Columbus, Ohio

Contents

Introduction	1		
Future Engine Developments	1		
Repair Market	3		
■ 1			
Diesel Engine Operating Fundamentals	5		
General Engine Designs and Classifications	5		
Four-Stroke Cycle Operation	9		
Two-Stroke Cycle Operation	14		
Valve Timing	16		
Piston Positions	17		
Comparison of Two- and Four-Stroke-Cycle Designs	17		
Engine Firing Orders	20		
Diesel Engineering Fundamentals	21		
Energy	22		
Work	23		
Power	23		
Metric Horsepower	23		
Horsepower Formulas	23		
Horsepower Ratings	28		
Engine Torque	29		
Torque Rise	31		
BMEP Formula	32		
BSFC Formula	33		
Thermal Efficiency	35		
Heat Losses	36		
Engine Speed Droop	36		
Engine rpm Formula	36		
Joule's Equivalent	36		
Air Standard Cycles	37		
Pressure-Volume Curves	37		
Gasoline Versus Diesel Engines	40		
Burn Rate	41		
Volumetric Efficiency	42		
Engine Displacement and Compression Ratio	42		
Metric Measures	45		
Velocity Rate	45		
Prefixes	47		
Heating Value Equivalents	47		
ISO Standards	47		
■ 2			
Combustion Systems	51		
Combustion Chamber Designs	52		
Air Turbulence	53		
Combustion Dynamics	53		
Chemical Theory of Combustion	56		
Makeup of Air	57		
Combustion in the Cylinder	57		
Processes of Combustion: Diesel Engines	58		
Fuel Injection Timing	59		
Retarded Versus Advanced Timing	62		
Fuel Quantity Requirements	62		
Thermal Efficiency	63		
Exhaust Emissions Limits	63		
■ 3			
Diesel and Alternative Fuels	67		
Crude Oil and Its Refining Process	67		
Diesel Fuel Oil Grades	69		

Grade No. 1D	69
Grade No. 2D	70
Fuel Grade and Engine Performance	70
Specific Gravity of a Fuel	70
Heat Value of a Fuel	70
Fuel Recommendations	72
Major Characteristics of Diesel Fuels	72
Volatility (ASTM) Designation	72
Cetane Number	74
Viscosity	75
Carbon Residue	76
Sulfur Content	76
Flash Point	77
Cloud Point	77
Pour Point	78
Ash Content	78
Corrosion	78
Diesel Fuel Operating Problems	78
Fuel Temperatures	78
Fuel Consumption	78
Injector Cleaners	79
Fuel Additives	79
Diesel Fuel Quality Tester	81
Introduction to Alternative Fuels	81
Diesel Fuel Advantages	81
Gasoline	82
Methanol	82
Methanol in Diesel Engines	83
Methanol-Fueled Engines	84
Dimethyl Ether	85
Ethanol	85
Compressed Natural Gas	85
Natural Gas Engine Operation	86
Safety Record of CNG Vehicles	89
Liquified Natural Gas	90
Propane	91
Hydrogen	93

■ 4

Fuel Filters, Fuel/Water Separators, and Fuel Heaters 98

Fuel Filtration	98
Water—An Engine's Worst Enemy	98
Fuel Filters	99
Filter Change Intervals	100
Fuel Filter/Water Separators	101
Fuel Heaters	103
Hot Line Fuel Heater	103
Cold Weather Operation	104

