Contents

Preface	ix
Part I Preliminaries	1
1 Some Mathematical Background	3
1.1 Brief Introduction to Probability Theory	3
1.1.1 Random Variables, Probability Density Functions and Cumulative Distribution Functions	3
1.1.2 Expectations and Moments	6
1.1.3 Linear Functions of Random Variables	9
1.1.4 Normal Probability Density Functions	11
1.1.5 Linear Statistical Analysis	12
1.1.6 Random Processes and Random Fields	14
1.2 Discrete Representations of Data	19
1.2.1 Dirac Delta Distribution	19
1.2.2 Discrete Fourier Transform	22
1.2.3 Base-Two Fast Fourier Transform	30
1.3 Calculus of Variation	34
2 FEM in Deterministic Structural Analysis	39
2.1 Introductory Comments and Organization of the Chapter	39
2.2 Equations of Linear Solid Mechanics	40
2.3 Variational Methods	42
2.3.1 Principle of Minimum Potential Energy	42
2.3.2 Multi-Field Principles	45
2.3.3 Hamilton Principle	46
2.4 FEM in Statics	48
2.4.1 Compatible Displacement Model	48
2.4.2 Remarks on Solution Algorithms and Computer Implementation	53
2.5 FEM in Dynamics	55
2.5.1 Compatible Displacement Model	55
2.5.2 Remarks on Solution Algorithms and Computer Implementation	56
2.6 Some Aspects of Nonlinear Analysis	61
2.6.1 Piece-Wise Linearization of Nonlinear Time Response	61
2.6.2 Finite Element Equations	63
2.7 FEM in Linearized Buckling Analysis	65
2.8 Structural Design Sensitivity Analysis	67
2.8.1 Statics	67
2.8.2 Dynamics	71
2.8.2.1 Time Interval Sensitivity	71
2.8.2.2 Time Instant Sensitivity	73
2.8.2.3 Sensitivity of Natural Frequencies and Buckling Loads	75
2.8.2.4 Remarks on Computer Implementation	75

Part II	FEM in Stochastic Analysis	81
3	Stochastic Variational Principles	83
3.1	Introductory Remarks	83
3.2	Stochastic Potential Energy Principle	86
3.3	Stochastic Multi-Field Principles	91
3.4	Stochastic Hamilton Principle	93
4	Stochastic Finite Element Analysis	97
4.1	Finite Element Equations: Statics and Dynamics	97
4.2	Probabilistic Distribution Output	104
4.3	Stochastic Free Vibrations	106
4.3.1	Finite Element Equations	106
4.3.2	First and Second Derivatives of Eigenvalues	107
4.3.3	First and Second Derivatives of Eigenvectors	109
4.3.4	First Two Statistical Moments	113
4.4	Stochastic Linearized Buckling Analysis	114
4.4.1	Finite Element Equations	114
4.4.2	First- and Second-Order Eigenvalues	117
4.4.3	First Two Moments for Buckling Load Factors	119
4.4.4	First Two Moments for Buckling Loads	120
4.5	Computational Aspects	123
4.5.1	Notes on Solution Process	123
4.5.2	Random Variable Transformation	125
4.5.2.1	Transformed Uncorrelated Random Variables	125
4.5.2.2	Transformed Finite Element Equations	126
4.5.2.3	Response Probabilistic Distributions	131
4.5.3	Two-Fold Superposition Technique	136
4.5.4	Secularity Elimination	139
4.5.5	Adjoint Variable Technique	142
4.5.6	Concluding Remarks on SFEM Implementation	145
4.6	Numerical Illustrations	146
5	Stochastic Sensitivity: Static Problems	163
5.1	Finite Element Formulation	163
5.2	Computational Aspects	168
5.3	Numerical Illustrations	171
6	Program SFESTA. A Code for the Deterministic and Stochastic Analysis of Statics and Static Sensitivity of 3D Trusses	177
6.1	Data Preparation	177
6.2	Fortran Routines	180
6.2.1	Main Routine <code>sfesta</code>	181
6.2.2	Subroutines <code>constrinp</code> and <code>detersens</code>	186
6.2.3	Subroutines <code>displcovar</code> and <code>dispicovar</code>	192
6.2.4	Subroutine <code>randsens</code>	195

7 Stochastic Sensitivity: Dynamic Problems	199
7.1 Finite Element Formulation	199
7.1.1 Time Interval Sensitivity	200
7.1.2 Time Instant Sensitivity	206
7.2 Computational Aspects	210
7.3 Numerical Illustrations	218
8 Program SFEDYN. A Code for the Deterministic and Stochastic Analysis of Dynamics and Dynamic Sensitivity of 3D Frames	223
8.1 Data Preparation	223
8.2 Fortran Routines	228
8.2.1 Subroutine <code>elstiff</code>	228
8.2.2 Subroutine <code>eigsens</code>	234
8.2.3 Subroutine <code>rcovinp</code>	236
8.2.4 Subroutine <code>rhs1ord</code>	240
8.2.5 Subroutines <code>respo1</code> and <code>rcovprt</code>	242
8.2.6 Subroutine <code>rsecular</code>	249
8.2.7 Subroutines <code>resen1</code> and <code>resen2</code>	253
8.2.8 Subroutines <code>rseanmean</code> and <code>rsentime</code>	257
8.2.9 Subroutine <code>rsenciv</code>	262
8.3 Source Files and Overlay Linking	264
9 SFEM in Nonlinear Mechanics	
9.1 Finite Element Formulation	271
9.2 Probabilistic Distribution Output	276
9.3 Some Computational Aspects	279
Appendix A SFESTA – User’s Manual	283
Appendix B SFEDYN – User’s Manual	291
Bibliography	305
Index	313
Glossary of Symbols	319
