CONTENTS

<i>Preface</i>	xi
<i>Introduction</i>	1
I. The question	1
II. The history of the problem	2
III. Ethics and the law	4
IV. Ethics and public policy analysis	5
V. The method	7
VI. The plan	9
Part one Theory	15
Chapter 1: Competence and incompetence	17
I. The concept of competence	18
A. Competence as decision-relative	18
B. Global conceptions of competence	20
II. Capacities needed for competence	23
III. Competence as a threshold concept, not a comparative one	26
IV. Standards of competence: Underlying values	29
A. Promotion of individual well-being	29
B. Respect for individual self-determination	36
C. Conflict between the values of self-determination and well-being	40
V. Contrast with a single value foundation – individual self-determination as sovereign	41
VI. Deciding on standards of competence	47
VII. Different standards of competence	48
A. A minimal standard of competence	49
B. An outcome standard of competence	49
C. A process standard of decision-making competence	50
VIII. Relation of the process standard of competence to expected harms and benefits	51
Table 1.1: Decision-making competence and patient well-being	53
IX. Relation of refusal of treatment to determination of incompetence	57

X.	Contrast with a fixed minimum threshold conception of competence	59
XI.	A two-step model of patient decision-making authority – the competence of the decision-maker and the rationality of his or her choice	65
XII.	Operational measures in the medical setting	70
	A. Use of formal tests to determine competence	71
	B. Importance of informal evaluations of competence	73
XIII.	Competence determinations in nonmedical settings	75
XIV.	Varying standards of competence	77
	A. Difficulties raised by determinations regarding the incompetent's finances	78
XV.	The need for institutional policies for the determination of competence	80
XVI.	Summary of conclusions concerning competence	84
Chapter 2: The primary ethical framework: patient-centered principles		87
I.	The need for an ethical framework	87
II.	Underlying ethical values	89
	A. The scope of the competent patient's right to refuse treatment	90
	B. Limitations on the competent person's right to refuse care or treatment	92
III.	Guidance principles	93
IV.	Conflicts among guidance principles	96
V.	The advance directive principle	98
	A. The case against always giving priority to advance directives	101
	1. Practical problems	101
	2. Moral objections	103
	B. Conclusions: The scope and limits of the moral authority of advance directives	110
VI.	The substituted judgment standard	112
VII.	Scope and limits of the moral authority of substituted judgment	117

VIII.	The best interest principle	122
A.	Beyond the scope of the best interest principle: Permanently unconscious patients	126
B.	The individual's interest in the good of others	132
C.	The dependence of the patient's well-being on institutional options and others' interest in the patient	133
IX.	Authority principles: Who should decide?	134
A.	The family as decision-maker	136
B.	Disagreements within the family	138
C.	Physicians and judges as decision-makers	139
X.	Intervention principles: Attempts to specify conditions that rebut the presumptive authority of the family	142
A.	Challenges to the family as decision-maker	147
B.	The institutional ethics committee	148
Chapter 3: Advance directives, personhood, and personal identity		152
I.	The value of advance directives	152
II.	The moral authority of advance directives	152
III.	Loss of personal identity	154
IV.	How much psychological continuity is enough?	159
V.	Surviving interests	162
VI.	The distinction between the surviving interests of a self that no longer exists and the surviving interests in the persisting self	165
VII.	Attempts to raise the threshold for psychological continuity	169
VIII.	A compromise position	178
IX.	Conclusions concerning personal identity	184
Chapter 4: Distributive justice and the incompetent		190
I.	The need to qualify the patient-centered approach	190

II.	The relevance of guidance principles to questions of distributive justice	191
III.	Incompetence, moral status, and rights of distributive justice	193
	A. The permanently unconscious: Minimal interests	194
	B. The severely and permanently demented: Truncated interests	196
IV.	Rationing health care: The role of physicians and surrogates deciding for incompetents	200
V.	The moral responsibility of families toward elderly incompetent individuals	207
Part two Application		213
Chapter 5: Minors		215
I.	Noninfant minors	216
	A. The current legal presumption of incompetence	216
	B. The concept of competence	217
	C. The developmental evidence about children's decision-making capacities	218
	D. Determining a standard of competence	224
	E. The values at stake in the competence determination	225
	F. The child's well-being	226
	G. The child's self-determination	229
	H. The parents' interest in making decisions concerning their children	232
	I. Children's competence and children's decisional authority	234
	J. The legitimate interests of parents and the best interest principle	235
	K. The variable standard of competence	237
	L. Implications for medical practice and legal policy regarding children's competence	240
II.	Newborns	246
	A. The correct guidance principle: Best interest, not substituted judgment	246

B.	The nature of the infant's interests	247
C.	The interests of others	259
D.	The fundamental moral status of infants: A radical challenge to the decision- making framework	260

Chapter 6: The elderly **267**

I.	The magnitude of the problem	267
	Table 6.1: Share of U.S. population over 64 years of age, 1900, 1940, 1960, 1975, and 2000	269
	Table 6.2: Distribution of U.S. elderly population by age-group, 1950, 1975 and 2000	269
II.	How incompetence is determined, formally and informally, and by whom, in various settings	271
	A. Determining competence to make medical decisions	272
	B. Formal determinations of incompetence for decisions concerning finances and places of residence	280
III.	How surrogates actually decide for those elderly individuals who are considered to be incompetent	289
IV.	Some important trends in recent case law	290
V.	Advance directives and other planning approaches: Who uses them and how effec- tive are they?	295
	A. Living wills	296
	B. Durable powers of attorney	297
	1. General durable power of attorney	297
	2. Durable power of attorney for health care	298
VI.	Summary	306

Chapter 7: The mentally ill **311**

I.	Decisions about involuntary hospitalization or commitment	312
	A. The historical context of involuntary commitment	312

B.	Patient-centered commitment – danger to self versus need for care and treatment	317
C.	Society-centered commitment – dangerousness to others	325
II.	Decisions to refuse treatment by involuntarily committed patients	332
A.	The historical context of treatment refusal by involuntarily committed patients	332
B.	An ethical framework for treatment refusal by involuntarily committed mental patients	336
1.	Persons dangerous to others	336
2.	Persons dangerous to themselves or in need of care and treatment	342
III.	Some residual issues in decisions for the mentally ill	347
A.	The least restrictive alternative condition	347
B.	Advance directives by the mentally ill	350
C.	Involuntary outpatient commitment	358
D.	Special limits on surrogate consent for “inhumane” treatments	361
	<i>Looking forward</i>	366
	<i>Appendix one: Living trust and nomination of conservatorship</i>	370
	<i>Appendix two: Durable power of attorney for health care</i>	374
	<i>Notes</i>	387
	<i>Index</i>	413