■ 5

Types of Fuel Systems 108

Mechanical Fuel Systems	108
High- and Low-Pressure Fuel Systems	108
Pump-Line-Nozzle System Operation	110
PLN Plunger Operation	111
Metering Principle	111
Injection Pump Delivery Valves	113
Inline Pump-to-Engine Timing	113
Static Spill Timing	115
Electronic PLN System	116
Unit Pump System	119
Distributor Pump System	119
Fuel Flow	120
Charging and Discharging Cycle	120
Fuel Return Circuit	122
Electronic Distributor Pump	122
Mechanical Unit Injectors	123
Phases of Injector Operation	125
Injector Sizes	126
Care and Testing of Unit Injectors	126
Mechanical Injector Tests	127
Overview of Electronic Unit Injectors	127
System Elements	128
Sensors	131
Basic Sensor Arrangement	131
Types of Sensors	132
Oil Pressure Sensor Operation	134
Electronic Foot Pedal Assembly	135
Operation of Electronic Unit Injectors	136
System Operation	137
Series 50 and 60 Fuel System	138
Fuel Injector Operation	140
Electronic Control Modules	141
ECM Operational Description	143
ECM Control Functions	143
ECM Safety Precautions	144
ECM Diagnostic Access	145
ECM SAE Trouble Codes	146
Detroit Diesel Electronic Systems	149
DDEC III: Evolution and Advantages	149
Engine Sensors and Location	150
Engine Protection System	154
Engine Diagnostics	154
ECM and Special Tools	155
Diagnostic Codes	157
Using the MPSI DDR	157
Caterpillar Electronic Fuel Systems	162
EUI Operations	162
EUI Electronics	162
Fuel System Layout	168
System Troubleshooting	171

Cummins Electronics	176
Celect Fuel System Flow	177
ECM Connectors	178
Sensors	182
Electronic Protection System	182
Troubleshooting the Celect System	183
Vehicle Cab Interface Panel	184
ECI Cylinder Misfire Test	185
Celect Fault Code Information	185
HEUI Fuel System	185

■ 6

Mechanical and Electronic Governors 195

General Terms	195
Types of Governors	196
Why a Governor Is Required	197
Basic Mechanical Governor Operation	198
Governor Droop	199
Maximum Engine Speed Adjustment	200
Zero-Droop Governors	200
Electronic Governors	201

■ 7

Safe Working Habits 205

Slinging an Engine	205
Chain-Fall and Web-Type Slings	207
Chain Grades and Connector Links	210
Nylon Webbing Slings	211
Inspection for Wear	212
Do-Not-Operate Warnings	212

■ 8

Engine Disassembly 215

Overhaul Procedures	215
Engine Cleaning Procedures	215
Safe Work Habits When Cleaning	216
Steam Cleaning	216
Pressurized Oil Sprays	216
Heated Solvents	216
Hot Tank Cleaning	217
Cold Tank Solvent Cleaning	217
Cleaning Aluminum Parts	217
The In-Frame Overhaul	218
Major Engine Overhaul	220
Removing Gasket Eliminator	221
Special Measuring Tools	222
Fundamentals of Failure Analysis	222

■ 9

Cylinder Blocks

Sizes of Engine Block Assemblies	227
Large Slow-Speed Engine Blocks	231
High-Speed Block Construction	231
Engine Block Design Flexibility	227
Block Cleaning Procedures and Safe Work Habits	232
Pressure Testing the Block	235
Method 1	235
Method 2	236
Nondestructive Block Testing	236
Inspection of the Cylinder Block	236
Block Bore Diameter	237
Honing Versus Reboring	238
Block Couterbore	238
Block Spacer Plates	241
Repairing Damaged Counterbores	242
Lower-Bore Repair	243
Block Flatness Check	243
Grinding Block Deck Surface	243
Threaded Holes	246
Main Bearing Cap Alignment	247
Main Bearing Saddle	249
Thermospray Coating	249
Camshaft Bearing Bore	250
Repair of Cylinder Block Cracks	250
Replacement Cylinder Blocks	251

■ 10

Flywheels and Housings 253

Purposes of Flywheels	253
Flywheel Forces	254
Flywheel Designs and SAE Size	254
Dual-Mass Flywheels	254
Flywheel Timing Marks	255
Removing and Inspecting the Flywheel	256
Ring Gear Replacement	257
Ring Gear Removal	257
Ring Gear Installation	257
Pilot Bearing Replacement	259
Flywheel Installation	259
Flywheel Runout	260
Flywheel Housing	262
Removal of Flywheel Housing	262
Inspection of Flywheel Housing	262
Installation of Flywheel Housing	263

