INTRODUCTION	1
QUESTION A. DRAINAGE INVESTIGATIONS	3
A.1 SOIL HYDRAULIC CONDUCTIVITY	5
A.1.1 the usefulness of laboratory tests	5
A.1.2 best field test methods	6
A.1.3 density and depth of tests	7
A.1.4 use of test results for design	9
A.2 DRAINAGE POROSITY	12
A.2.1 determination in practice	12
A.3 HEAVY CLAY SOILS	15
A.3.1 standards to assess drainability	15
A.3.2 practical methods of improvement	16
A.4 NATURAL DRAINAGE AND IN-SEEPAGE	17
A.4.1 quick estimates of flow rates	17
QUESTION B. DESIGN CRITERIA AND PARAMETERS	19
B.1 WATER TABLE DEPTH	21
B.1.1 desirable depth	21
B.2 DRAIN DEPTH	24
B.2.1 desirable depth	24
B.3 DESIGN DRAINAGE RATE	27
B.3.1 methods of determination	27
B.3.2 rate difference between collectors and field drains	32
B.4 HYDRAULIC HEAD	33
B.4.1 spacing calculations	33
B.5 DEEP PERCOLATION	34
B.5.1 practical values for spacing calculations	34
B.6 DRAIN SPACING EQUATIONS	34
B.6.1 types to be used	34

B.7	DRAIN ENVELOPES	35
B.7.1	soil conditions requiring envelopes	35
B.7.2	criteria for granular envelope design	36
B.7.3	where to apply gravel envelopes	36
B.8	MARGIN OF SAFETY	38
B.8.1	needs in design	38
QUESTION C.	ENGINEERING	39
C.1	LAYOUT OF SYSTEMS	41
C.1.1	practical length of drain lines	41
C.1.2	pipe or open ditch collectors	42
C.2	TRENCH BACKFILL PIPING	43
C.2.1	how to prevent piping	43
C.3	TRENCHLESS DRAIN INSTALLATION	44
C.3.1	suitable conditions for use	44
QUESTION D.	MAINTENANCE	45
D.1	JET CLEANING	47
D.1.1	use of high or low pressure jets	47
D.1.2	required frequency of cleaning	47
D.2	MANHOLES	48
D.2.1	location and type of manhole	48
QUESTION E.	COST FACTORS	49
E.1	ECONOMIC LIFE OF PIPE DRAINS	51
E.1.1	plastic drains	51
E.2	MAINTENANCE COST	51
E.2.1	annual cost for pipe drains	51
