London • Madrid • Mexico City • Sydney • Toronto

Contents

1 Introduction 1

- What Is Urban Economics? 2
 - Market Forces in the Development of Cities 3
 - Land Rent and Land Use within Cities 3
 - Spatial Aspects of Poverty and Housing 4
 - Local Government Expenditures and Taxes 5
- What Is an Urban Area? 6
 - Census Definitions 7
 - Definitions Used in This Book 11

PART I

Market Forces in the Development of Cities 13

2 Why Do Cities Exist? 15

- A Model of a Rural Region 15
- Comparative Advantage and Urban Development 16
 - Comparative Advantage 17
 - Trade and Transportation Cost 17
 - Trading Cities 18
- Internal Scale Economies in Production 19
 - Scale Economies and the Cloth Factory 19
 - Scale Economies and an Urban Area 20
- Examples of Urban Development 22
 - The English Woolen Industry 22
 - The Sewing Machine and U.S. Urbanization 23

Agglomerative Economies in Production	23
Localization Economies	24
Urbanization Economies	28
Empirical Estimates of Agglomerative Economies	28
Agglomerative Economies in Marketing: Shopping	
Externalities	30
Imperfect Substitutes	30
Complementary Goods	31
Retail Clusters	32

3 Where Do Cities Develop? 39

Commercial Firms and Trading Cities	39
Transfer-Oriented Industrial Firms	40
Resource-Oriented Firms	41
Market-Oriented Firms	43
Intermediate Location	45
Implications for the Development of Cities	46
The Principle of Median Location	47
Location Choice with Multiple Markets	47
Median Location and Growth of Cities	49
Transshipment Points and Port Cities	49
Median Location and Cities	50
Firms Oriented toward Local Inputs	51
Energy Inputs	51
Labor	52
Amenities, Migration, and Labor Costs	52
Intermediate Inputs: Localization	
and Urbanization Economies	53
Local Public Services and Taxes	53
Several Local Inputs	54
Location Choices and Land Rent	54
Transport Costs versus Local-Input Costs	55
Trade-off between Transport Costs and Local-Input Costs	56
Change in Orientation: Decrease in Transport Costs	57
Location Orientation and Growth Patterns	58
Case Studies and Empirical Studies	58
The Semiconductor Industry	59
Computer Manufacturers	59
A Case Study: The Location of GM's Saturn Plant	60
The Relative Importance of Local Inputs: Empirical Results	61
Effects of Taxes and Public Services on Business	
Location Decisions	63
Effects of Wages and Unions on Business Location Choices	64
The Role of Government in the Location of Cities	64

4 The History of Western Urbanization 71

- The First Cities 71
 - The Defensive City 72
 - The Religious City 72
 - The Defensive and Religious City 73
- Greek Cities 73
- Roman Cities 74
- Feudal Cities 75
- Mercantile Cities 77
 - Centralization of Power 77
 - Long-Distance Trade 77
- Urbanization during the Industrial Revolution 78
 - Agriculture 78
 - Manufacturing 78
 - Intercity Transportation 79
 - Intracity Transportation 79
 - Construction Methods 80
- Urbanization in the United States 80
 - From Commercial to Industrial Cities 81
 - The Postwar Era 82
 - Metropolitan versus Nonmetropolitan Growth 83
 - Population Losses in Some Metropolitan Areas 85
 - The Post-Industrial City 86

5 How Many Cities? 91

- The Analysis of Market Areas 91
 - Pricing with a Monopolist 92
 - Entry and Competition 94
 - Efficiency Trade-offs 95
 - Market Areas 96
 - Determinants of the Market Area: Fixed Demand 96
 - Market Areas and the Law of Demand 102
 - The Demise of Small Stores 104
 - Market Areas of Different Industries 105
- Central Place Theory 105
 - A Simple Central Place Model 105
 - Relaxing the Assumptions 109
 - Other Types of Industry 110
 - Central Place Theory and the Real World 111
- Application: Optimum Number of Fire Stations 115
 - The General Case 115
 - A Numerical Example 116
 - Using Market-Area Analysis 117

6 Urban Economic Growth 125

- The Urban Labor Market and Economic Growth 126
 - The Demand for Labor 126
 - The Supply Curve 130
 - Equilibrium Effects of Demand and Supply Shifts 132
- Public Policy and Economic Growth 133
 - Subsidy Programs 134
 - Urban Growth and Environmental Quality 135
- Predicting Economic Growth 138
 - The Economic Base Study 138
 - Input-Output Analysis 141
 - Limitations of Economic Base and Input-Output Studies 144
- Benefits and Costs of Employment Growth 147
 - Who Gets the New Jobs? 147
 - Employment Growth and Real Income per Capita 148
 - Other Benefits and Costs of Employment Growth 151
- Composition of Changes in Employment 151
- Plant-Closure Legislation 154
 - Notification Requirement 154
 - Severance Pay 154
 - Effects on the Labor Market and the Tax Base 155
 - Alternative Policies 155

