

**Digital Elevation Model Technologies and Applications:  
The DEM Users Manual, 2<sup>nd</sup> Edition**

**Edited by David F. Maune, PhD, CP**

**The American Society for Photogrammetry and Remote Sensing  
Bethesda, Maryland**

# Table of Contents

<b>Foreword .....</b>	<b>iii</b>
<b>1 Introduction .....</b>	<b>1</b>
<b>David F. Maune, Stephen M. Kopp, Clayton A. Crawford, and Chris E. Zervas</b>	
Digital Elevation Models (DEMs) .....	1
DEM Definitions .....	1
Related Definitions .....	2
3-D Surface Modeling .....	3
Topographic Surface Modeling .....	4
Triangulated Irregular Networks (TINs) .....	5
Breaklines .....	6
Gridded Surfaces (DEMs, DTMs, DSMs) .....	8
Creating Gridded Surfaces (Interpolation Methods) .....	9
Inverse Distance Weighted Interpolation .....	10
Natural Neighbor Interpolation .....	10
Spline .....	12
Geostatistical Techniques (Kriging) .....	13
Specialized Terrain Interpolation .....	14
General Interpolation Issues .....	14
Contour Representation .....	16
Hydrologic Enforcement .....	18
Hydrologic Conditioning .....	21
Terrain Visualization .....	21
Terrain Analysis .....	23
Hillshade .....	23
Slope .....	24
Aspect .....	24
Intervisibility/Viewshed/Line-of-Sight .....	24
Hydrologic Analysis .....	25
Tides .....	25
Characteristics of the Tides .....	25
Nontidal Water Level Variations .....	26
The National Tidal Datum Epoch .....	27
Tide Station Networks .....	30
Bench Marks and Differential Leveling .....	31
Tide Zoning .....	32

<b>2</b>	<b>Vertical Datums .....</b>	<b>37</b>
<b>David B. Zilkoski</b>		
Introduction .....	37	
History of U.S. National Vertical Datums .....	37	
National Geodetic Vertical Datum of 1929 (NGVD 29) .....	41	
North American Vertical Datum of 1988 (NAVD 88) .....	42	
Comparison of NAVD 88 with NGVD 29 Published Heights .....	43	
International Great Lakes Datum of 1985 (IGLD 85) .....	44	
Tidal Datums .....	45	
Principal Tidal Datums .....	45	
Mean Higher High Water (MHHW) .....	45	
Mean High Water (MHW) .....	46	
Mean Sea Level (MSL) .....	46	
Mean Lower Low Water (MLLW) .....	46	
Other Tidal Values .....	46	
Mean Tide Level (MTL) .....	46	
Diurnal Tide Level (DTL) .....	46	
Mean Range (Mn) .....	46	
Diurnal High Water Inequality (DHQ) .....	46	
Diurnal Low Water Inequality (DHL) .....	47	
Great Diurnal Range (Gt) .....	47	
Comparison of NAVD 88 Heights with Local Mean Sea Level .....	48	
National Height Modernization Study .....	50	
Differences Between Ellipsoid Heights and Orthometric Heights .....	51	
Basic Concepts of GPS-Derived Heights .....	52	
Orthometric Heights .....	52	
Ellipsoid Heights .....	52	
Geoid Heights .....	52	
GPS-Derived Orthometric Heights .....	55	
Relating Vertical Datums to One Another .....	56	
NOAA/NGS'NGVD 29 to NAVD 88 Vertical Conversion Program Vertcon .....	56	
Local Datums .....	57	
Puerto Rico Vertical Datum .....	58	
Mixing Bathymetric and Topographic DEMs .....	58	
Joint NOAA-USGS Tampa Bay Demonstration Project .....	59	
Vertical Datum Transformation (VDatum) .....	59	
Excerpt from VDatum's Software Documentation .....	61	
Summary of Things to Remember .....	61	
<b>3</b>	<b>Accuracy Standards .....</b>	<b>65</b>
<b>David F. Maune, Julie Binder Maitra, and Edward J. McKay</b>		
Accuracy vs. Precision .....	65	
Introduction to Geodetic Control Standards .....	66	
Introduction to Mapping Standards .....	68	
National Map Accuracy Standards (NMAS), 1947 .....	69	
Circular Map Accuracy Standard (CMAS) .....	69	
Vertical Map Accuray Standard (VMAS) .....	69	
Major Points in Understanding the NMAS .....	70	
Specifications for Aerial Surveys and Mapping by Photogrammetric Methods for Highways70		

