

M. Bodanszky A. Bodanszky

The Practice of Peptide Synthesis

Second, Revised Edition

Springer-Verlag

Berlin Heidelberg New York London Paris

Tokyo Hong Kong Barcelona Budapest

Contents

I Introduction	1
II Protecting Groups	7
1 Introduction of Amine Protecting Groups	9
1.1 The <i>p</i> -Toluenesulfonyl Group	9
<i>p</i> -Toluenesulfonyl-L-isoleucine	9
1.2 Phthalyl (Phthaloyl, Pht) Amino Acids	10
Phthalyl-L-leucine	10
1.3 The Benzyloxycarbonyl Group	11
Benzyloxycarbonyl-L-proline	11
Benzyloxycarbonyl-L-leucine	11
<i>N</i> ^α -Benzyloxycarbonyl-L-arginine	12
Benzyloxycarbonyl-L-aspartic Acid β -Benzyl Ester	12
1.4 4-Methoxybenzyloxycarbonylamino Acids	14
1.5 The <i>tert</i> -Butyloxycarbonyl (Boc) Group	15
1.5.1 Introduction of the <i>tert</i> -Butyloxycarbonyl Group with 2- <i>tert</i> -Butyloxycarbonyloximino-2- phenylacetonitrile	15
<i>tert</i> -Butyloxycarbonyl-glycine	16
<i>tert</i> -Butyloxycarbonyl-L-tryptophan	16
1.5.2 Introduction of the <i>tert</i> -Butyloxycarbonyl Group with <i>tert</i> -Butyl Pyrocarbonate	17
1.6 The Biphenylisopropylloxycarbonyl (Bpoc) Group	18
Bpoc-L-leucine	18
Bpoc-L-leucine	19
1.7 The 9-Fluorenylmethyloxycarbonyl (Fmoc) Group	20
9-Fluorenylmethyl Chlorocarbonate	20
9-Fluorenylmethyloxycarbonyl-L-tryptophan	21
1.8 <i>o</i> -Nitrophenylsulfenylamino Acids	21
1.9 2-Trimethylsilylethyloxycarbonylamino Acids	22
4-Nitrophenyl-2-Trimethylsilylethyl Carbonate	22
2-Trimethylsilylethyloxycarbonyl-L-proline	23
1.10 Maleoylamino Acids and Maleoyl-Peptides	24
<i>N</i> -Methoxycarbonylmaleimide	24

Maleoyl-glycine	24
Maleoyl Peptides	25
1.11 Triphenylmethyl-amino Acids	26
Trityl-L-leucine	26
<i>N</i> -Trityl Amino Acids	27
2 Blocking of the α -Carboxyl Group	28
2.1 Methyl Esters	28
2.2 Ethyl Esters	29
2.2.1 Esterification with the Help of Gaseous HCl	29
L-Tyrosine Ethyl Ester	29
2.2.2 Esterification Catalyzed by <i>p</i> -Toluenesulfonic Acid	30
L-Methionine Ethyl Ester <i>p</i> -Toluenesulfonate	30
2.3 Benzyl Esters	30
Glycine Benzyl Ester <i>p</i> -Toluenesulfonate	30
<i>tert</i> -Butyloxycarbonyl-L-asparagine Benzyl Ester	31
L-Glutamic Acid α -Benzyl Ester	32
2.3.1 Polymeric Benzyl Esters	33
Hydroxymethyl-Polymer	33
<i>tert</i> -Butyloxycarbonyl-glycyl Resin	33
Benzyloxycarbonyl-L-isoleucyl-Polymer	34
2.4 4-Nitrobenzyl Esters	34
L-Alanine-4-Nitrobenzyl Ester <i>p</i> -Toluenesulfonate	34
2.5 4-Methoxybenzyl Esters of <i>N</i> ^z -Protected Amino Acids	35
Benzyloxycarbonylglycine 4-Methoxybenzyl Ester	35
2.6 Benzhydryl Esters (Diphenylmethyl Esters)	36
2.7 Phthalimidomethyl Esters	37
2.8 <i>tert</i> -Butyl Esters	38
Addition of <i>N</i> ^z -Acylamino Acids to Isobutylene	38
L-Proline <i>tert</i> -Butyl Ester	38
Transesterification with <i>tert</i> -Butyl Acetate	39
Esterification of Free Amino Acids through Acid Catalyzed Addition to Isobutylene	39
L-Tyrosine <i>tert</i> -Butyl Ester	39
2.9 Phenacyl Esters	40
Benzyloxycarbonylglycine Phenacyl Ester	40
2.10 2-Trimethylsilylethyl Esters	41
2.11 4-Picolyl Esters	41
Benzyloxycarbonyl-L-phenylalanine 4-Picolyl Ester	41
Benzyloxycarbonyl-L-valine 4-Picolyl Ester	42
2.12 9-Fluorenylmethyl Esters	43
<i>tert</i> -Butyloxycarbonyl-L-phenylalanine 9-Fluorenylmethyl Ester	43
2.13 2-Benzyloxyphenyl Esters	44
L-Alanine 2-Benzyloxyphenyl Ester Hydrochloride	44

