MESS- UND AUTOMATISIERUNGSTECHNIK

**5<sup>TH</sup> INTERNATIONAL  
SYMPOSIUM ON GAS  
ANALYSIS BY TUNABLE  
DIODE LASERS**

Symposium, Freiburg, 25. und 26. Februar 1998

## Inhalt

|   |  | Seite |
|---|--|-------|
| <i>P. Werle</i>   | High sensitivity Gas Analysis by mid and near Infrared Diode Lasers  | 1     |
| <i>D. Rehle,<br/>B. Sumpf,<br/>H.-D. Kronfeldt</i>  | A Tunable Diode Laser Spectrometer for the MIR-Region near 7.2 $\mu\text{m}$ applying Difference Frequency Generation in AgGaSe <sub>2</sub> | 17    |
| <i>T. Kelz,<br/>A. Schumacher,<br/>M. Nägele,<br/>B. Sumpf,<br/>H.-D. Kronfeldt</i>           | A Modular Difference-Frequency Spectrometer for Trace Gas Detection  | 27    |
| <i>G. Mackay,<br/>A. Chanda,<br/>J. Pisano,<br/>H. I. Schiff</i>                              | The LasIR – A Versatile System for Remote Sensing of Gases   | 37    |
| <i>J. F. Kastner,<br/>M. Tacke</i>  | EWALD: Detection of Hydrocarbons in Water by Evanescent Wave Analysis with Laser Diodes  | 47    |
| <i>R. Brunner,<br/>M. Tacke</i>   | Fast time/frequency analysis for tunable diode lasers  | 59    |
| <i>J. Schneider,<br/>Z. Bozóki,<br/>G. Szabó,<br/>Zs. Bor,<br/>Á. Mohácsi,<br/>M. Szakáll</i> | Toward sub ppm. water vapour detection based on External Cavity Diode Laser and Photoacoustic Spectroscopy                                   | 63    |
| <i>A. Beenen,<br/>R. Niessner</i>   | Trace gas Analysis by Photoacoustic Spectroscopy with NIR Laser Diodes   | 69    |
| <i>T. Müller-Wirts,<br/>O. Schmidt,<br/>E. Papp,<br/>W. G. Kaenders</i>                       | Monitoring and Controlling Single Mode Tunable Laser with LaserScope   | 73    |

|   |   | Seite |
|---|---|-------|
| <i>R. Mücke,<br/>P. Werle,<br/>F. D'Amato,<br/>A. Lancia</i>  | Precise measurements of CO <sub>2</sub> concentrations using room temperature diode lasers          | 83    |
| <i>H. Jost,<br/>M. Loewenstein</i>  | Argus: A tunable diode laser instrument to measure stratospheric tracers                            | 93    |
| <i>F.-J. Lübken,<br/>F. Dingler,<br/>H. v. Lucke</i>  | MASERATI: Experimental Method and First Results from a new Rocket-borne TDL Absorption Spectrometer | 101   |
| <i>B. Parville,<br/>C. Thiébeaux,<br/>D. Courtois</i>   | A tunable diode laser heterodyne spectrometer for atmospheric studies: ozone application            | 111   |
| <i>G. Moreau,<br/>M. Chartier,<br/>F. Retailleau,<br/>C. Robert</i>   | Development of tunable Diode Laser Instrument on Balloon/ Preliminary Laboratory Studies            | 121   |
| <i>G. E. Kidd</i>   | Digital Methods of Analysis and Control for TDLAS Gas Sensors                                       | 125   |
| <i>M. Zöchbauer</i>   | Tunable Diode Laser Gas Analysis: Thoughts on a possible market                                     | 129   |
| <i>M. Walter,<br/>W. Schäfers,<br/>M. W. Markus,<br/>T. Andersson</i>   | Analysis and Control of Combustion in a Waste Combustion Plant by Means of Tunable Diode Lasers     | 135   |
| <i>V. Ebert,<br/>J. Fitzer,<br/>I. Gerstenberg,<br/>H. Pitz,<br/>K.-U. Pleban,<br/>J. Wolfrum,<br/>M. Jochem,<br/>J. Martin</i> | Online monitoring of water vapour with a fiber coupled NIR-diode laser spectrometer                 | 145   |

