## TABLE OF CONTENTS

### Preface

### Part I: X-Ray Scattering Factors

X-ray resonance, then and now <i>D. H. Templeton</i> . . . . .	1
New relativistic S-matrix results for scattering-beyond the usual anomalous factors/beyond impulse approximation <i>R. H. Pratt, L. Kissel, and P. M. Bergstrom, Jr.</i> . . . . .	9
Experimental determination of the dispersion correction $f'(E)$ to the atomic scattering factor <i>B. Lengeler</i> . . . . .	35
Towards improved form factor tables <i>C. T. Chantler</i> . . . . .	61
Optical constants and scattering factors from reflectivity measurements: 50 eV to 5 keV <i>R. L. Blake, J. C. Davis, D. E. Graessle, T. H. Burbine, and E. M. Gullikson</i> . . . . .	79
Resonant x-ray diffraction and polarization analysis at the iron K-edge <i>K. D. Finkelstein, M. Hamrick, and Q. Shen</i> . . . . .	91
Electrical quadrupole contributions to x-ray absorption and anomalous scattering <i>G. Dräger and W. Czolbe</i> . . . . .	99
Polarizing x-ray optics and anomalous dispersion in chiral systems <i>M. Hart</i> . . . . .	103
<b>Part II: Crystal Structures</b>	
X-Ray standing waves in noncentrosymmetric crystals and the phase problem in crystallography <i>B. N. Dev and G. Materlik</i> . . . . .	119

Developments in anomalous scattering for structure determination <i>J. Karle</i> .....	145
MAD phasing for macromolecular crystal structures <i>W. A. Hendrickson</i> .....	159
Anomalous dispersion of x-ray scattering from low-z elements <i>H. B. Stuhrmann and M. S. Lehmann</i> .....	175
Powder diffraction studies using anomalous dispersion <i>D. E. Cox and A. P. Wilkinson</i> .....	195
Phase and sign determination from multiple wavelength powder diffraction data using anomalous scattering techniques and synchrotron radiation <i>W. Limper and W. Prandl</i> .....	221
Anisotropy of anomalous scattering in single crystals <i>A. Kirfel</i> .....	231
Computing kinematic diffraction intensities with anisotropic anomalous scatterers - 'forbidden' axial reflections in space groups up to orthorhombic symmetry <i>W. Morgenroth, A. Kirfel, and K. Fischer</i> .....	257
<b>Part III: Short-Range Correlations</b>	
Chemical and displacement atomic pair correlations in crystalline solid solutions recovered by resonant (anomalous) x-ray scattering <i>G. E. Ice, C. J. Sparks, and L. B. Shaffer</i> .....	265
Structural characterization of compositional and density inhomogeneities by ASAXS <i>H.-G. Haubold, R. Gebhardt, G. Buth, and G. Goerigk</i> .....	295
Anomalous small angle x-ray scattering in materials science <i>J. P. Simon and O. Lyon</i> .....	305
Short- and medium-range order in noncrystalline materials by using anomalous scattering at large angles <i>D. Raoux</i> .....	323
Structural studies of oxide thin films, solutions and quasicrystals by anomalous x-ray scattering method <i>E. Matsubara and Y. Waseda</i> .....	345

Anomalous crystal truncation rod intensity: a chemical and structural probe <i>F. J. Walker and E. D. Specht</i> .....	365
Diffraction anomalous fine structure: unifying x-ray diffraction and x-ray absorption with DAFS <i>L. B. Sorensen, J. O. Cross, M. Newville, B. Ravel, J. J. Rehr, H. Stragier, C. E. Bouldin, and J. C. Woicik</i> .....	389
Anomalous reflectivity methods for determining the density profiles of thin films <i>S. K. Sinha, M. K. Sanyal, B. L. Carvalho, M. Rafailovich, J. Sokolov, X. Zhao, and W. Zhao</i> .....	421
<b>Part IV: Resonant Raman Scattering</b>	
Radiative and radiationless resonant Raman scattering <i>T. Åberg and B. Crasemann</i> .....	431
Resonant x-ray Raman scattering from atoms and molecules <i>P. L. Cowan</i> .....	449
Experimental study of non-radiative resonant Raman scattering at the L <sub>3</sub> -edge of 4d-transition metals <i>W. Drube, A. Lessmann, and G. Materlik</i> .....	473
High resolution near edge x-ray spectroscopy <i>K. Hämäläinen, D. P. Siddons, L. E. Berman, C.-C. Kao, and J. B. Hastings</i> .....	485
<b>Part V: Magnetic X-Ray Scattering</b>	
Magnetic effects in anomalous dispersion <i>M. Blume</i> .....	495
Resonant magnetic x-ray scattering <i>C. Vettier</i> .....	513
Magnetic form factor measurements using x-rays <i>D. Laundry and S. P. Collins</i> .....	529
X-ray magnetic circular dichroism and its relation to local magnetic structures <i>G. Schütz, M. Knülle, and H. Ebert</i> .....	535

First measurement of site-specific normal and magnetic XANES by using a standing wave field <i>H. Kawata, T. Iwazumi, N. Shiotani, and F. Itoh</i> .....	557
---	-----

## Part VI: Nuclear Resonant Scattering

Resonant $\gamma$ -ray scattering and coherent excitations of nuclei <i>J. P. Hannon and G. T. Trammell</i> .....	565
--	-----

Nuclear resonant diffraction of synchrotron radiation - on the way from an exotic experiment to established spectroscopy <i>E. Gerdau and U. van Bürck</i> .....	589
---	-----

Nuclear resonant scattering with conventional sources <i>G. V. Smirnov and A. I. Chumakov</i> .....	609
--	-----

Suppression of charge scattering in Mössbauer experiments using synchrotron radiation <i>U. Bergmann, D. P. Siddons, and J. B. Hastings</i> .....	619
--	-----

Nuclear resonant scattering using synchrotron radiation from an x-ray undulator <i>S. Kikuta</i> .....	635
---	-----

Development of neV scattering spectroscopy using resonant nuclear Bragg scattering <i>J. Z. Tischler, B. C. Larson, L. A. Boatner, E. Alp, T. Mooney, and Q. Shen</i> .....	647
--	-----

## Appendix

Guide to some crystallographic symbols and definitions with discussion on short-range correlations <i>C. J. Sparks and J. L. Robertson</i> .....	653
---	-----

Subject Index .....	665