2.14	Phenyl Esters	45
2.15	Allyl Esters	45
3	Protection of Side Chain Functions	47
3.1	Serine Ethers	47
	<i>N</i> - <i>tert</i> -Butyloxycarbonyl- <i>O</i> -benzyl-L-Serine Cyclohexylammonium Salt	47
3.2	Ethers of Threonine	48
	<i>O</i> - <i>tert</i> -Butyl-L-threonine	48
3.3	Tyrosine Ethers	50
	<i>O</i> -Benzyl-L-tyrosine	50
3.4	Acylation of the ϵ -Amino Group of Lysine	51
	<i>N</i> $^{\epsilon}$ -Trifluoroacetyl-lysine	51
	<i>N</i> $^{\epsilon}$ - <i>p</i> -Toluenesulfonyl-L-lysine	52
3.5	Protection of the Guanidino Group of Arginine	53
	Nitro-L-arginine	53
	<i>N</i> $^{\alpha}$ -Benzyloxycarbonyl- <i>N</i> G - <i>p</i> -toluenesulfonyl-L-arginine <i>N</i> $^{\alpha}$ -Benzyloxycarbonyl- <i>N</i> $^{\delta}$, <i>N</i> $^{\omega}$ -bis- (1-adamantyloxycarbonyl)-L-arginine	54
	<i>N</i> $^{\alpha}$ -4-Methoxybenzyloxycarbonyl- <i>N</i> G -mesitylene- sulfonyl-L-arginine Cyclohexylammonium Salt	57
	<i>N</i> G -4-Methoxy-2,3,6-trimethylbenzenesulfonyl-L- arginine	57
3.6	Masking the Imidazole in Histidine	59
3.6.1	<i>N</i> im - <i>p</i> -Toluenesulfonyl-L-histidine	59
	<i>N</i> $^{\alpha}$ -Benzyloxycarbonyl- <i>N</i> im -tosyl-L-histidine	59
3.6.2	<i>N</i> $^{\alpha}$ - <i>tert</i> -Butyloxycarbonyl- <i>N</i> $^{\alpha}$ -benzyloxymethyl-L- histidine	60
3.6.3	<i>N</i> im -Trityl-L-histidine	62
3.7	Blocking of the Indole Nitrogen in Tryptophan	62
	<i>N</i> im -Formyl-L-tryptophan	62
3.8	Protection of Side Chain Carboxyl Groups	63
	L-Aspartic Acid β -Benzyl Ester (β -Benzyl-L-aspartate)	63
	L-Glutamic Acid γ - <i>tert</i> -Butyl Ester	64
3.9	Protection of the Carboxamide Function	65
	Introduction of the 4,4'-Dimethoxybenzhydryl Group	65
3.10	Blocking the Sulfhydryl Group in Cysteine	66
	<i>S</i> -Benzyl-L-cysteine	66
	<i>S</i> -Ethylcarbamoyl-L-cysteine	67
	<i>S</i> -Acetamidomethyl-L-cysteine	68
	<i>S</i> -Triphenylmethyl-L-cysteine (<i>S</i> -Trityl-L-cysteine)	68
	<i>N</i> - <i>tert</i> -Butyloxycarbonyl- <i>S</i> -(3-nitro-2-pyridinesulfenyl)- L-cysteine	69
	<i>S</i> - <i>tert</i> -Butyl-L-cysteine hydrochloride	71
3.11	Protection of the Thioether in Methionine	72

