In honour of R. E. PEIERLS

Physikalische Bibliothek  
Fachbereich 5  
Technische Hochschule Darmstadt  
Hochschulstraße 2  
D - 6100 Darmstadt

Edited by J. E. BOWCOCK  
Department of Mathematical Physics  
The University of Birmingham, U.K.

Lehrstuhl II  
für Theoretische Physik  
Technische Hochschule Darmstadt

TP 119

1970

NORTH-HOLLAND PUBLISHING COMPANY  
AMSTERDAM · LONDON

# Contents

Editor's foreword

<b>SECTION I</b>	<b>Statistical physics and changes of state</b>	
R. E. PEIERLS	Time reversal and the second law of thermodynamics	3
B. D. JOSEPHSON	Critical phenomena . . . . .	11
E. H. LIEB	Ice, ferro- and antiferroelectrics. . . . .	21
D. J. THOULESS	The BCS model Hamiltonian as an exactly soluble problem in statistical mechanics. . . . .	29
A. HUBER	An inequality for traces and its application to extremum principles and related theorems in quantum statistical mechanics . . . . .	37
E. E. SALPETER	Solid-state astrophysics . . . . .	75
<b>SECTION II</b>	<b>Excitations and reactions</b>	
D. J. THOULESS	Excitations. . . . .	83
C. DI CASTRO and G. JONA-LASINIO	Explicit examples of off-diagonal long-range order .	91
S. DONIACH and M. J. RICE	Spin fluctuations and Fermi liquids . . . . .	101
A. M. LANE	Nuclear resonance reactions in 1967 . . . . .	115
A. HERZENBERG	Compound states in atoms and molecules . . . . .	131
S. T. BUTLER	Deuteron induced reactions. . . . .	167
<b>SECTION III</b>	<b>Elementary particle and field theoretical methods</b>	
S. MANDELSTAM	<i>S</i> -matrix theory. . . . .	189
H. M. NUSSENZVEIG	Applications of Regge poles to short-wavelength scattering . . . . .	203
H. BURKHARDT and F. RIORDAN	Singularities of the <i>S</i> -matrix. . . . .	233
R. F. PEIERLS	Scattering of unstable particles . . . . .	259
S. F. EDWARDS	Quantum field theory applied to the problems of polymer molecules . . . . .	269
<b>SECTION IV</b>	<b>Nuclear models and many-body theory</b>	
B. H. FLOWERS	Nuclear models. . . . .	289
G. E. BROWN	Many-body problems and two-body forces . . . . .	317
C. W. WONG	Nuclear ground-state properties in the reaction matrix theory. . . . .	327
M. BRUNEAU and N. VINH MAU	Optical potential for nucleon scattering on calcium 40.	333

CONTENTS

<b>SECTION V</b>	<b>Symmetries, groups and algebras</b>	
R. H. DALITZ	Some problems with the quark model for elementary particles. . . . .	343
H. J. LIPKIN	Group theory and theoretical physics. . . . .	381
S. FUBINI	Recent progress in current algebra. . . . .	401
T. D. LEE	On the algebra of fields. . . . .	415
<b>CONCLUDING LECTURE - T. D. LEE</b>		<b>421</b>
<b>APPENDIX</b>		<b>427</b>
<b>LIST OF OTHER CONTRIBUTED PAPERS</b>		<b>433</b>
<b>LIST OF PARTICIPANTS</b>		<b>437</b>