ASPRS Accuracy Standards for Large-Scale Maps, 1990 .....	71
Horizontal Accuracy .....	71
Vertical Accuracy .....	71
Map Classes .....	71
Accuracy Testing .....	71
Major Points in Understanding ASPRS 90 Standards .....	72
FGDC Geospatial Positioning Accuracy Standards, 1998 .....	72
Part 1: Reporting Methodology .....	72
Part 2: Standards for Geodetic Networks .....	73
Part 3: National Standard for Spatial Data Accuracy (NSSDA) .....	73
Accuracy Reporting .....	75
Horizontal Accuracy .....	75
Vertical Accuracy .....	76
Comparison of NSSDA and NMAS .....	76
Major Points in Understanding the NSSDA .....	76
Part 5: Standards for Nautical Charting Hydrographic Surveys .....	77
Hydrographic Reference Datums .....	78
Classification of Hydrographic Surveys .....	78
Special Order .....	78
Order 1 .....	78
Order 2 .....	79
Order 3 .....	80
Positioning .....	80
Depths .....	80
Sounding Density .....	81
Bottom Sampling .....	81
Tidal Observations .....	81
Metadata .....	82
Elimination of Doubtful Data .....	82
Quality Control .....	83
NOS Hydrographic Surveys Specifications .....	83
Major Points in Understanding the NOS Specifications .....	86
FEMA Guidelines .....	87
Major Points in Understanding the FEMA Guidelines .....	88
NDEP Guidelines .....	89
Vertical Accuracy .....	89
Horizontal Accuracy .....	90
Calculating and Reporting Vertical Accuracy - NDEP Requirements .....	91
Fundamental Vertical Accuracy .....	91
Supplemental and Consolidated Vertical Accuracies .....	91
95 <sup>th</sup> Percentile .....	91
Major Points in Understanding NDEP Guidelines .....	92
ASPRS Lidar Guidelines .....	93
ASPRS Accuracy Requirements .....	94

<b>4</b>	<b>The National Elevation Dataset .....</b>	<b>99</b>
<b>Dean B. Gesch</b>		
Introduction .....		99
Background, Rationale, and History .....		99
Specifications and Production .....		100
NED Production Steps .....		102
Data Distribution .....		104
Accuracy Assessment .....		104
Absolute Vertical Accuracy .....		106
Relative Vertical Accuracy .....		108
Applications .....		109
Current Development and Future Directions .....		112
Example Data .....		114
<b>5</b>	<b>Photogrammetry .....</b>	<b>119</b>
<b>J. Chris McGlone</b>		
Technology Overview .....		119
Sensor Types .....		119
Film Cameras .....		119
Satellite Imagery .....		120
Airborne Digital Systems .....		121
Planning Considerations .....		123
Image Resolution .....		123
Leaf-On/Leaf-Off Acquisition .....		123
Ground Control Points .....		124
ABGPS Considerations .....		124
Atmospheric Conditions and Sun Angle .....		124
Georeferencing and Aerotriangulation .....		124
Photogrammetric Data Collection Methods .....		127
Analytical Stereoplotters .....		127
Softcopy Stereoplotters .....		127
Manual Elevation Compilation .....		129
Automated Elevation Collection .....		129
Post-Processing and Quality Control .....		131
Data Deliverables .....		132
Supporting Technologies .....		133
ABGPS/IMU Instrumentation .....		133
Calibration Procedures .....		134
Film System .....		134
Digital Airborne Systems .....		135
Satellite Systems .....		135
Capabilities and Limitations .....		135
Comparison with Competing/Complementary Technologies .....		135
User Applications .....		137
Cost Considerations .....		137
Technological Advancements .....		137