L-Methionine Sulfoxide	72
<i>N</i> - <i>tert</i> -Butyloxycarbonyl- <i>S</i> -methyl-L-methionine <i>p</i> -Nitrophenyl Ester <i>p</i> -Toluenesulfonate	72
III Activation and Coupling	75
1 The Acid Chloride Procedure	77
<i>p</i> -Toluenesulfonyl-L-isoleucyl-glycine Ethyl Ester	77
<i>p</i> -Toluenesulfonyl-L-isoleucyl-L-glutaminy-L-asparagine	77
2 The Azide Process	79
2.1 Peptide Hydrazides Through Hydrazinolysis of Peptide Esters	79
<i>N</i> -Benzyloxycarbonyl- <i>S</i> -benzyl-L-cysteinyl-L-seryl-L- histidine Hydrazide.	79
2.2 Preparation of Peptide Hydrazides from Carboxylic Acids	80
<i>tert</i> -Butyloxycarbonyl- β -benzyl-L-aspartyl-L-leucyl-L- <i>N</i> ^{ϵ} -benzyloxycarbonyl-lysine Hydrazide	80
2.3 Protected Hydrazides	81
<i>N</i> -Benzyloxycarbonyl-L-prolyl-glycyl- <i>N'</i> - <i>tert</i> - butyloxycarbonyl-hydrazine.	81
<i>N</i> -Benzyloxycarbonyl-glycyl-glycyl- <i>N'</i> - <i>tert</i> -butyloxy- carbonyl-hydrazine.	81
Glycine Benzyloxycarbonylhydrazide Trifluoroacetate.	82
2.4 Conversion of Hydrazides to Azides and Coupling with Azides.	83
2.4.1 Generation of the Azide with the Aid of Sodium Nitrite and Coupling	83
Benzyloxycarbonyl-L-seryl-L-tyrosyl-L-seryl-L- methionyl- γ -benzyl-L-glutamic Acid	83
2.4.2 Conversion of a Hydrazide to the Azide with the Aid of Butyl Nitrite and Acylation with the Azide "In Situ"	84
Benzyloxycarbonyl-L-tyrosyl-L-isoleucyl-L- glutaminy-L-asparaginy-L- <i>S</i> -benzyl-L-cysteinyl-L- prolyl-L-leucyl-glycinamide.	84
2.4.3 Conversion of Protected Amino Acid or Peptide Hydrazides to the Azides Followed by Acylation with the Isolated Azide	85
3 Symmetrical Anhydrides.	87
<i>tert</i> -Butyloxycarbonyl-L-phenylalanine Anhydride	87
4 Mixed Anhydrides	89

