

SECOND EDITION

*Executive Decisions  
and Operations  
Research*

**DAVID W. MILLER and MARTIN K. STARR**

*Professors, Graduate School of Business  
Columbia University*

PRENTICE-HALL, INC., Englewood Cliffs, New Jersey

# Contents

## Part I

### ORGANIZATIONS AND DECISIONS

#### 1

#### *SCIENCE AND THE MANAGERIAL FUNCTION* 3

- 1/ Changing Concepts of Management, 4
- 2/ Early Works, 5
- 3/ Scientific Management, 6
- 4/ Concerning Business Education, 7
- 5/ Information for Decisions, 7
- 6/ Change in Owner-Manager Relationship, 8
- 7/ Development of Specialists, 9
- 8/ Development of Generalists, 9
- 9/ Management Science, 10

#### 2

#### *RESPONSIBILITY FOR DECISIONS* 13

- 10/ Deciding and Doing, 13
- 11/ The Organization as a Communication Network, 14
- 12/ Input-Output and the Black Box, 15
- 13/ Information Storage and Memory, 17
- 14/ Information Feedback Channels, 18
- 15/ Cybernetic Systems, 20
- 16/ The Nature of a Decision, 22

- 17/ Philosophers and Decisions, 23
- 18/ Economists and Decisions, 24
- 19/ Social Scientist and Decisions, 25
- 20/ Logic and Decisions, 26
- 21/ The Decision Problem, 27
- 22/ Objectives and Utility, 28
- 23/ Forecasts and Control, 29
- 24/ Functions and Distributions, 30
- 25/ Maximization Principles, 34

### 3

#### *THE OBJECTIVES OF DECISIONS*

41

- 26/ Goals, Purposes, and Rational Behavior, 42
- 27/ Open Systems, 42
- 28/ Goals of the Individual, 46
- 29/ Operational Goals of the Role, 46
- 30/ Conflict Between Goals, 47
- 31/ Suboptimization, 48
- 32/ Bounded Rationality, 49
- 33/ Principles and Maxims: A Reservoir of Heuristics, 51
- 34/ Summary of the Individuals' Goal-Seeking  
Characteristics, 52
- 35/ Organizational Objectives, 53
- 36/ Multiple Objectives, 54
- 37/ Organizational Problems of Suboptimization, 55
- 38/ Bounded Rationality of the Organization, 61
- 39/ Principles and Policies, 62
- 40/ Summary of the Goal-Seeking Characteristics  
of Organizations, 63

## Part I

### THE THEORY OF DECISION

#### 4

#### *THE STRUCTURE OF DECISIONS*

69

- 41/ Development of the Payoff Measure, 69
- 42/ Bernoullian Utility, 71
- 43/ Probability Theory, 73
- 44/ Expected Value, 76
- 45/ Self Insurance, 78
- 46/ Payoffs Without a Natural Measure, 82

- 47/ Ranking, 84
- 48/ Scales of Measurement, 86
- 49/ The Standard Gamble, 91
- 50/ Strategies and States of Nature, 95

## 5

**THE ANALYSIS OF DECISIONS** 102

- 51/ The Payoff Matrix, 102
- 52/ Several Kinds of Decisions, 104
- 53/ Decision Criterion Under Certainty, 107
- 54/ Decision Criterion Under Risk, 107
- 55/ Decision Criterion Under Uncertainty, 110
- 56/ Criterion of Pessimism, 111
- 57/ Criterion of Optimism, 112
- 58/ Criterion of Regret, 115
- 59/ The Subjectivist Criterion, 117
- 60/ A Decision Criterion for Decision Criteria, 120
- 61/ Sensitivity of the Criterion, 121
- 62/ Decisions Under Conflict, 123

## 6

**APPLIED DECISION THEORY** 131

- 63/ Definition of Operations Research, 131
- 64/ O.R. Applications to Decision Theory, 133

**Part III****THE NATURE OF MODELS**

## 7

**MODEL-BUILDING** 145

- 65/ Definition of a Model, 145
- 66/ A Major Model Taxonomy: Normative and Descriptive, 147
- 67/ Models Categorized by Their Degree of Abstraction, 148
- 68/ Models Categorized by the Nature of Their Dimensionality, 150
- 69/ Models Classified by Their Subject, 154
- 70/ Qualitative and Quantitative Models, 158
- 71/ Models Must Be Dimensionally Sound, 159

