
11.4.4 Scales for the Vertical Analog	. 693
11.4.5 Recommended Applications of Vertical Analog	. 696
11.4.6 The Liquids	. 697
11.4.7 The Horizontal Hele-Shaw Analog-Description and Scales .	. 697
11.4.8 Simulation of an Infinite Horizontal Aquifer	. 701
11.5 Electric Analogs	. 702
11.5.1 Description of the Electrolytic Tank and the Conducting Pa-	per
Analogs	. 702
11.5.2 Scales for the Electrolytic Tank Analog	. 708
11.5.3 The Resistance Network Analog for Steady Flow	. 710
11.5.4 The Resistance-Capacitance Network for Unsteady Flow	. 716
11.5.5 The Ion Motion Analog	. 719
11.6 The Membrane Analog	. 722
11.7 Summary	.725
Answers to Exercises	. 729
Bibliography	. 733
Index	. 757