4.1	The Isovaleric Acid Mixed Anhydride Method	89
	Benzyloxycarbonyl-L-leucyl-glycine Ethyl Ester	89
4.2	Trimethylacetic Acid (Pivalic Acid) Mixed Anhydrides. Benzyloxycarbonyl- α -methylalanyl- α -methylalanine Methyl Ester	90
	N^z -Benzyloxycarbonyl- N^e - <i>p</i> -toluenesulfonyl-L- lysylglycine Ethyl Ester	91
4.3	The Ethyl Carbonate Mixed Anhydride Method	92
	Benzyloxycarbonyl-L-leucyl-glycine Ethyl Ester	92
4.4	Isobutylcarbonic Acid Mixed Anhydrides	93
	Benzyloxycarbonyl-glycyl-L-phenylalanyl-glycine Ethyl Ester.	93
4.5	Coupling with the Aid of <i>o</i> -Phenylene Phosphorochloridite	94
	Preparation of <i>N</i> -Benzyloxycarbonyl- <i>S</i> -benzyl-L-cysteinyl- L-tyrosyl-L-isoleucyl-L-glutaminy-L-asparaginy-L- <i>S</i> -benzyl- L-cysteinyl-L-prolyl-L-leucyl-glycine Amide	94
5	Preparation of Active Esters.	96
5.1	Cyanomethyl Esters	96
	<i>N</i> -Benzyloxycarbonyl- <i>S</i> -benzyl-L-cysteine Cyanomethyl Ester	96
5.2	Preparation of <i>p</i> -Nitrophenyl Esters	97
	Benzyloxycarbonyl-L-phenylalanine <i>p</i> -Nitrophenyl Ester	97
5.3	<i>o</i> -Nitrophenyl Esters.	98
	<i>tert</i> -Butyloxycarbonyl-glycine <i>o</i> -Nitrophenyl Ester . . .	98
5.4	2,4-Dinitrophenyl Esters.	99
	<i>N</i> -Benzyloxycarbonyl-L-threonine 2,4-Dinitrophenyl Ester	99
5.5	2,4,5-Trichlorophenyl Esters	100
5.6	Pentachlorophenyl Esters	101
	Benzyloxycarbonyl-glycyl-L-phenylalanine Pentachlorophenyl Esters	101
5.7	Pentafluorophenyl Esters	102
	Benzyloxycarbonyl-glycyl-L-phenylalanine Pentafluorophenyl Ester.	102
	<i>tert</i> -Butyloxycarbonylamino Acid Pentafluorophenyl Esters.	103
5.8	<i>N</i> -Hydroxyphthalimide Esters	103
5.9	<i>N</i> -Hydroxysuccinimide Esters	104
	<i>tert</i> -Butyloxycarbonyl-L-alanine <i>N</i> -Hydroxysuccinimide Ester	104
5.10	1-Hydroxypiperidine Esters.	105
	Benzyloxycarbonyl-L-leucine 1-Hydroxypiperidine Ester	105
5.11	Esters of 5-Chloro-8-Hydroxy-Quinoline	106

