Theoretical Aspects of Mainly Low Dimensional Magnetic Systems

Springer-Verlag
Berlin Heidelberg New York 1980

C O N T E N T S

CHAPTER I - INTRODUCTION 1

CHAPTER II - THE ANISOTROPIC MAGNETIC CHAIN IN A LONGITUDINAL FIELD 5

2.1 - General Properties of the Model 5

2.2 - The Energy Spectrum of the Lowest Multiplet for $J^{\perp} = 0$ 9

2.3 - The Intensity spectrum of the Lowest Multiplet for $J^{\perp} = 0$ 14

2.4 - Concluding Remarks 21

CHAPTER III - THE ISING CHAIN IN A SKEW MAGNETIC FIELD 23

3.1 - General Properties of the Model 23

3.2 - The Energy and Intensity Spectra of the Lowest Multiplet 26

3.3 - Renormalisation Group Analysis of the Energy Spectrum 31

CHAPTER IV - THE HEISENBERG-ISING CHAIN AT ZERO TEMPERATURE 35

4.1 - General Properties of the Model 35

4.2 - The Jordan-Wigner Transformation - The Luttinger Model 37

4.3 - Correlation Functions for the Isotropic XY Model 41

4.4 - The Spectrum of the Isotropic XY Model 50

4.5 - Correlation Functions for the Heisenberg-Ising Chain 52

4.6 - The Spectrum of the Heisenberg-Ising Chain 58

CHAPTER V - HYDRODYNAMICS OF THE HEISENBERG PARAMAGNET 66

5.1 - The Static Description of the Heisenberg Paramagnet 66

5.2 - Conservation Laws - Slow Variables 67

5.3 - Hydrodynamical Equations for the Paramagnet 69

5.4 - Markov Process - Fokker-Planck Equation 71

5.5 - Non-Linear Langevin Equations for the Paramagnet 76

5.6 - Classical Perturbation Theory for the Paramagnet 80

5.7 - Corrections to Hydrodynamics - Long-Time Tails 88

5.8 - Renormalisation Group Treatment 90
5.9 - Concluding Remarks 98

CHAPTER VI - SOLITONS AND MAGNONS IN THE CLASSICAL HEISENBERG CHAIN 100
6.1 - The Model 100
6.2 - Hamiltonian Formulation - Constants of Motion 102
6.3 - Permanent Profile Solution - General Discussion 105
6.4 - Spin Waves - Solitary Waves - Periodic Wave Trains 109
6.5 - The Lax Representation 118
6.6 - The Associated Eigenvalue Problem - General Discussion 120
6.7 - Spectral Properties - Mathematical Discussion 124
6.8 - Scattering States and Bound States 129
6.9 - Time Dependence of the Scattering Data 133
6.10 - The Inverse Scattering Problem 135
6.11 - Canonical Action Angle Variables 138
6.12 - Energy - Momentum - Angular Momentum 146
6.13 - The Spectrum of Solitons and Magnons 149
6.14 - The Infinite Series of Constants of Motion 153
6.15 - Summary and Conclusion 156