PART II**Land Rent and Urban Land-Use Patterns****165****7 Introduction to Land Rent and Land Use 167**

- Land Rent and Fertility 169
 - Competition and Land Rent 171
 - Land Rent and Public Policy 171
- Land Rent and Accessibility 173
 - Linear Land-Rent Function 174
 - Factor Substitution: Convex Land-Rent Function 174
 - Decrease in Transport Costs and Land Rent 178
 - Two Land Uses 180
- Market Interactions 181
 - The Corn Laws Debate 181
 - Housing Prices and Land Prices 183
- The Single Tax 183

8 Land Use in the Monocentric City 191

- Commercial and Industrial Land Use 192
 - The Bid-Rent Function of Manufacturers 192

The Bid-Rent Function of Office Firms	195
Land Use in the Central Business District	196
Location of Retailers	199
Residential Land Use	201
The Housing-Price Function	201
The Residential Bid-Rent Function	205
Residential Density	208
Land Use in the Monocentric City	209
Relaxing the Assumptions	211
Changes in Commuting Assumptions	212
Variation in Tastes for Housing	213
Spatial Variation in Public Goods and Pollution	213
Income and Location	215
Trade-off between Land and Commuting Costs	216
Other Explanations	220
Income and the Residential Bid-Rent Function	220
Policy Implications	222
Empirical Estimates of Rent and Density Functions	222
Estimates of the Land-Rent Function	222
Estimates of the Population-Density Function	223

9 General-Equilibrium Land Use 233

General-Equilibrium Conditions	233
Numerical Examples of General-Equilibrium Analysis	235
Initial Equilibrium	235
Increase in Export Sales	236
A Streetcar System	240
The General-Equilibrium Effects of the Property Tax	243

10 Suburbanization and Modern Cities 251

Suburbanization Facts	251
Suburbanization of Manufacturing	254
The Intracity Truck	254
The Intercity Truck	255
The Automobile	256
Single-Story Plants	256
Suburban Airports	257
The Suburbanization of Population	257
Increase in Real Income	258
Decrease in Commuting Cost	259
Central-City Problems	260
Following Firms to the Suburbs	261
Public Policy and Suburbanization	262
Gentrification: Return to the City?	263

Suburbanization of Retailers	263
Following the Consumers	263
The Automobile	264
Population Growth	264
Suburbanization of Office Employment	265
Suburbanization and Clustering of Offices	265
Communications Technology and Office Suburbanization	266
Suburban Subcenters and Modern Cities	268
Subcenters in Chicago	268
Subcenters in Los Angeles	269
Subcenters in Houston	271
Land Use in the Modern City: Urban Villages?	272

11 Land-Use Controls and Zoning 283

Controlling Population Growth	283
Urban Service Boundary	283
Building Permits	285
Land-Use Zoning: Types and Market Effects	288
Nuisance Zoning	288
Fiscal Zoning	293
Design Zoning	296
A City without Zoning?	300
The Legal Environment of Land-Use Controls	301
Substantive Due Process	301
Equal Protection	302
Just Compensation	303

PART III

The Federal Response to Urban Problems

313

12 What Causes Poverty? 315

Poverty Facts	315
Who and Where Are the Poor?	316
Where Do the Poor Get Their Money?	318
Economic Growth and Stagnation	320
Residential Segregation	322
Why Segregation?	322
Evidence on the Spatial Mismatch Theory	324
The Policy Response	325
Education and Poverty	325
Education and Changes in Central-City Employment	326
Evidence of the Effects of Education on Poverty	327

Labor-Market Discrimination	328
Differences in Earnings	328
Theories of Discrimination	329
Demographic Change: Female-Headed Households	330
Facts on Family Structure	331
Family Structure and Welfare Payments	331
Family Structure and the Status of Black Men	333
Summary: What Causes Changes in Family Structure?	334
Poverty in the Central City	334

13 Poverty and Public Policy 343

Employment and Job-Training Programs	343
Direct Income Transfers: AFDC and SSI	345
AFDC and Work Incentives: Theory	346
AFDC and Work Incentives: Evidence	348
The Negative Income Tax	348
The Response of Recipients	348
The Negative Income Tax and Work Effort	349
In-Kind Transfers	351
Effects of Cash and In-Kind Transfers on Poverty	352
Effects of Transfers on the Typical Poor Household	353
Effects of Transfer Programs on Poverty	353
Welfare Reform	354
Workfare	354
Reform Proposal: Child Support and Earned Income Credit	356
The Problems of the Central-City Economy	357
Dispersal Policies	357
The Development Option	358
Conclusion—What Can Be Done about Poverty?	359