■ 11

Crankshafts, Bearings, Seals, and Dampers

266

Purpose of Crankshafts	266
Design and Materials	267
Crankshaft Removal	269
Procedure	270
Initial Cleaning	271
Journal Measurement	271
Thrust Surface Inspection	272
Polishing the Journals	272
Grinding the Crankshaft	274
Crack Detection Methods	276
Magnetic Particle Method	277
Fluorescent Magnetic Particle Method	277
Fluorescent Penetrant Method	278
Failure Analysis of the Crankshaft	278
Types of Breaks	279
Categories of Failure	279
Multiple-Piece Crankshaft	281
Crankshaft Web Deflection	282
Crankshaft Installation	284
Main and Con-Rod Bearings	287
Designs	287
Bearing Loads	289
In-Frame Bearing Removal	289
Bearing Inspection	291
Bearing Failure Analysis	292
Avoidance of Main Bearing Damage	296
Crankshaft Seals	297
Rear Seal Replacement and Installation	297
Front Seal Replacement and Installation	298
Crankshaft Vibration Dampers	300
Types of Dampers	300
Inspecting Rubber Vibration Dampers	302
Inspecting Viscous Dampers	303
Crankshaft Pulleys	304
Glossary of Terms	304

■ 12

Gear Trains

309

Purposes	309
Examples	310
Gear Backlash	312
Gear Timing	315
Gear Lubrication	317
Gear Removal	317
Gear Bearing Preload Check	318

■ 13

Camshafts, Balance Shafts, and Valve Operating Mechanism

320

Functions of the Camshaft	320
Cam Lobe Shape	321
Camshaft Types	321
Two-Stroke Engine Camshafts	322
Camshaft Timing	323
Camshaft Removal	329
Removal of Overhead Model	330
In-Block Camshaft Check	333
Removal of In-Block Model	333
Camshaft Inspection	334
In-Block Camshaft Bushing Replacement	335
Removal	335
Cam Bore Inspection	337
Bushing Installation	337
Camshaft End Float	337
Balance Shafts	338
Valve and Injector Operating Mechanism	338
Valve Bridge (Crossed, Yoke)	339
Valve and Injector Adjustment	340
Valve Adjustment	340
General Procedure	340
Mack Engines	343
Cummins Engines	343
Detroit Diesel Four-Stroke-Cycle Engines	345
Detroit Diesel Two-Stroke-Cycle Engines	346
Caterpillar Valve and Injector Set	346
Rocker Arm Ratio	347
Pushrod Inspection	348
Rocker Arm Inspection	348
Cam Follower Inspection	349
Engine Compression Brakes	350
Brake Controls Schematic	350
Brake Operation	351
Jake Brake Adjustment	353
Jake Brake Options	355

■ 14

Cylinder Head and Valves

358

Purpose and Functions	358
Cylinder Head Materials	360
Design and Construction	360
Intake and Exhaust Valves	363
Valve Construction	364
Valve Rotators	365
Cylinder Head Removal	365

Disassembly and Descaling of the Cylinder Head	368
Detection of Cracks	369
Fire Deck Flatness Check	371
Cylinder Head Machining	371
Valve Guide Inspection	371
Valve Seat Inserts	375
Insert Removal	375
Insert Installation	376
Valve and Seat Inspection	377
Valve Grinding	378
Valve Seat Insert Grinding	380
Seat Grinding Procedure	383
Valve Springs	387
Cylinder Head Gaskets	388
Cylinder Head Installation	388

