# Contents

<b>Chapter 1: Introduction to RATS</b>	<b>1</b>
Preparing the Data	2
Linear Regression	10
Additional Regression Topics	12
A Model of the U.S. Wholesale Price Index	13
Additional Exercises	21
 <b>Chapter 2: Stationary Time-Series</b>	 <b>23</b>
Theoretical Background	23
1. Stationarity	23
2. ARIMA processes	24
3. Autocorrelation and partial autocorrelation functions	25
4. The Box-Jenkins methodology	30
RATS Instructions and Procedures	34
1. BOXJENK	34
2. CORRELATE	35
3. FORECAST	36
4. BJIDENT.SRC	37
5. BJFORE.SRC	38
6. AIC and SBC	39
7. CDF	39
Sample Programs	40
1. A model of an AR(1) process	40
2. A model of an ARMA(1, 1) process	44
3. A model of the Wholesale Price Index	47
Additional Exercises	51
 <b>Chapter 3: Modeling Volatility</b>	 <b>53</b>
Theoretical Background	54
The ARCH-M Model	59
Maximum Likelihood Estimation in RATS	62
RATS Instructions and Procedures	65
1. MAXIMIZE	65
2. FRML	67
3. NLPAR	69
Sample Programs	69
1. ARCH errors in a regression model	69

2. ARCH and GARCH models of the WPI	72
3. Estimation of an ARCH-M process	78
Additional Exercises	83
<b>Chapter 4: Tests for Trends and Unit Roots</b>	<b>85</b>
Theoretical Background	85
Additional Issues in Unit Root Tests	90
RATS Instructions and Procedures	97
1. LINREG	97
2. ADF.SRC	97
3. DFUNIT.SRC	98
4. PPUNIT.SRC	99
5. Others	99
Sample Programs	100
1. Dickey-Fuller and Phillips-Perron tests	100
2. Tests for seasonal unit roots	104
3. Structural breaks and unit root tests	105
Additional Exercises	108
<b>Chapter 5: Vector Autoregression Analysis</b>	<b>109</b>
Theoretical Background	109
Innovation Accounting	113
Hypothesis Testing	116
RATS Instructions and Procedures	118
1. Instructions to estimate a VAR	118
2. The impulse response functions and variance decompositions	121
3. Likelihood ratio tests	121
4. Multivariate AIC and SBC	122
5. Seemingly Unrelated Regressions (SUR)	123
6. The Sims-Bernanke decomposition	124
Sample Programs	126
1. Hypothesis testing	126
2. Innovation accounting and forecasting	130
3. Seemingly Unrelated Regressions	137
4. The Sims-Bernanke decomposition	140
Additional Exercises	149
<b>Chapter 6: Cointegration and Error Correction</b>	<b>151</b>
Theoretical Background	151
1. Cointegrated variables	151
2. Cointegration and error correction	154
3. Testing for cointegration: The Engle-Granger methodology	156
Illustrating the Engle-Granger Methodology	160

Sample Programs	162
1. The Engle-Granger method for three simulated series	162
2. Cointegration and the term structure	168
The Johansen Methodology	173
Using the Johansen.400 Procedure	177
1. Determining the rank of $\pi$	180
2. Testing coefficient restrictions	184
Introduction to CATS in RATS	188
1. Determining the rank of $\pi$	190
2. Testing coefficient restrictions	192
Additional Exercises	197
 <b>Statistical Tables</b>	
A. Empirical Cumulative Distribution of $\tau$	199
B. Empirical Distribution of $\Phi$	200
C. Empirical Distribution of the $\lambda_{\max}$ and $\lambda_{\text{trace}}$ Statistics	201
 <b>References and Additional Readings</b>	203
