## CONTENTS

EDITORS' INTRODUCTION	1
<b>PART 1: GENERAL ASPECTS</b>	
VIEWS ON MICROANALYTIC SIMULATION MODELING	9
Guy Orcutt	
1 Modeling in Support of Policy	9
2 Microanalytic Simulation Modeling	11
2.1 The Need	11
2.2 Statistical Form and Estimation of Operating Characteristics	14
2.3 Representation of State	17
2.4 Relation to Transitional Matrix Modeling	19
2.5 Other Related Developments	20
2.5.1 Microbased Social Accounting	20
2.5.2 Evolutionary Modeling	21
3 Microanalytic Simulation	21
3.1 Simulation	21
3.2 Sample Representation	22
3.3 Monte Carlo Simulation	23
3.4 Controlling Monte Carlo Variation in Explorations of Model Implications	24
3.5 Output Possibilities	25
4 Concluding Statement	26
COMMENT	27
Heinz P. Galler	
POTENTIAL AND LIMITATIONS OF MICROSIMULATION MODELS	31
Hans-Jürgen Krupp	
1 Microsimulation Models as an Instrument for Policy Evaluation	31
2 The Fundamental Principle of Microsimulation	31
3 Potential of Microsimulation Models	33
4 Limitations of Microsimulation Models	35
5 Microsimulation Models and Policy Evaluation	39
6 Aspects of the Further Development of Microsimulation Models	41
COMMENT	42
Nelson McClung	

VIII

REQUISITE RESEARCH ON METHODS AND TOOLS FOR  
MICROANALYTIC SIMULATION MODELS 45

Peter Hoschka

2	Shortcomings of Micromodels	46
3	Behavioral Hypotheses	47
4	The Dynamics of Behavioral Changes	48
5	Effects of Higher Order	48
6	Quality and Accessibility of Data	49
7	Time Required for Development	50
8	Computing Capacity Required	51
9	Quality of Prediction	52
10	Complexity	52
11	Micromodels and Artificial Intelligence	53
12	Conclusions	54

COMMENT 55

Harold Beebout

BROADENING POLICY MODELS:  
ALTERNATIVE STRATEGIES 59

Steven B. Caldwell

1	Introduction	59
2	Purpose of the Paper: To Assess Four Modeling Strategies	60
3	Desirable Features for Policy Models	61
	3.1 Detailed Locational Identification	61
	3.2 Both Individual and Corporate Actors Should Be Fundamental Elements	62
	3.3 Individual and Corporate Actors Should Interact; Actors Should Alter Settings; Settings Should Influence Actors	63
	3.4 Behavioral Heterogeneity Should Be Represented	64
	3.5 Distributional Outcomes Should Be Represented	65
	3.6 Models Should Be Genuinely Dynamic: Both System Evolution and Individual Life Histories Should Be Generated	65
4	Multidimensional Mathematical Demography	65
5	Econometric Models with Disaggregated Population Sectors	67
6	The Linked Models Strategy	70
7	The Pure Micro Strategy	72
	7.1 Incorporate, Corporate and Individual Actors in One Framework	73
	7.2 Add Location as an Attribute of All Actors	73
	7.3 Make Firms and Individuals Interact	74
8	A Digression on Computational Costs of Micro Models	75
9	Summary	76

COMMENT 78

Hermann Quinke

**PART 2: MODELS AND APPLICATIONS**

<b>EVALUATING REAGAN ADMINISTRATION SOCIAL PROGRAM CHANGES: TWO APPLICATIONS OF MATH</b>	<b>83</b>
Harold Beebout	
1 Introduction	83
2 The MATH Model	84
2.1 The MATH Approach	84
2.2 The MATH Data Base	85
2.3 The MATH Computer Model	85
3 Application to Estimating the Impact of Reagan Welfare Program Cutbacks	88
3.1 The Modeling Approach	89
3.2 The Results	90
4 Application to Estimating the Effectiveness of Incentives for Private Household Retirement Savings	91
4.1 The Modeling Approach	91
4.2 The Simulation Results	94
5 Conclusion	97
<b>COMMENT</b>	<b>98</b>
Gunnar Eliasson	
<b>THE ART OF TRANSFER POLICY ANALYSIS</b>	<b>101</b>
Nelson McClung	
1 Program Analysis	102
1.1 Personal Income Tax	102
1.2 General U.S. Grant	102
2 Data	103
2.1 Administrative Records	103
2.2 Synthetic Units	104
2.3 Electronic Computers	105
3 Improving Microsimulation	105
3.1 Population Units	106
3.2 Accounting Period	106
3.3 Record Editing	107
3.4 File Matching	108
3.5 Subsampling	109
3.6 Aging	109
3.7 Replicating Program Rules	110
3.8 Behavioral Responses	110
3.9 General Equilibrium Effects	111
4 Prospects	111
<b>COMMENT</b>	<b>113</b>
Christof Helberger	

**MICROANALYTIC SIMULATION MODELS FOR THE EVALUATION  
OF INTEGRATED CHANGES IN TAXES AND TRANSFERS: THEIR  
ROLE IN TAX AND TRANSFER REFORM IN ISRAEL** 117