■ 15

Pistons and Piston Rings 395

Piston Function and Nomenclature	395
Basic Piston Designs	395
Two-Piece Piston Designs	399
Advantages of Two-Piece Pistons	399
Construction of Two-Piece Pistons	400
Piston Crown Shapes	402
Piston Operating Temperatures	402
Piston Pins	406
Piston Skirt Shape	406
Piston Removal	407
Remove Pistons and Connecting Rod Assemblies Alone	408
Remove Cylinder Pack	409
Piston Disassembly, Inspection, and Reassembly	410
Disassembly	411
Inspection of Piston Components	413
Reassembly	414
Using a New Piston	417
Purpose and Characteristics of Piston Rings	417
Piston Ring Materials	419
Types and Designs of Piston Rings	419
Piston Ring Wear and Failure	423
Abrasive Wear	423
Scuffing and Scoring	423
Chipping	423
Oil Ring Plugging	424
Ring Sticking	424
Ring Breakage	424
External Piston Ring Inspection	424
Piston Ring Installation	425
End-Gap Clearance	425

Side Clearance	425
Ring Installation	426
Ring Gap Positioning	426
Ring Compressors	426
Piston Assembly Installation	427
Piston-to-Block Bore Installation	428
Cylinder Pack Installation	431

■ 16

Cylinder Liners 437

Function	437
Types of Liners	437
Dry Type	437
Wet Type	438
Integral Type	440
Liner Materials	441
Liner Removal and Inspection	442
Remove Cylinder Liner	442
Inspect Cylinder Liner	443
Liner Surface Finish and Engine Break-In	444
Liner Glazing	446
Cylinder Honing	447
Reasons for Honing	447
Holding Fixture	449
Liner Surface Finish	449
Hone Driving Power and Adjustment	450
Honing Process	451
Cleaning the Liner or Block After Honing	453
Cylinder Liner Measurement	453
Installing a Dry Press-Fit Liner	454
Installing a Wet Liner	455
Installing a Dry Slip-Fit Liner	457

■ 17

Connecting Rods 460

Function and Design	460
Materials	461
Checking for Twists and Bends	462
Checking for Cracks	463
Cleaning Oil Passages	464
Checking Piston Pin Bushing for Wear	464
Checking Rod Bore Ovality	467

■ 18

Lubrication Systems 471

Crude Oil Refining and Additives	471
Viscosity of Oils	473
Two-Cycle Engine Oils	476

Synthetic Lube Oils	477
Exhaust Emissions and Lube Oil	477
Oil Recommendations	477
Oil Change Intervals	478
Lube Oil Dilution	479
Waste Oil Disposal	479
Oil Analysis	480
Drawing an Oil Sample	480
Interpreting Oil Analysis Results	480
Wear Limits	481
Sources of Wear	482
Electronic Diesels and Reduced Engine Wear	482
Engine Lube Oil Flow	482
Oil Pumps	483
Scavenge Oil Pumps	489
Oil Filters	490
Oil Filter Maintenance	491
Tattle Tale Filter	492
Oil Temperature	493
Lube Oil Coolers	495
Oil Cooler Types	495
Cleaning Oil Cooler Cores	497
Pressure Checking the Oil Cooler	498
Regulating and Relief Valves	498
Valve Inspection	499
Engine Oil Pans	500
Dipstick and Oil Filler Tube	501
Crankcase Ventilation Systems	502
Crankcase Explosions	502
Engine Prelubrication	504

■ 19 Cooling Systems 508

Basic Function	508
Engine Heat Loads	508
Coolant Flow Determination and Treatment	509
Cylinder Liner Pitting	510
Antifreeze	511
Testing the Coolant	514
Scale Buildup	515
Coolant Filters	516
Flushing the System	516
Pressure Caps	518
Pressure Checking the Cooling System	519
Radiators	520
Construction	522
Maintenance	524
System Flow	524
Servicing	525

