Australia

Contents

1	Introduction	1
1.1	Introducing the Book	1
1.2	Introducing the Topic	3
1.3	Introducing the Parts	8
1.4	Concluding the Introduction	12
1.5	Further Reading	12
1.6	Exercises	13
	Part A. Modelling	15
2	Plant Dynamics	17
2.1	Disturbances	17
2.2	Treatment Plant Processes	18
2.3	Mechanisms in the BNR Process	21
2.4	Dynamics of the BNR Process	27
2.5	The Purpose of the Model	31
2.6	The Complexity Issue	34
2.7	Summary	36
2.8	Further Reading	36
2.9	Exercises	37
3	Basic Modelling	39
3.1	Process Systems Terminology	39
3.2	Model Development	43
3.3	Problem Specification	45
3.4	Basic Dynamic Modelling	46
3.5	Modelling Hydraulics	48
3.6	Modelling Oxygen Transfer	53
3.7	Modelling Biological Nutrient Removal	56
3.8	Model Verification	62
3.9	Summary	65
3.10	Further Reading	66

3.11	Exercises	66
4	Advanced Modelling	69
4.1	Modelling Biological Nutrient Removal	69
4.2	Modelling Prefermentation	74
4.3	Modelling Anaerobic Digestion	78
4.4	Modelling Immobilised Film Processes	79
4.5	Modelling Hydraulics Again	81
4.6	Modelling Settling and Clarification	87
4.7	Modelling Batch Processes	95
4.8	Summary	97
4.9	Further Reading	98
4.10	Exercises	99
5	Empirical or Black-Box Models	101
5.1	Types of Models	101
5.2	Basic Terminology	103
5.3	Functional Empirical Models	110
5.4	Neural Network Empirical Models	112
5.5	Qualitative Models	119
5.6	Summary	125
5.7	Further Reading	125
5.8	Exercises	125
6	Experiments and Data Screening	129
6.1	Post-Modelling Tasks	129
6.2	The Model Fitting Problem	131
6.3	Experiments for Steady State Data	132
6.4	Experiments for Dynamic Data	136
6.5	Data Screening	140
6.6	Summary	153
6.7	Further Reading	154
6.8	Exercises	154
7	Principles of Parameter Estimation	157
7.1	Pitfalls	157
7.2	Linear Regression	160
7.3	Assessing a Fit	162
7.4	Nonlinear Regression	167
7.5	Fitting Simple Time Series Models	169
7.6	Time Series Analysis	172
7.7	Nonlinear Dynamic Estimation	176
7.8	Summary	177
7.9	Further Reading	177

7.10 Exercises	178
8 Fitting and Validating Models	181
8.1 General Strategies	181
8.2 Specifics in Wastewater Fitting	185
8.3 Wastewater Characterisation	185
8.4 Fitting Hydraulics	187
8.5 Fitting Oxygen Transfer	189
8.6 Fitting Kinetic Parameters	190
8.7 Fitting Clarifier Data	192
8.8 Fitting Settling Flux Curves	193
8.9 Summary	195
8.10 Further Reading	196
8.11 Exercises	197
9 Simulators	199
9.1 Who Needs Simulators?	200
9.2 Fundamental Features	201
9.3 Models	202
9.4 Simulator Features	207
9.5 Simulator Selection Criteria	219
9.6 General Purpose Simulators	221
9.7 Application Specific Simulators	229
9.8 Buyer Beware!	236
9.9 Summary	238
9.10 Further Reading	239
9.11 Exercises	239
Part B. Diagnosis	241
10 Diagnosis - an Introduction	243
10.1 Defining the Problem	244
10.2 Detection	248
10.3 Basic Elements of Diagnosis	256
10.4 Consequence Analysis and Advice	258
10.5 Information Requirements	259
10.6 Summary	266
10.7 Further Reading	266
10.8 Exercises	267
11 Quality Management	269
11.1 Defining Quality	269
11.2 Statistical Process Control	273
11.3 Basic Statistical Process Control Tools	278

11.4	Advanced Tools	286
11.5	Further Reading	297
11.6	Exercises	299
12	Model Based Diagnosis	301
12.1	Introduction	301
12.2	Steady State Models	303
12.3	State Estimation	304
12.4	Recursive Parameter Estimation	315
12.5	Summary	322
12.6	Further Reading	322
12.7	Exercises	323
13	Knowledge Based Systems	325
13.1	Principles	325
13.2	Knowledge Representation	328
13.3	Representing Uncertainty	335
13.4	Knowledge Acquisition	341
13.5	Knowledge Based System Tools	342
13.6	Summary	343
13.7	Further Reading	343
13.8	Exercises	345
Part C.	Control	347
14	Goals and Strategies	349
14.1	Defining the Problem	349
14.2	Goals and Objectives	350
14.3	Hierarchical Strategies	353
14.4	Operational Objectives of Units	355
14.5	Plant-Wide Operational Objectives	378
14.6	Summary	384
14.7	Further Reading	384
14.8	Exercises	385
15	Disturbances	387
15.1	Sources of Disturbances	387
15.2	Disturbance Characterisation	388
15.3	Modelling Disturbances	394
15.4	Disturbance Rejection	398
15.5	Summary	402
15.6	Further Reading	403
15.7	Exercises	403