<b>6 Interferometric Synthetic Aperture Radar (IFSAR) .....</b>	<b>141</b>
<b>Scott Hensley, Riadh Munjy, and Paul Rosen</b>	
Technology Overview .....	141
Basic Concept.....	141
Introduction to SAR .....	142
IFSAR Overview .....	151
Developmental History .....	158
Types of Sensors .....	160
Position, Attitude and Baseline Metrology .....	162
Frequency Selection .....	162
Airborne-Single Pass .....	163
Airborne-Repeat Pass .....	164
Spaceborne Single-Pass .....	166
Spaceborne Repeat-Pass .....	166
Present Operating Status .....	168
Intermap Technologies/STAR Systems .....	168
Data Availability .....	170
TopoSAR P-band Capability .....	171
EarthData International/GeoSAR .....	171
NASA-NGA/SRTM .....	174
Calibration Procedures .....	176
Calibration Parameters .....	177
Platform Position .....	177
Baseline Length and Orientation .....	177
Phase .....	178
Radiometric Calibration .....	180
Calibration Site and Procedure .....	180
Checking Calibration .....	181
Planning Considerations .....	181
Requirements Definition .....	182
Mission Planning .....	182
Site Operations .....	184
Data Collection .....	184
Comparison with Other Technologies .....	184
Photogrammetry .....	185
Lidar .....	186
Post-Processing .....	187
Regridding .....	187
Map Mosaics .....	187
Datum/Geoid and Map Projection .....	188
Hole Fill .....	188
Data Editing .....	189
Vegetation Removal .....	189
Derived Products .....	189
Quality Control .....	190
Visual Accuracy Tests .....	190
Ground Truth .....	190
Height Error Map Accuracy Analysis .....	191
User Applications .....	191
Hydrology .....	191

Littoral Zone Mapping .....	192
Seismic Hazards .....	192
Urban Mapping .....	192
Archeology .....	192
Vegetation Mapping and Land Use Classification Maps .....	192
Geology .....	192
Data Deliverables .....	193
Pre-Project Deliverables .....	193
Post-Project Deliverables .....	193
Map Products .....	194
Cost Considerations .....	194
Project Specific .....	194
Archival Data .....	194
Technological Advancements .....	194
<b>7 Topographic and Terrestrial Lidar .....</b>	<b>199</b>
<b>Robert A. Fowler, Andre Samberg, Martin J. Flood, and Tom J. Greaves</b>	
Introduction .....	199
Lasers, Lidar and What Makes It Work .....	199
Background .....	201
Technology Overview .....	202
Operating Principles .....	203
Mounting .....	204
Laser Scanning Techniques .....	205
Oscillating Mirror (Zig-Zag Scanning) .....	206
Rotating Mirror (Line Scanning) .....	206
Push Broom (Fiber Scanning) .....	207
Palmer (Elliptical) Scanning .....	208
Strip-Wise Scanning .....	209
Main Operating Principles .....	210
Sensor Position and Orientation .....	211
Airborne Lidar Systems .....	212
State-of-the-Art .....	216
Calibration .....	218
Data Processing .....	222
Manual Post-Processing .....	225
Full Waveform Digitizing .....	226
Artifacts .....	226
Edge Matching .....	226
Tiling .....	226
Lidargrammetry .....	227
Quality Control of Airborne Lidar Data .....	231
Capabilities and Limitations .....	231
Commercialization .....	232
Adoption Curve .....	232
Present Operating Status .....	233
Planning Considerations .....	234
User Applications .....	235
Forestry .....	236
Coastal Engineering .....	236