6	Coupling with Active Esters	108
6.1	Coupling in Organic Solvents	108
6.1.1	Acylation with Cyanomethyl Esters	108
	<i>N</i> -Benzyloxycarbonyl- <i>S</i> -benzyl- <i>L</i> -cysteinyl- <i>L</i> -tyrosine	108
6.1.2	Chain Lengthening with <i>p</i> -Nitrophenyl Esters. . .	109
	Benzyloxycarbonyl- <i>L</i> -asparaginy- <i>L</i> -benzyl- <i>L</i> -cysteinyl- <i>L</i> -prolyl- <i>L</i> -leucyl-glycinamide	109
6.1.3	Acylation with <i>N</i> -Hydroxysuccinimide Esters . . .	110
	<i>tert</i> -Butyloxycarbonyl-glycyl- <i>L</i> -phenylalanyl-glycine Ethyl Ester	110
	Benzyloxycarbonyl- <i>L</i> -phenylalanyl- <i>L</i> -tyrosine Ethyl Ester	111
6.1.4	Coupling with 2,4-Dinitrophenyl Esters	112
	Benzyloxycarbonyl- <i>L</i> -threonyl- <i>L</i> -alanyl- <i>L</i> -alanyl- <i>L</i> -alanine Ethyl Ester	112
6.2	Coupling in Organic-Aqueous Media	113
6.2.1	Acylation with <i>p</i> -Nitrophenyl Esters	113
	Benzyloxycarbonyl- <i>L</i> -phenylalanyl-glycyl- <i>L</i> -proline	113
6.2.2	Acylation with <i>N</i> -Hydroxysuccinimide Esters . . .	114
	Benzyloxycarbonyl-glycyl- <i>L</i> -proline	114
	Benzyloxycarbonyl- <i>L</i> -prolyl-glycine	114
6.3	Catalysis of Active Ester Reactions	115
6.3.1	Catalysis with Imidazole	115
	Benzyloxycarbonyl- <i>L</i> -prolyl- <i>L</i> -tyrosine Methyl Ester	115
6.3.2	Catalysis with 1-Hydroxybenzotriazole	116
	Benzyloxycarbonyl- <i>L</i> -leucyl- <i>L</i> -valinamide.	116
6.3.3	Catalysis with 3-hydroxy-3,4-dihydro-quinazoline-4-one	116
	Benzyloxycarbonyl- <i>L</i> -isoleucyl-glycinamide	116
7	Peptide Bond Formation with the Aid of Coupling Reagents	118
7.1	The Dicyclohexylcarbodiimide (DCC, DCCI) Method	118
7.1.1	Coupling with DCC	118
	<i>N</i> -Phthaloyl- <i>L</i> -threonyl- <i>L</i> -phenylalanine Methyl Ester	118
7.1.2	Coupling with Carbodiimides in the Presence of 1-Hydroxybenzotriazole	119
	<i>tert</i> -Butyloxycarbonyl- <i>L</i> -leucyl- <i>L</i> -phenylalanine Methyl Ester	119
7.1.3	Coupling with Dicyclohexylcarbodiimide in the Presence of <i>N</i> -Hydroxysuccinimide	120
	Phthalyl- <i>L</i> -phenylalanyl- <i>L</i> -valyl- <i>L</i> -glutaminy- <i>L</i> -	

	tryptophyl-L-leucyl-L-methionyl-L-asparaginyll- <i>O</i> - <i>tert</i> -butyl-L-threonine <i>tert</i> -Butyl Ester	120
	<i>N</i> -Benzyloxycarbonyl- <i>O</i> - <i>tert</i> -butyl-L-tyrosyl-L- leucyl- β - <i>tert</i> -butyl-L-aspartic Acid Methyl Ester.	121
7.2	Coupling with 1-Isobutyloxycarbonyl-2-isobutyloxy- 1,2-dihydroquinoline (IIDQ)	121
	Benzyloxycarbonyl-L-alanyl-L-tyrosine Methyl Ester	121
7.3	The Carbonyldiimidazole Method	122
	Benzyloxycarbonyl-glycyl-L-tyrosine Ethyl Ester	122
7.4	Coupling with <i>N</i> -Ethyl-5-phenylisoxazolium-3'- sulfonate.	123
	<i>N</i> ^{α} , <i>N</i> ^{ϵ} -Dibenzoyloxycarbonyl-L-lysyl-glycine Ethyl Ester	123
7.5	Coupling with 1-Benzotriazolyl-tri-dimethylamino- phosphonium Hexafluorophosphate (BOP-Reagent)	124
7.6	<i>O</i> -Benzotriazolyl-tetramethyluronium Hexafluorophosphate	125
	Preparation of the HBTU-Reagent	125
	Coupling with HBTU	125
IV	Removal of Protecting Groups.	127
1	Hydrogenation	129
1.1	Hydrogenolysis of Benzyl Esters, Benzyl Ethers and of the Benzyloxycarbonyl Group	129
	L-Prolyl-L-leucyl-glycinamide	129
1.2	Catalytic Hydrogenation of Methionine Containing Peptides	131
	Benzyloxycarbonyl-glycyl-L-tryptophyl-L-methionyl- β - <i>tert</i> -butyl-L-aspartyl-L-phenylalanine Amide.	131
1.3	Transfer Hydrogenation with 1,4-Cyclohexadiene as Hydrogen Donor	133
	<i>N</i> ^{ϵ} - <i>tert</i> -Butyloxycarbonyl-L-lysyl- <i>O</i> - <i>tert</i> -butyl-L- threonine Methyl Ester	133
2	Reduction with Sodium in Liquid Ammonia.	135
	L-Glutaminyl-L-asparagine	135
3	Removal of the Phthalyl (Phthaloyl) Group by Hydrazinolysis Glycyl-glycine.	137
4	Acidolysis	138
4.1	Hydrobromic Acid in Acetic Acid	138
	Glycyl-L-phenylalanine Benzyl Ester Hydrobromide	138
	<i>S</i> -Benzyl-L-cysteinyl-L-prolyl-L-leucyl-glycinamide	138
4.2	Hydrobromic Acid in Trifluoroacetic Acid	140
	α -Melanotropin	140