## 8

**DESCRIPTIVE MODELS** 165

- 72/ Information Models, 166
- 73/ Observation and Measurement Models, 167
- 74/ Transformation Models, 170
- 75/ Discovery Models: Variables, 174
- 76/ Discovery Models: Relationships, 176
- 77/ Simulation Models, 178
- 78/ Monte Carlo Generation of Outcomes, 179
- 79/ Heuristic Simulation of Human Behavior, 186
- 80/ Analytic Forms of Mathematical Models, 193
- 81/ Combinations of Simulation and Analytic Models, 204

## 9

**NORMATIVE MODELS** 208

- 82/ Test Models, 208
- 83/ Search Models for Successive Approximation, 211
- 84/ Search Models for Optimization, 215
- 85/ Classic Competitive Models, 222
- 86/ Value of Information, 224
- 87/ Imperfect Predictions, 227
- 88/ Subjective Forecasts, 230
- 89/ Tree Presentation, 231

**Part IV****DECISION-PROBLEM PARADIGMS**

## 10

**OF PRODUCTION** 247

- 90/ Relatively Determinate Problems, 248
- 91/ The Assignment Method, 248
- 92/ The Transportation Algorithm, 260
- 93/ A Sequencing Algorithm, 277
- 94/ Combining Models to Fit the Problem, 283
- 95/ Critical Path Network Models, 289
- 96/ A (Linear) Programming Model for the Allocation of Production Facilities, 302
- 97/ The Simplex Algorithm for Linear Programming, 311
- 98/ Relatively Determinate Inventory Models, 319
- 99/ A Basic Model for Determining Economic Order Quantities, 319

- 100/ An Inventory Model for Serial Production, 326
- 101/ Inventory Problems with Unknown Costs, 328
- 102/ The Lagrangian Approach, 336
- 103/ Stochastic Models—A Reserve Stock Problem, 339
- 104/ Stochastic Service System, 348

**11****OF MARKETING 371**

- 105/ The Problem of Objectives, 373
- 106/ Brand-Loyalty Model, 380
- 107/ The Boolean Algebra of Media Data, 387
- 108/ Boolean Programming, 397
- 109/ Brand-Share Model, 406
- 110/ Pricing Problems, 416
- 111/ Optimal Purchasing Policies, 421
- 112/ Competitive Bidding, 425
- 113/ Competition and Mixed Strategies, 437

**12****OF FINANCE 449**

- 114/ Some Simple Models Used in Finance, 450
- 115/ Investment Decision Trees, 452
- 116/ Risk Analysis, 464
- 117/ Portfolio Selection, 475
- 118/ Dividend Policy, 487

**Part V****THE EXECUTIVE AND OPERATIONS RESEARCH****13****EVALUATION OF PROBLEMS 499**

- 119/ What is a Problem? 500
- 120/ Head-On Confrontation, 501
- 121/ Precautionary Monitoring, 501
- 122/ External Perturbation, 503
- 123/ Random Searching, 503
- 124/ Problems and Objectives, 504
- 125/ Problems and the Size of Organizations, 507
- 126/ Problem-Solving: The Potential Gain, 517
- 127/ What is a Problem-Solution Worth? 520

**14*****EVALUATION OF METHODS*****530**

- 128/ The Similarities of Problems, 530
- 129/ Inventory Models, 535
- 130/ Waiting-Line Models, 542
- 131/ Allocation of Resources, 546
- 132/ Competitive Models, 552
- 133/ Simulation, 555
- 134/ Two Other Models, 557
- 135/ Operations Research: An Overview, 558

**15.*****IMPLEMENTATION OF SOLUTIONS  
AND CONTROL*****564**

- 136/ Form of the Solution, 564
- 137/ Degree of Belief, 567
- 138/ Degree of Control, 569
- 139/ Control and the Logarithmic Measure of Utility, 573
- 140/ States of Nature and Control, 575
- 141/ Stability and States of Nature, 578

***BIBLIOGRAPHY*****589*****INDEX*****595**