Corridor or Right-of-Way Mapping .....	236
Floodplain Mapping .....	237
Urban Modeling .....	237
Disaster Response and Damage Assessment .....	237
Wetlands and Other Restricted Access Areas .....	237
Other .....	238
Data Deliverables .....	238
Cost Considerations .....	238
Pricing .....	239
Comparison with Other Technologies .....	241
Technological Advancements .....	242
Ground Based (Terrestrial) Lidar Systems .....	243
Technology Overview .....	243
Adoption of Ground Based Lidar .....	244
Calibration .....	244
Planning .....	245
Limitations of Terrestrial Laser Scanning .....	245
Ground Lidar Data Post-Processing .....	245
Deliverables .....	246
Post-Processing Software .....	247
Applications of 3D Terrestrial Laser Scanning .....	247
Cost Considerations .....	248
Competing and Complementary Technologies of Terrestrial Lidar .....	248
<b>8 Airborne Lidar Bathymetry .....</b>	<b>253</b>
<b>Gary C. Guenther</b>	
Introduction .....	253
User Applications .....	255
Developmental History .....	258
Concept .....	260
The Challenge .....	260
Theory .....	261
Approach .....	263
Performance .....	265
Coverage Rate .....	265
Vertical Accuracy .....	266
Horizontal Accuracy .....	267
Limitations .....	268
Water Clarity .....	268
Small-Object Detection .....	270
Logistics .....	270
Current Operating Status .....	272
Background .....	272
LADS (Laser Airborne Depth Sounder) .....	272
LADS Mark II .....	273
SHOALS (Scanning Hydrographic Operational Airborne Lidar Survey) -1000 .....	274
CHARTS (Compact Hydrographic Airborne Rapid Total Survey) .....	275
EAARL (Experimental Advanced Airborne Research Lidar) .....	275
Hawk Eye II .....	277
Summary .....	278

Cost Considerations .....	279
Background .....	279
Qualitative Factors .....	280
Quantitative Aspects .....	281
Comparison with Overlapping Technologies .....	284
Bathymetry .....	284
Background .....	284
Acoustic Technology .....	286
Vertical-Beam Echosounder (VBES) .....	286
Shallow-Water Multibeam Echosounder .....	287
Side Scan Sonar .....	288
Satellite Bathymetry .....	288
Shoreline Mapping .....	289
Aerial Photogrammetry .....	289
Satellite Imagery .....	289
Airborne IFSAR .....	290
Airborne Lidar Topography .....	290
Airborne Lidar Bathymetry .....	290
Operational Considerations .....	291
Calibration Procedures .....	291
Positioning the Aircraft .....	293
Water Level (“Tidal”) Measurement .....	295
Survey Planning and Management .....	296
Post-Flight Data Processing .....	297
Automated Algorithms .....	297
Manual Processing .....	298
Visualization and Spatial Editing .....	299
Deliverables .....	299
Future Advancements .....	301
Background .....	301
Driving Factors .....	302
Performance Characteristics .....	302
Platform and Logistics .....	303
Lasers .....	303
Technology .....	303
Ground-Based Processing .....	304
Future Capabilities .....	305
Added ALB-only Products .....	305
Bottom Reflectivity .....	305
Water Clarity .....	305
Wave Spectra .....	306
Multi-Sensor Fusion .....	306
Multiple Lidars .....	307
Bathymetric Lidar with Digital Imagery .....	307
Bathymetric Lidar with Multispectral or Hyperspectral Scanner .....	307

<b>9 Sonar .....</b>	<b>321</b>
<b>Lloyd C. Huff and Guy T. Noll</b>	
Technology Overview .....	321
Developmental History .....	322
Basic Principles of Sonar Systems .....	323
Acoustic Sources .....	323
Directional Transmit/Receive Transducers .....	324
Types of Sonars .....	326
Vertical Beam Sonar .....	326
Multibeam Sonar .....	329
Interferometric Sonar .....	332
Side Scan Sonar .....	333
Present Operating Status – Platforms and Installations .....	335
Calibration Procedures .....	336
Planning Considerations .....	340
Capabilities and Limitations .....	342
Comparisons With Competing/Complementary Technologies .....	342
Post-Processing .....	343
Quality Control .....	343
Data Deliverables .....	345
Cost Considerations .....	345
Technological Advancements .....	346
<b>10 Enabling Technologies .....</b>	<b>351</b>
<b>Bruno M. Scherzinger, Joseph J. Hutton, and Mohamed M.R. Mostafa</b>	
Precise GPS Positioning .....	351
Technology Overview .....	351
Differential GPS .....	353
Precise Phase Interferometry Positioning .....	354
Network Differential GPS .....	355
Satellite Based Augmentation Systems .....	356
Development History .....	356
Types of Sensors .....	357
Post-Processing .....	358
Capabilities and Limitations .....	359
Signal Shading and Multipath Reflections .....	359
Residual GPS Errors .....	360
Satellite Orbital Errors .....	360
Satellite Clock Errors .....	360
Selective Availability (SA) .....	360
Propagation on Media Errors .....	360
Ionospheric Errors .....	361
Tropospheric Errors .....	361
Receiver Noise .....	361
DGPS Residual Errors .....	361
Planning Considerations and Quality Control .....	362
Comparison with Competing Technologies .....	364
Competing GNSS .....	365
Microwave Ranging System .....	365
Loran C .....	365