16 Manipulated Variables	405
16.1 Hydraulic Variables	406
16.2 Other Manipulated Variables	409
16.3 Constraints	412
16.4 Practicability	413
16.5 Summary	417
16.6 Further Reading	417
16.7 Exercises	418
17 Feedback Control	421
17.1 Feedback Control Loops	421
17.2 Feedback Algorithms	426
17.3 Controller Tuning	432
17.4 Controllers with Selectors	435
17.5 Loops with Variable Dynamics	438
17.6 Cascade Control Loops	443
17.7 Nutrient Removal Control	451
17.8 Summary	454
17.9 Further Reading	455
17.10 Exercises	456
18 Model Based Control	459
18.1 Feedforward Compensation	460
18.2 Predictive Controllers	465
18.3 Generic Model Controllers	468
18.4 State Feedback Controllers	470
18.5 Model Based Dissolved Oxygen Control	473
18.6 Sludge Inventory Control	475
18.7 Nutrient Removal Examples	483
18.8 Fuzzy Controllers	486
18.9 Design of Model Based Control	493
18.10 Summary	495
18.11 Further Reading	495
18.12 Exercises	496
19 Batch Plant Control	499
19.1 Introduction	499
19.2 Applications	500
19.3 Representation	502
19.4 Sequence Design	512
19.5 SBR Operating Sequence	515
19.6 Summary	519
19.7 Further Reading	519
19.8 Exercises	520

20 Plant Wide Control	521
20.1 Optimisation	522
20.2 Optimisation Techniques	532
20.3 Plant Wide Control	539
20.4 Summary	546
20.5 Further Reading	546
20.6 Exercises	547
21 Benefit Studies	549
21.1 Systematic Procedure	549
21.2 Interviews	550
21.3 Possible Opportunities	552
21.4 Base Case Definition	554
21.5 Benefit Evaluation	555
21.6 Summary	560
21.7 Further Reading	560
21.8 Exercises	561
Part D. Instrumentation	563
22 Primary Sensors	565
22.1 Introduction	565
22.2 Sensor Characteristics	566
22.3 Sensors for Physical Variables	568
22.4 Primary Properties of Wastewater	571
22.5 Summary	576
22.6 Further Reading	577
22.7 Exercises	577
23 Analysers	579
23.1 Introduction	579
23.2 Sampling Systems	580
23.3 Nutrient Sensor Design	581
23.4 Dissolved Oxygen Measurement	583
23.5 Measuring Acidic or Basic Character	585
23.6 Organic Content	587
23.7 Nutrient Analysers	592
23.8 Optical Sensing	595
23.9 Respirometry	596
23.10 Measuring Bacterial Properties	598
23.11 Summary	599
23.12 Further Reading	599
23.13 Exercises	600

24 Actuators and Controllers	603
24.1 Actuators	603
24.2 Signal Transmission and Processing	612
24.3 Basic Control Equipment	617
24.4 Displays and Reports	621
24.5 System Communications	624
24.6 Summary	629
24.7 Further Reading	629
24.8 Exercises	630
Part E. The Future	633
25 The Future	635
25.1 Society Needs and Industry Trends	635
25.2 SWOT Analysis	636
25.3 Management Policies	639
25.4 Systems Group Duties	639
25.5 ICA Systems	640
25.6 Urban Water Systems in 2025	641
25.7 Research and Development	642
25.8 Systems Education	644
25.9 Summary	644
25.10 Further Reading	645
Part F. Appendices	647
A MATLAB Support Software	649
A.1 Software Summary	649
A.2 The RTD Simulator	650
A.3 The WWT Toolbox	652
A.4 The Graphing Toolbox	654
B Simple Carbon Removal Model	655
C Introduction to MATLAB	659
C.1 Starting and Stopping MATLAB	659
C.2 MATLAB Data	660
C.3 MATLAB Files	660
C.4 Entering Data	661
C.5 Displaying Data	662
C.6 Exercises	664

D	Introduction to Matrices	665
D.1	Matrices, Vectors and Scalars	665
D.2	Addition and Subtraction	666
D.3	Multiplication and Transpose	666
D.4	Division and Inverse	667
D.5	Solution of Linear Equations	668
D.6	Further Reading	668
E	Introduction to Differential Equations	669
E.1	Ordinary Differential Equations	669
E.2	Solution of Ordinary Differential Equations	670
E.3	Partial Differential Equations	670
E.4	Further Reading	671
F	Introduction to Numerical Methods	673
F.1	Solving Linear Algebraic Equations	673
F.2	Solving Nonlinear Algebraic Equations	673
F.3	Solving Ordinary Differential Equations	674
F.4	Solving Differential Algebraic Equations	675
F.5	Solving the Optimisation Problem	675
F.6	Further Reading	676
G	Glossary	677
	References	691
	Index	729