4.3	Hydrochloric Acid in Acetic Acid	141
	Nitro-L-arginyl-copolymer	141
4.4	Trifluoroacetic Acid	142
	L-Methionyl-L-glutaminyl-L-histidyl-L-phenylalanyl-L-arginyl-L-tryptophyl-glycinamide Acetate.	142
4.5	Removal of Protecting Groups with Trifluoroacetic Acid-Thioanisole	144
	Porcine Vasoactive Intestinal Peptide	144
4.6	Liquid Hydrogen Fluoride	145
	Oxytocin	145
5	Hydrolysis	148
5.1	Base Catalyzed Hydrolysis of Alkyl Esters (Saponification with Alkali).	148
	<i>N</i> -Benzyloxycarbonyl- <i>S</i> -benzyl-L-cysteinyl-L-tyrosine.	148
5.2	Acid Catalyzed Hydrolysis	149
	Phthalyl-L-phenylalanyl-glycine	149
5.3	Enzyme Catalyzed Hydrolysis	150
5.3.1	Enzymatic Removal of the Phenylacetyl Group from the ϵ -Amino Group of Lysine Residues.	150
	Partial Deprotection of a Dipeptide Derivative	150
	Desamino Lysine Vasopressin	150
5.3.2	Chymotrypsin Catalyzed Hydrolysis of Alkyl Esters	151
	L-Prolyl-L-phenylalanine	151
	Benzyloxycarbonyl-L-valyl-L-tyrosine	152
6	Base Catalyzed Elimination.	153
6.1	Removal of the 9-Fluorenylmethyloxycarbonyl (Fmoc) Group	153
	9-Fluorenylmethyloxycarbonyl-L-asparaginyl- <i>S</i> -benzyl-L-cysteinyl-L-prolyl-L-tryptophyl-glycinamide	153
6.2	Cleavage of 9-Fluorenylmethyl Esters.	155
	L-Leucyl-L-phenylalanine	155
7	Nucleophilic Displacement	156
7.1	Removal of the <i>o</i> -Nitrobenzenesulfonyl (Nps) Group.	156
	<i>N</i> ^{ϵ} - <i>tert</i> -butyloxycarbonyl-L-lysyl-L-leucyl-L-phenylalanyl- <i>N</i> ^{ϵ} - <i>tert</i> -butyloxycarbonyl-L-lysyl- <i>N</i> ^{ϵ} - <i>tert</i> -butyloxycarbonyl-L-lysine	156
7.2	Cleavage of 2-Trimethylsilylethyl Esters with Fluorides <i>N</i> -Benzyloxycarbonyl- <i>O</i> - <i>tert</i> -butyl-L-threonine	157
8	Iodolysis	159
	Removal of the <i>S</i> -Trityl Group by Iodolysis with Concomitant Oxidation to the Disulfide	159
9	Reduction of Methionine Sulfoxide Containing Peptides.	161
	L-Prolyl-L-tyrosyl- <i>N</i> ^{ϵ} -tosyl-L-lysyl-L-methionine.	161