Very Long Base Line Interferometry .....	365
Satellite Laser Ranging .....	366
Technological Advances .....	366
GPS-Aided Intertial Navigation System .....	366
Technology Overview .....	366
Inertial Navigation System .....	367
GPS-Aided Inertial Navigation System .....	369
Components of a GPS-AINS for Direct Georeferencing .....	370
Development History .....	372
Direct Georeferencing Systems for Airborne Digital Elevation Model Generation .....	372
Types of Airborne DG Systems .....	374
Development History .....	373
Present Operating Status .....	373
Technology Overview .....	373
Lidar .....	374
IFSAR .....	374
Digital Line Scanners and Aerial Cameras .....	374
Boresight Calibration Requirements .....	376
Lidar .....	376
IFSAR .....	377
Digital Line Scanners and Aerial Cameras .....	377
Lever Arm Calibration Requirement .....	378
Post-processing .....	379
Planning Considerations .....	380
Static Data Collection .....	380
Minimizing Multipath .....	380
Limiting Baseline Separation .....	381
Planning for PDOP .....	381
Inertial Navigator Alignment .....	383
Quality Control .....	383
Motion Sensing Systems for Multibeam Sonar Bathymetry .....	383
Overview .....	383
Development History .....	386
Types of Sensors .....	386

<b>11 DEM User Applications .....</b>	<b>391</b>
<b>David F. Maune</b>	
DEM Uses.....	391
General Mapping Applications .....	391
Planimetric Maps .....	392
Topographic Maps .....	392
Digital Orthophotos .....	393
Flood Insurance Rate Maps .....	393
Wetland Maps .....	394
Forestry Maps .....	395
Corridor or Right-of-Way Maps .....	395
The National Map .....	396
Coastal Mapping Applications .....	396
Shoreline Delineation .....	396
Sea Level Rise .....	397

Coastal Management .....	398
Coastal Engineering .....	400
Modeling and Mapping Coastal Inundation .....	400
Transportation Applications .....	402
Land Transportation and Safety .....	402
Air Navigation and Safety .....	402
Marine Navigation and Safety .....	404
Underwater Applications .....	408
Resource Management .....	408
Seafloor Morphology .....	408
Underwater Archeology .....	410
Other Technical Applications .....	412
Water Supply and Quality .....	412
Stormwater Management .....	412
Subsidence Monitoring .....	412
Disaster Preparedness and Response .....	413
Floodplain Management .....	413
Seismic Monitoring .....	415
Geological Applications .....	415
Military Applications .....	417
Commercial Applications .....	418
Precision Farming .....	418
Recreation .....	419
Real Estate, Banking, Mortgage, and Insurance Industries .....	419
Individual Applications .....	419
Summary .....	421

## 12 DEM Quality Assessment ..... 425

### Timothy A. Blak

Goals and Definitions .....	425
Quantitative Assessment of Digital Topographic Data .....	426
National Map Accuracy Standard (NMAS) .....	426
National Standard for Spatial Data Accuracy (NSSDA) .....	426
FEMA Guidelines and Specifications .....	426
National Digital Elevation Program (NDEP) Guidelines .....	427
Fundamental Vertical Accuracy Test .....	427
Supplemental Vertical Accuracy Tests .....	427
Consolidated Vertical Accuracy Test .....	427
Untested Vertical Accuracy .....	428
Horizontal Accuracy .....	428
American Society for Photogrammetry and Remote Sensing (ASPRS) Lidar Guidelines .....	428
QA/QC Checkpoints .....	428
Interpolation of Digital Elevation Datasets .....	429
Computing Errors .....	430
Random Errors, Systematic Errors, and Blunders .....	430
Accuracy Assessment Summary .....	431
Example Vertical Accuracy Assessment Report .....	431
Qualitative Assessment of Digital Topographic Data .....	435
Macro Level Assessments .....	436
Micro Level Assessment .....	440

