The Purification Problem for Constrained Games with Incomplete Information

Fachbereich Mathematik
Technische Hochschule Darmstadt
Bibliothek
Inv.-Nr. B21 558

Springer-Verlag
Berlin Heidelberg New York London Paris Tokyo

CONTENTS

INTRODUCTION		V
NOTATIONS		IX
§ 1	THE PURIFICATION PROBLEM IN THE GAME-THEORETIC CONTEXT	1
1.1	A constrained game with incomplete information	1
1.2	The purification problem	9
1.3	On existence of approximate purifications	15
1.4	Some topological properties of the set of strategies concentrated on a correspondence	22
1.5	Theorems on existence of an equilibrium	33
1.6	On existence of pure strategy equilibrium	44
1.7	Determining approximately payoff-equivalent pure strategies	53
§ 2	A MARKET GAME AS A GAME WITH INCOMPLETE INFORMATION	59
2.1	A model of a market game with a continuum of traders	59
2.2	On the connection between core, r-core and the set of r-Walras allocations	75
§ 3	SOME APPLICATIONS TO STATISTICAL DECISION THEORY	82
3.1	Minimax decision rules	85
3.2	Set-valued minimax estimators	93
