## *Part Three*

### *Technical Change and the Economy*

<b>CHAPTER V Productivity Growth and Technical Advance</b>	65
1 Patterns of Productivity Growth Prior to 1973	67
2 Post 1973 Stagnation	69
<b>CHAPTER VI Technical Change and Inflation</b>	75
1 The Productivity Growth Slow-down and the Inflation Problem	75
2 The Distribution of Price Changes: Variance and Mean	76
3 Changes in the Character of Technical Advance	77
<b>CHAPTER VII Technical Change and Employment</b>	79
1 The Importance of Rapid Productivity Growth	79
2 Capital Investment and Structural Adjustments	80
3 Sectoral Patterns of Demand for Labour	82

# Part Four

## *Conclusions and Recommendations*

1	The Policy Implications of Our Analysis	94
2	Better Integration of Science and Technology Policies with Economic Policies Generally	95
3	Industrial Innovation, International Competition and Adjustment	98
4	Policies Regarding Basic Research and Training	100
5	Technologies and Technological Pluralism	101
6	Social Technologies	102
7	On Decision-Making	103
8	Implications for Future Employment Prospects	105
9	Concluding Remarks	106

## *Annexes*

### **ANNEX I**

Letter of Transmittal from M. Bernard Delapalme to the Chairman of the CSTP	109
---	-----

### **ANNEX II**

Individual Comment by Professor Emma Rothschild	113
---	-----

### **ANNEX III**

Biographical Notes on the Members of the Group of Experts	115
---	-----

## *List of Tables and Diagram*

1.	Trends in Expenditure on R&D as a Percentage of GDP in Selected Countries	30
2.	Sectoral Distribution of R&D Expenditure in Manufacturing in Selected Member Countries (Industry Financed, Government Financed and Total)	31
3.	Trends in Real Industry Financed and Total Expenditure on R&D, Total of OECD in Each Sector of Manufacturing	33
4.	Percentage Distribution of Business Enterprise Expenditure on R&D amongst Selected Member Countries	35
5.	US Industrial R&D; Changing Directions of Expenditure in the 1970s	35
6.	R&D Expenditure on Basic Research by Business Enterprises	36
7.	Government Financed Expenditures on R&D by Socio-Economic Objectives in Selected Member Countries	37