Classification Issues .....	444
Summary .....	446
Quality Assessment of Digital Hydrographic Data .....	446
Multibeam Sonar Calibration .....	446
Positioning System Confidence Checks .....	447
Crosslines .....	447
General .....	447
Single Beam .....	447
Multibeam .....	447
Multibeam Sun-Illuminated Digital Terrain Model (DTM) Images .....	447
<b>13 DEM User Requirements .....</b>	<b>449</b>
<b>David F. Maune</b>	
Changing Requirements .....	449
Topographic Maps .....	449
Digital Elevation Data .....	449
Accuracy and Cost Comparison .....	450
DEM User Requirements Menu .....	451
Project Area .....	453
General Surface Description .....	453
Data Model Types .....	453
Source .....	456
Vertical Accuracy .....	457
Horizontal Accuracy .....	459
Accuracy Reporting .....	460
Surface Treatment Factors .....	461
Vegetation .....	461
Hydrologic Enforcement .....	461
Hydrologic Conditioning .....	462
Buildings .....	463
No-Data Areas (Voids) .....	463
Suspect Areas .....	463
Artifacts .....	464
Horizontal Datum .....	464
Vertical Datum .....	464
Geoid Model .....	464
Coordinate System .....	465
Units .....	465
Data Format .....	466
Vector Data .....	466
Mass Points and TINs .....	466
Uniformly-Spaced (Gridded) DEMs .....	467
File Size/Tile Size .....	467
Metadata .....	467
Delivery Schedule .....	467
Basic Lidar Statement of Work (SOW) .....	468
Overview .....	468
Technical Requirements .....	468
Independent Accuracy Assessment .....	468
Metadata .....	469

Deliverables .....	469
Delivery Schedule .....	469
Enhanced Lidar Statement of Work (SOW) .....	470
Overview .....	470
Technical Requirements .....	470
Independent Quality Assessment .....	471
Metadata .....	471
Deliverables .....	471
Delivery Schedule .....	472
Summary .....	472
<b>14 Lidar Processing and Software .....</b>	<b>475</b>
<b>Mark E. Romano</b>	
Technology Overview .....	475
Premise .....	475
Developmental History .....	476
Lidar Software Requirements and Process Flow .....	476
Data Collection (Level I Processing) .....	477
Raw Lidar Processing .....	477
Project Coverage Verification .....	477
Review of Data against GPS Field Calibration Control .....	478
Canopy Penetration .....	478
Raw Lidar Data Calibration and QC (Level II Processing) .....	479
Relative Accuracy Calibration and Assessment .....	480
Evaluating Results .....	481
Absolute Accuracy Assessment, Adjustment, and Final Reporting .....	482
Data Production of Classified Data Models (Level III Processing) .....	482
Ground Model DTM .....	482
Surface Editing .....	484
Hydrologic Enforcement .....	485
Breakline Strategies to Create the DTM .....	486
Single Drain 3D Polylines (Streams & Ditches) .....	486
Double Drain 3D Polylines (Rivers and Other Large Channels) .....	487
Water Body 3D Polygons (Ponds & Lakes) .....	487
Other Breaklines and Methods .....	488
Interpolation of Contour Data .....	488
Taking Lidar Beyond Topography .....	490
High-Level Analysis of Discrete Features (Level IV Processing) .....	490
Planimetric Extraction of Manmade Features .....	490
Greater Resolution .....	490
What GSD is Needed? .....	491
Manual or Automated Processing? .....	491
Manual Extraction .....	492
Automated Extraction .....	492
CAD/GIS Post-Process Users .....	497
The Future is Now for Lidar Software .....	497
