H. Lichtenegger, and J. Collins

# Global Positioning System

## Theory and Practice

Third, revised edition

Springer-Verlag Wien New York

# Contents

<b>Abbreviations</b>	<b>xix</b>
<b>Numerical constants</b>	<b>xxiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The origins of surveying .....	1
1.2 Development of global surveying techniques .....	1
1.2.1 Optical global triangulation .....	2
1.2.2 Electromagnetic global trilateration .....	2
1.3 History of the Global Positioning System .....	3
1.3.1 Navigating with GPS .....	4
1.3.2 Surveying with GPS .....	6
<b>2 Overview of GPS</b>	<b>13</b>
2.1 Basic concept .....	13
2.2 Space segment .....	14
2.2.1 Constellation .....	14
2.2.2 Satellites .....	15
2.2.3 Operational capabilities .....	19
2.2.4 Denial of accuracy and access .....	19
2.3 Control segment .....	21
2.3.1 Master control station .....	22
2.3.2 Monitor stations .....	22
2.3.3 Ground control stations .....	22
2.4 User segment .....	23
2.4.1 User categories .....	23
2.4.2 Receiver types .....	24
2.4.3 Information services .....	26
<b>3 Reference systems</b>	<b>29</b>
3.1 Introduction .....	29
3.2 Coordinate systems .....	31
3.2.1 Definitions .....	31
3.2.2 Transformations .....	34
3.3 Time systems .....	38
3.3.1 Definitions .....	38
3.3.2 Conversions .....	40
3.3.3 Calendar .....	41

<b>4 Satellite orbits</b>	<b>43</b>
4.1 Introduction .....	43
4.2 Orbit description .....	43
4.2.1 Keplerian motion .....	43
4.2.2 Perturbed motion .....	51
4.2.3 Disturbing accelerations .....	54
4.3 Orbit determination .....	58
4.3.1 Keplerian orbit .....	59
4.3.2 Perturbed orbit .....	62
4.4 Orbit dissemination .....	67
4.4.1 Tracking networks .....	67
4.4.2 Ephemerides .....	70
<b>5 Satellite signal</b>	<b>75</b>
5.1 Signal structure .....	75
5.1.1 Physical fundamentals .....	75
5.1.2 Components of the signal .....	76
5.2 Signal processing .....	81
5.2.1 Receiver design .....	82
5.2.2 Processing techniques .....	84
<b>6 Observables</b>	<b>89</b>
6.1 Data acquisition .....	89
6.1.1 Code pseudoranges .....	89
6.1.2 Phase pseudoranges .....	90
6.1.3 Doppler data .....	92
6.1.4 Biases and noise .....	93
6.2 Data combinations .....	94
6.2.1 Linear phase combinations .....	95
6.2.2 Phase and code pseudorange combinations .....	96
6.3 Atmospheric effects .....	99
6.3.1 Phase and group velocity .....	99
6.3.2 Ionospheric refraction .....	101
6.3.3 Tropospheric refraction .....	108
6.4 Relativistic effects .....	117
6.4.1 Special relativity .....	117
6.4.2 General relativity .....	120
6.4.3 Relevant relativistic effects for GPS .....	121
6.5 Antenna phase center offset and variation .....	123
6.6 Multipath .....	124