Aeration Check	528
Winterfronts	528
Jacket Water Aftercoolers	529
Marine Charge Air Cooling	429
Thermostats	531
Purpose and Function	531
Types	531
Construction and Operation	531
Designs	533
Removal and Inspection	534
Opening Temperature and Distance	535
Operational Check	536
Radiator Shutters	536
Shutter Operational Checks	537
Fans	540
Blower Versus Suction Fans	541
Fans and Shrouds	542
Fan Clutches	543
Fan Drive Belts	547
Expansion Tanks and Heat Exchangers	549
Zinc Electrodes	551
Clean Heat Exchanger Core	551
Raw Water Pumps	551
Keel Cooling Systems	553

■ 20 Air Inlet and Exhaust Systems 557

The Air Supply	557
Air Temperatures	558
Air Too Cold	558
Air Too Hot	559
Intake and Exhaust System Flow	559
Four-Cycle Engines	559
Two-Cycle Engines	560
Airflow Requirements	560
Dust Ingestion	562
Air Cleaners	562
Dry-Type Air Cleaners	562
Precleaners and Screens	563
Cartridge Panel Air Cleaners	564
Restriction Indicators	567
Servicing Air Cleaners	568
Air Ducting Inspection	570
Use of Starting Fluids	571
Aftercoolers	573
Water Aftercooling	573
Air-to-Air Aftercooling	574
Checking AAAC Types	576
Engine Compression Check	576
Cylinder Leak-Down Test	578

Turbochargers	581
Basic Information	581
Turbocharger Types	581
Engine Exhaust Gas Temperatures	583
Wastegate Turbochargers	584
Turbocharger Back Pressure Device	585
Turbocharger Maintenance	585
Turbocharger Removal and Disassembly	587
Troubleshooting Turbochargers	588
Exhaust Mufflers and Particulate Traps	589
Calculation of Exhaust Gas Flows	593
Exhaust Catalyst After-Treatment Devices	593
Diesel Exhaust Filter Operation	595
Gear-Driven Blowers	596
Basic Construction	598
Operation	598
Blower Removal	599
Blower Overhaul	600
Blower Inspection	601
Blower Assembly	601
Marine Engine Applications	602
Air Silencers	602
Water-Cooled Exhaust Manifolds	604
Troubleshooting Using Manometers	604
Manometer Use	604
Manometer Specifications	606
Causes for High or Low Manometer Readings	607
Exhaust Brake Devices	608

■ 21

Engine Run-in (Testing)	614
General Information	614
Engine Dynamometers	614
Pre-Run-In Checks	616
Dyno Run-In Procedures	617
Chassis Dyno Run-In Procedures	618
On-Highway Engine Run-In Procedures	623
Off-Highway Equipment Run-In Procedures	623
Marine Engine Run-In Procedures	623

■ 22

Engine Troubleshooting	625
Getting Started	625
Troubleshooting Tips	627
Engine Idling	628
Sequential Troubleshooting Steps	629
General Procedure for Checking Engine and Vehicle	629
Exhaust Smoke Color	631
White Smoke	632
Black or Gray Smoke	632
Blue Smoke	633
Exhaust Smoke Detection	633
Mechanical Engines—Causes of Exhaust Smoke	633
Electronic Engines—Causes of Exhaust Smoke Color	637
Checking the Fuel System	638
Fuel Temperature	638
Fuel Flow	639
Primary Engine Checks	639
Engine Timing	639
Pyrometers	639
Engine Overspeed	640
Detonation	640
High-Horsepower Complaint	641
Crankcase Oil Dilution	641
Piston Scuffing, Scoring, and Possible Seizure	641
Engine Vibration	641
Compression Checks	641
Dynamometers	642
Manometers	642
Diesel Fuel Quality Tester	642
Troubleshooting Charts	642
Hard Starting	643
Abnormal Engine Operation	645
No Fuel or Insufficient Fuel	649
High Fuel Consumption	649
Fuel in Crankcase Oil	652
High Lubricating Oil Consumption	653
Excessive Crankcase Pressure	653
Low Oil Pressure	653
Cooling System	655
Loss of Coolant	660
Inline Pumps	661