14 Why Is Housing Different? 365

Heterogeneity and Immobility	365
The Price of Housing: The Hedonic Approach	366
Choosing a Dwelling	368
Segmented but Related Markets	369
Neighborhood Effects	370
Durability of Housing	370
Deterioration and Maintenance	370
The Retirement Decision	372
Abandonment and Public Policy	373
Durability and Supply Elasticity	374
The Filtering Model of the Housing Market	376
Why Do the Poor Occupy Used Housing?	376

Construction Subsidies	378
Summary: Filtering and Public Policy	380
The High Cost of Housing	380
The Cost of Renting	381
The Cost of Homeownership	381
Indifference between Renting and Owning?	382
Taxes and Housing	383
Inflation and Homeownership	387
Large Moving Cost	387
Income and Price Elasticities	389
Permanent Income and Income Elasticity	389
Price Elasticities	390
Racial Discrimination and Segregation	390
Segregation Facts	390
What Causes Segregation?	392
Housing Prices with Fixed Populations	393
Population Growth and Broker Discrimination	395
Neighborhood Transition	396

15 Housing Policies 409

Conditions of Housing and Neighborhoods	409
Housing Conditions and Rent Burdens	410
Neighborhood Conditions	411
Supply-Side Policy: Public Housing	412
Public Housing and Housing Consumption	414
Public Housing and Recipient Welfare	416
Living Conditions in Public Housing	417
The Market Effects of Public Housing	418
Supply-Side Policy: Subsidies for Private Housing	421
Section 236	421
Section 8—New Housing	422
Demand-Side Policy: Consumer Subsidies	422
Rent Certificates: Section 8—Existing Housing	423
Housing Vouchers	424
Market Effects of Consumer Subsidies	425
The Experimental Housing Allowance Program	428
Supply versus Demand Policies	430
Community Development and Urban Renewal	430
Urban Renewal	430
Recent Community Development Programs	431
Rent Control	434
Market Effects of Rent Control	434
Distributional Effects of Rent Control	436
Deterioration and Maintenance	437
Housing Submarkets	438

Controlling the Supply Response to Rent Control	440
Alternatives to Rent Control	441

PART IV

Urban Problems and Local Government

449

16 Overview of Local Government 451

Local-Government Facts	451
Local-Government Spending	452
Revenue Sources	453
The Role of Local Government	456
Natural Monopoly	457
Externalities	458
Characteristics of a Local Public Good	460
The Optimum Quantity of a Local Public Good	462
Federalism and the Optimum Level of Government	463
Externalities versus Demand Diversity	464
Scale Economies versus Demand Diversity	465
Metropolitan Consolidation	466
Prevention of Suburban Exploitation	466
Exploitation of Scale Economies	466
Equalization of Tax Rates	466
Equalization of Spending	467
Alternatives to Metropolitan Consolidation	468
The Growth in Local Spending	469
Increases in Labor Cost: The Baumol Model	469
Other Reasons for Rising Labor Cost	471
Increases in Quantity	471
Taxpayer Revolt: Expenditure Limits	473
Fiscal Health of Central Cities	473
Revenue Capacity and Expenditure Needs	476
Standard versus Actual Fiscal Health	479

17 Voting with Ballots and Feet 489

Voting with Ballots: The Median-Voter Rule	489
Benefit Taxation	491
Budget Elections and the Median Voter	492
The Median Voter in a Representative Democracy	493
Implications of the Median-Voter Rule	494
Qualifications of the Median-Voter Model	496
Voting with Feet: The Tiebout Model	496
The Simple Tiebout Model	497

Efficiency Effects of the Tiebout Process	497
Tiebout Model with Property Taxes	498
Capitalization and the Tiebout Model	500
Evidence of Shopping and Sorting	500
Critique of the Tiebout Model	501
Metropolitan Consolidation and the Tiebout Model	502
Inefficiency from Spillovers	502
Effects of Consolidation	504