V Special Procedures	163
1 Ammonolysis of Esters.	165
1.1 Conversion of a Peptide Ethyl Ester to the Corresponding Amide	165
Benzyloxycarbonyl-L-prolyl-L-leucyl-glycinamide	165
1.2 Ammonolysis of Active Esters	166
Benzyloxycarbonyl-L-asparagine amide	166
2 Transesterification	167
2.1 Cleavage of the Ester Bond Between Peptide and Polymeric Support by Transesterification Followed by Hydrolysis	167
Benzyloxycarbonyl-L-alanyl-L-phenylalanine.	167
3 Cyclization.	169
3.1 Cyclization Through the Formation of a Disulfide Bond	169
Desamino-oxytocin.	169
3.2 Ring Closure Through an Amide Bond.	170
Ditosyl-gramicidin S	170
Desthiomalformin	171
4 Polycondensation.	173
4.1 <i>N</i> -Carboxyanhydrides	173
<i>N</i> ^ε -Benzyloxycarbonyl- <i>N</i> ^α -carboxy-L-lysine Anhydride	173
4.2 Poly- <i>N</i> ^ε -benzyloxycarbonyl-L-lysine.	174
4.3 Synthesis of Sequential Peptides by Polycondensation	175
Poly (L-lysyl-L-alanyl-L-alanine) Trifluoroacetate	175
5 Partial Synthesis	178
Human Insulin	178
Zinc Free Insulin	178
<i>N</i> ^{A1} , <i>N</i> ^{B1} -Di- <i>tert</i> -butyloxycarbonyl-B(23-30)-desocta- peptide Insulin, (Boc) ₂ -DOI.	179
Human Insulin Through Condensation with Dicyclohexylcarbodiimide.	179
Human Insulin via Enzyme-Catalyzed Coupling	179
 VI Models for the Study of Racemization	 181
1 Benzoyl-leucyl-glycine Ethyl Ester	183
2 The Anderson-Callahan Test	184
Benzyloxycarbonyl-glycyl-L-phenylalanyl-glycine Ethyl Ester	184
3 Acylation with Acetyl-L-isoleucine.	186
Acetyl-L-isoleucine	186

Acetyl-L-isoleucyl-glycine Ethyl Ester and Acetyl-D-alloisoleucyl-glycine Ethyl Ester	186
4 The Izumiya-Muraoka Model	189
Glycyl-alanyl-leucine	189
5 Synthesis and Enantioselective Enzymic Hydrolysis of Tetraalanine	191
VII Reagents for Peptide Synthesis	193
1 <i>tert</i> -Butyl Azidoformate	195
<i>tert</i> -Butyl Phenyl Carbonate	195
<i>tert</i> -Butyl Carbazate	195
<i>tert</i> -Butyl Azidoformate	196
2 1-Adamantyl Chlorocarbonate	197
3 1-Isobutyloxycarbonyl-2-isobutyloxy-1,2-dihydroquinoline (IIDQ)	198
4 Diphenyl Phosphorazidate (Diphenylphosphoryl Azide, DPPA)	199
5 3-Hydroxy-3,4-dihydroquinazoline-4-one (4-Hydroxyquinazoline 3-oxide)	200
2-Aminobenzhydroxamic Acid	200
3-Hydroxy-3,4-dihydroquinazoline-4-one	200
6 1-Hydroxybenzotriazole	201
7 Ethyl 2-hydroximino-2-cyanoacetate	202
8 1-Guanyl-3,5-dimethyl-pyrazole Nitrate	203
VIII Appendix	205
1 Conversion of Dicyclohexylammonium Salts of Protected Amino Acids to the Free Acids.	207
<i>N</i> - <i>o</i> -Nitrobenzenesulfonyl- <i>O</i> - <i>tert</i> -butyl-L-threonine <i>N</i> -hydroxysuccinimide Ester	207
2 Preparation of Analytical Samples	208
2.1 Elemental Analysis	208
2.2 Amino Acid Analysis	208
2.3 NMR Spectra	210
Subject Index	211
