CONTENTS

PREFACE	v
1. INTRODUCTION AND SUMMARY	1
2. THEORY OF CORE INFLATION	7
Core, Demand, and Shock Inflation	7
Shocks and the Noninflationary Unemployment Rate	10
The Noninflationary and the Natural Unemployment Rates	11
Tracing the Sources of the Inflation Process	12
3. CORE INFLATION: ECONOMETRIC MODEL	13
Measuring the Core Inflation	13
The Shock Inflation Rate	17
The Demand Inflation Rate	20
An Empirical Test	22
The Inflation Impulse Curve	22
4. HISTORICAL REVIEW OF CORE INFLATION	24
Core Inflation at the End of the 1950s	24
Ending Core Inflation: Balanced Growth of the Early 1960s	26
Core Inflation Begins Again, 1966-70	28
Slow Deterioration, 1970-73	30
Core Inflation Explodes, 1974-79	31
5. ENERGY AND CORE INFLATION	35
Energy Shocks and the Development of Core Inflation	35
Energy and the Future of Core Inflation	37
Conclusion	41
6. IMPROVING CORE INFLATION: LIMITS OF DEMAND MANAGEMENT IN A WORLD OF SHOCKS	43
Baseline Prospects for the Economy	43
Limits of Demand Management	46
Conclusion	49
7. REDUCING CORE INFLATION THROUGH HIGHER CAPITAL FORMATION AND BETTER PRODUCTIVITY	50
Corporate Tax Incentives	50
A More Generous Investment Tax Credit	51
More Liberal Depreciation	53
The Combined Policy	53

8. POLICIES TO BRING CORE INFLATION DOWN TO 5%	59
Case 1: Demand Management Only	60
Case 2: Corporate Tax Incentives to Boost Investment	63
Case 3: Corporate Investment Incentives Plus Stability of Energy Prices	65
Comparisons Summary	68
9. PRICE EXPECTATIONS AND CORE INFLATION	72
The Rational Expectations Viewpoint	73
Price Expectations in the Wage Equation: Has Learning Speeded Up?	75
Another Test of the Speed of Formation of Price Expectations	79
Conclusion on Wages	80
Price Expectations for Long-Term Interest Rates	80
Change in Regime?	83
Conclusion	84
10. SUPPLY IN THE DRI QUARTERLY ECONOMETRIC MODEL OF THE U.S. ECONOMY	86
Return of Supply Economics	86
Supply Features of the DRI Model	88
The Supply of Labor	91
The Supply of Physical Capital	94
The Supply of Energy	94
The Supply of Materials	96
The Supply of R&D	97
The Aggregate Production Function: Potential GNP	97
Industrial Capacity and Other Supply Effects	99
11. WILL CORE INFLATION COME DOWN?	102
The Demand Issues	102
"Full-Employment" and "Natural" Unemployment Rates	102
The Noninflationary Unemployment Rate	104
Prospects for Demand Management	104
More Instability?	105
The Shock Issues	106
The Prospect for Labor Costs	107
The Prospect for Capital Costs	108
Could We Do Better? Some Open Issues	108
New Types of Policies?	110