<b>7 Surveying with GPS</b>	<b>129</b>
7.1 Introduction .....	129
7.1.1 Terminology definitions .....	129
7.1.2 Observation technique .....	131
7.1.3 Impact of SA on positioning .....	136
7.1.4 Field equipment .....	140
7.2 Planning a GPS survey .....	143
7.2.1 General remarks .....	143
7.2.2 Presurvey planning .....	144
7.2.3 Field reconnaissance .....	152
7.2.4 Monumentation .....	154
7.2.5 Organizational design .....	154
7.3 Surveying procedure .....	159
7.3.1 Preobservation .....	159
7.3.2 Observation .....	161
7.3.3 Postobservation .....	163
7.3.4 Ties to control monuments .....	164
7.4 In situ data processing .....	165
7.4.1 Data transfer .....	165
7.4.2 Data processing .....	166
7.4.3 Trouble shooting and quality control .....	168
7.4.4 Datum transformations .....	173
7.4.5 Computation of plane coordinates .....	176
7.5 Survey report .....	176
<b>8 Mathematical models for positioning</b>	<b>179</b>
8.1 Point positioning .....	179
8.1.1 Point positioning with code ranges .....	179
8.1.2 Point positioning with carrier phases .....	181
8.1.3 Point positioning with Doppler data .....	182
8.2 Relative positioning .....	183
8.2.1 Phase differences .....	183
8.2.2 Correlations of the phase combinations .....	186
8.2.3 Static relative positioning .....	191
8.2.4 Kinematic relative positioning .....	193
8.2.5 Mixed-mode relative positioning .....	196
<b>9 Data processing</b>	<b>199</b>
9.1 Data preprocessing .....	199
9.1.1 Data handling .....	199
9.1.2 Cycle slip detection and repair .....	204
9.1.3 Ambiguity resolution .....	212

9.2	Adjustment, filtering, and smoothing .....	227
9.2.1	Least squares adjustment .....	227
9.2.2	Kalman filtering .....	231
9.2.3	Smoothing .....	235
9.3	Adjustment of mathematical GPS models .....	235
9.3.1	Linearization .....	235
9.3.2	Linear model for point positioning with code ranges ...	237
9.3.3	Linear model for point positioning with carrier phases	239
9.3.4	Linear model for relative positioning .....	242
9.4	Network adjustment .....	244
9.4.1	Single baseline solution .....	244
9.4.2	Multipoint solution .....	245
9.4.3	Single baseline versus multipoint solution .....	249
9.5	Dilution of Precision .....	249
<b>10</b>	<b>Transformation of GPS results</b>	<b>255</b>
10.1	Introduction .....	255
10.2	Coordinate transformations .....	255
10.2.1	Cartesian coordinates and ellipsoidal coordinates ....	255
10.2.2	Ellipsoidal coordinates and plane coordinates .....	258
10.2.3	Height transformation .....	263
10.3	Datum transformations .....	266
10.3.1	Three-dimensional transformation .....	267
10.3.2	Two-dimensional transformation .....	271
10.3.3	One-dimensional transformation .....	274
10.4	Combining GPS and terrestrial data .....	276
10.5	Fiducial point concept .....	278
<b>11</b>	<b>Software modules</b>	<b>279</b>
11.1	Introduction .....	279
11.2	Planning .....	280
11.3	Data transfer .....	281
11.4	Data processing .....	281
11.5	Quality control .....	284
11.6	Network computations .....	284
11.7	Data base management .....	285
11.8	Utilities .....	286
11.9	Flexibility .....	287
<b>12</b>	<b>Applications of GPS</b>	<b>289</b>
12.1	General uses of GPS .....	289

12.1.1 Global uses .....	290
12.1.2 Regional uses .....	291
12.1.3 Local uses .....	294
12.2 Attitude determination .....	295
12.3 Airborne GPS for photo-control .....	298
12.4 Interoperability of GPS .....	300
12.4.1 GPS and Inertial Navigation Systems .....	300
12.4.2 GPS and GLONASS .....	301
12.4.3 GPS and other sensors .....	302
12.4.4 GPS and the Federal Radionavigation Plan .....	303
12.5 Installation of control networks .....	303
12.5.1 Passive control networks .....	304
12.5.2 Active control networks .....	306
<b>13 Future of GPS</b>	<b>309</b>
13.1 New application aspects .....	309
13.2 Improved constellation .....	310
13.2.1 Next generation GPS satellites .....	310
13.2.2 GLONASS satellites .....	311
13.2.3 INMARSAT satellites .....	311
13.2.4 Econosats .....	311
13.3 Hardware improvements .....	312
13.3.1 Receiver cost .....	312
13.3.2 Receiver capability .....	312
13.4 Software improvements .....	313
13.5 Conclusion .....	314
