Henry J. Cowan**

Group Secretary

Lynn S. Beedle

Contents

SC-1 Structural Systems

1.1	Introduction	3
1.2	Framing Systems to Resist Gravity Loads	4
	1 Horizontal Framing Systems—Floor Structures	6
	2 Vertical Framing Systems	20
1.3	Framing Systems to Resist Horizontal Loads	23
	1 Moment Resistant Frames	27
	2 Braced Frames	32
	3 Shear Walls	35
	4 Combination Systems	41
	5 New Structural Concepts	46
1.4	Energy Dissipation Systems	53
	1 Natural Damping of Structural Materials	53
	2 Plasticity of Structural Materials	54
	3 Highly Absorbent Structural Systems	54
	4 Artificially Increased Damping	55
	5 Advanced Foundation Design	58
	6 Aerodynamic Provisions	59
1.5	Condensed References/Bibliography	59

SC-2 Mechanical and Service Systems

Part 1—Heating, Ventilating, and Air Conditioning

2.1	General Overview	65
2.2	Conceptual Determinations	65
2.3	Load Determination	66
2.4	Subsystem Analysis	67
2.5	Occupancy Limitations	70
	1 Hours of Operation	70
	2 Special Requirements	70
	3 Security	70
2.6	Fire Management	71
2.7	Hydrostatic Considerations	82

2.8	Piping Considerations	82
	1 Expansion and Contraction	82
	2 Access	82
	3 Seismic Restraints	82
	4 Fire Stopping	83
	5 Loading	83
2.9	Stack Effect Considerations	83

Part 2—Plumbing and Fire Protection

2.10	Water Supply and Distribution	85
2.11	Drainage and Venting	87
2.12	Materials	89
2.13	Drinking Water	90
2.14	Condensed References/Bibliography	91

SC-3 Electrical Systems

3.1	Load Determination	95
3.2	Available Service Voltages	95
3.3	Service Equipment	99
3.4	Power Distribution Systems	102
	1 Simple-Radial System	104
	2 Loop-Primary Radial System	104
	3 Primary-Selective Radial System	105
	4 Loop-Secondary Network System	105
3.5	Lighting	106
3.6	Feeders	108
3.7	Grounding (Earthing)	111
3.8	Lightning Protection	112
3.9	Emergency Power	118
3.10	Fire Alarm System	120
3.11	Central Control of Mechanical Systems (Optimization)	121
3.12	Condensed References/Bibliography	124

SC-4 Vertical and Horizontal Transportation

4.1	General Overview	129
	1 People Movers	132
	2 Material Movers	133
	3 Challenge of the Future	133
4.2	People Movers	134
	1 Escalators and Moving Walks	134
	2 Passenger and Service Elevators	136
	3 Horizontal People Movers	175
4.3	Material Movers	181
	1 Commercial, Residential, and Institutional Buildings	181
	2 Industrial Buildings	184
4.4	Conclusion	186
4.5	Condensed References/Bibliography	186

SC-5 Cladding

5.1	Introduction	191
5.2	Cladding Materials and Systems	191
5.3	Curtain Walls	192
	1 Types of Curtain Walls	193
	2 Materials and Finishes	196
5.4	Testing	198
5.5	Structural/Architectural Interaction	202
5.6	Water Leakage	205
5.7	Air Infiltration	209
5.8	Condensation	210
5.9	Thermal Characteristics	212
5.10	Acoustical Performance	217
5.11	Fire Rating	218
5.12	Shading	219
5.13	Glass and Glazing	219
5.14	Sealants	222
5.15	Seismic Performance	223
5.16	Cleaning	225
5.17	Condensed References/Bibliography	226

SC-6 Partitions, Walls, and Ceilings

6.1	Interior Walls and Partitions	231
	1 Materials and Details	232
	2 Acoustics	234
	3 Fire Protection and Resistance	238
	4 Stack Effect	241
	5 Elevator Shafts	242
	6 Staircases	242
	7 Structural/Architectural Interaction	243
	8 Seismic Design	246
6.2	Ceilings	249
	1 Materials and Details	250
	2 Acoustics	252
	3 Fire Resistance	253
	4 Structural/Architectural Interaction	253
	5 Seismic Design	254
6.3	Condensed References/Bibliography	255

SC-7 Foundation Systems

7.1	Introduction	259
7.2	Subsurface Investigations	261
7.3	Design of Compensated Foundations	265
	1 Basic Concepts	265
	2 Effect of Construction Procedures	267
	3 Methods of Construction to Minimize Heave	272
	4 Foundation Structural Design Affecting Economy	274
	5 Case History	279

ial Buildings

7.4	Distribution of Wind Loads to Soil	281
	1 Basic Considerations	281
	2 Passive Soil Pressure	283
	3 Shear Along Base of Structure	286
	4 Lateral Resistance of Piles or Piers	288
	5 Batter Piles	291
	6 Combined Systems	292
	7 Stability Considerations	297
7.5	Effects of Foundations on Adjacent Structures	298
	1 Existing Structures	298
	2 Movements Caused by Excavation	301
	3 Movements Caused by Dewatering	305
	4 Movements Caused by Foundation Construction	307
7.6	Deep Foundations—Piles and Caissons	308
	1 Basic Concepts	308
	2 Pile Foundations	309
	3 Caisson Foundations	319
7.7	Soil-Structure Interaction	323
	1 Static Effects	324
	2 Dynamic Effects	327
	3 Measurement of Soil Properties	330
	4 Conclusions	331
7.8	Special Problems	331
7.9	Condensed References/Bibliography	336

SC-8 Construction Systems

8.1	Introduction	343
8.2	Control of the Construction Process	343
	1 Control During Design Phase	344
	2 Control of Subcontractors	349
	3 Control at Site	351
8.3	Safety	354
	1 Protection of Workers in Work Areas	354
	2 Protection of Public at Work Site	355
	3 Inspection Practices	355
8.4	Foundations	355
	1 Caissons	356
	2 Other Foundations	363
	3 Deep Excavations	364
	4 Tie-Backs or Ground Anchors	373
	5 Mined Excavation	378
	6 Underpinning	378
	7 Conclusion	378
8.5	Steel Construction	379
	1 Planning	379
	2 Fabrication	381
	3 Erection	387
	4 Construction Management	392
8.6	Concrete Construction	392
	1 Development of High-Rise Concrete Construction	392
	2 Concrete Placement	395