|  |  | Seite |
|--|--|-------|
| <i>J. Röpcke,<br/>L. Mechold,<br/>M. Käning,<br/>W. Y. Fan,<br/>P. B. Davies</i> | Diagnostics of Molecular Microwave Plasmas by Tunable IR Diode Laser Spectroscopy  | 155   |
| <i>R. J. Holdsworth,<br/>P. A. Martin</i>  | A Portable Near-IR Diode Laser System for Real-time Environmental Monitoring   | 165   |
| <i>M. Cinca,<br/>O. Bancea</i>   | Study concerning Polluting Emission by low Power Boilers with Gaseous Fuel   | 169   |
| <i>A. Popov,<br/>V. Sherstnev,<br/>Yu. Yakovlev,<br/>R. Mücke,<br/>P. Werle</i>  | Application of Antimonide Lasers to Formaldehyde Measurements at 3.5 $\mu\text{m}$   | 173   |
| <i>E. Morillon</i>   | Fast CO and NO Measurement on Exhaust Gases  | 177   |
| <i>K. Westphal,<br/>D. Helwig,<br/>B. Jonas</i>                                  | Database tool to analyse substances  | 181   |
| <i>O. Bjørøy,<br/>I. Linnerud,<br/>V. Avetisov,<br/>K. H. Haugholt</i>           | Simultaneous in-situ measurement of O <sub>2</sub> , HCl, HF, CO and dust in gas from a waste incinerator using diode laser spectroscopy             | 183   |
| <i>R. Mücke,<br/>P. Werle,<br/>K. Brenner</i>                                    | Application of Diode Laser Spectroscopy to Quality Control of Industrial Gas Mixtures  | 191   |
| <i>M. B. Frish,<br/>F. Klein</i>   | Trace Gas Monitors based on Tunable Diode Laser Technology: An Introduction and Description of Applications  | 201   |
| <i>V. Weiß,<br/>A. Fix,<br/>G. Ehret</i>   | Measurement of the air-induced pressure shift coefficients of water vapor lines in the range from 942 to 954 nm using an external cavity diode laser | 213   |

|   |   | Seite |
|---|---|-------|
| A. Henry,<br>D. Hurtmans,<br>A. Valentin,<br>C. Camy-Peyret   | Analysis of line profiles taking into account the intensity distribution within a TDL emission mode and precise concentration measurements of atmospheric air samples | 223   |
| M. Remennyi,<br>N. Zotova,<br>S. Karandashov,<br>N. Il'inskaya,<br>B. Matveev,<br>N. Stus',<br>G. Talalakin | Mesa-stripe diode lasers based on InGaAsSb(Gd)/InAsSbP DH for the 3-3.6 $\mu\text{m}$ spectroscopy  | 233   |
| H. Schlegelmilch,<br>A. Lambrecht,<br>T. Beyer,<br>M. Tacke   | Antireflection Coatings for lead Chalcogenide Lasers  | 237   |
| K. Sassenscheid,<br>J. Kastner,<br>M. Tacke   | Tuning properties of diode lasers using pulse-modulation-technique  | 243   |
| H. Linnartz,<br>Th. Speck,<br>J. P. Maier   | Tunable diode laser spectroscopy of molecular ions  | 247   |
| U. P. Schießl,<br>H. E. Wagner  | New improvements in IV-VI tunable laser diodes at Laser Components  | 251   |
| K. H. Gulden,<br>M. Moser,<br>S. Eitel,<br>D. Jeggle,<br>H. P. Schweizer                                    | Single mode tuning of vertical cavity surface emitting lasers   | 261   |
| T. Beyer,<br>A. Lambrecht,<br>M. Tacke  | Threshold current analysis for diode laser diagnostics  | 269   |