18 Local Taxes and Intergovernmental Grants 511

Who Pays the Residential Property Tax?	511
The Land Portion of the Property Tax	512
The Improvement Tax: The Traditional View	513
The New View of the Property Tax	514
Changing the Assumptions	517
Summary: Who Pays the Residential Property Tax?	519
The Local Effects of a Local Tax	519
The National Effects of a Local Tax	520
The Effects of a National Tax	521
Summary of Incidence Results	522
The Tax on Commercial and Industrial Property	522
The General Property Tax	522
Differential Tax Rates	522
The Tiebout Model and the Property Tax	523
Administering the Property Tax	525
Other Taxes	527
Municipal Sales Tax	527
Municipal Income Tax	528
Intergovernmental Grants	530
Why Intergovernmental Grants?	530
Unconditional Grants	531
Lump-Sum Conditional Grants	533
Matching Grants: Open-Ended	534
Matching Grants: Closed-Ended	536
Block Grants	536
Summary: The Stimulative Effects of Grants	537
Capitalization and the Distributional Effects of Grants	538
Grants to Low-Income Communities	538
Grants to High-Tax Communities	539
Tax Expenditures: Implicit Grants	539
Deductibility of Local Taxes	539
Exemption of Interest on Local-Government Bonds	541

19 Autos and Highways 549

- Congestion: Equilibrium versus Optimum Traffic Volume 550
 - The Demand for Urban Travel 550
 - The Private and Social Costs of Travel 551
 - Equilibrium versus Optimum Traffic Volume 553
- The Policy Response: Congestion Tax 554
 - Benefits and Costs of Congestion Taxes 554
 - Peak versus Off-Peak Travel 556
 - Estimates of Congestion Taxes 556
 - Implementing the Congestion Tax 557
- Alternatives to a Congestion Tax: Taxes on Auto Use 557
 - Gasoline Tax 558
 - Parking Tax 558
 - Congestion Zones and Permits 559
- Alternatives to Auto Taxes 560
 - Capacity Expansion and Traffic Design 560
 - Subsidies for Transit 561
- Highway Pricing and Traffic Volume in the Long Run 563
 - Average Total Cost for Two-Lane and Four-Lane Highways 564
 - Long-Run Average Cost and Marginal-Cost Curves 565
 - Optimum Volume and Road Width 565
 - Congestion Tolls Pay for the Optimum Road 566
 - Who Pays for Highways? 567
- Congestion and Land-Use Patterns 567
 - Partial-Equilibrium Effects 567
 - General-Equilibrium Effects 569
- Autos and Air Pollution 571
 - The Economic Approach: Effluent Fees 571
 - Transit Subsidies 572
 - Regulatory Policy 573
- Auto Safety 574
 - The Effects of Safety Regulations 575
 - Small Cars and Safety 578

20 Mass Transit 587

- Mass Transit Facts 587
- Choosing a Travel Mode: The Commuter 589
 - An Example of Modal Choice 590
 - Transit Service and Modal Choice 592
- Choosing a System: The Planner's Problem 595
 - Cost of the Auto System 596
 - Cost of the Bus System 596
 - Cost of BART 596
 - System Choice 597

Light Rail	597
Subsidies for Mass Transit	599
Justification for Transit Subsidies	599
Reasons for Transit Deficits	600
History of Federal Assistance	602
Deregulation: The Private Provision of Transit	603
Contracting for Transit Services	603
Entry and Competition	604
British Experience with Deregulation	605
Transportation and Land-Use Patterns	606
Gasoline Prices	606
Fixed-Rail Systems and Land Use	606

21 Education 617

The Education Production Function	618
Inputs and Outputs of the School	618
The Coleman Report	619
Other Studies of the Production Function	621
The Tiebout Process and Inequalities in Achievement	622
Spending Inequalities	623
Segregation and Achievement Inequalities	623
Programs to Decrease Spending Inequalities	625
Flat Grants	625
Foundation Grants	628
The Legal Mandate to Equalize Expenditures	629
The Guaranteed Tax-Base Plan	630
Michigan's Equalization Plan	633
The California Equalization Program	634
Desegregation Policy	635
Court-Ordered Desegregation	635
Moving to Another School District	636
Switching to Private Schools	636
Tiebout-Based Segregation	639
Subsidies for Private Education: Education Vouchers	639

22 Crime and Punishment 651

Crime Facts	651
The Victims of Crime	653
Crime and the Price of Housing	654
The Costs of Crime	655
The Rational Criminal and the Supply of Crime	657
A Numerical Example of Burglary	657
The Crime-Supply Curve	659

Optimum Amount of Crime	661
Victim Cost and Prevention Cost	661
Marginal Cost and Variation in Optimum Crime Levels	663
Crime Prevention Activities	664
Increasing the Value of Legal Opportunities	664
Victims as Crime Fighters	665
The Police	667
The Court System	668
The Principle of Marginal Deterrence	671
The Prison System	674
Illegal Commodities and Victimless Crime	678
Product Illegality and Production Costs	678
Product Illegality and Price	679
Drugs and Property Crime	680

APPENDIX
Tools of Microeconomics**695****Tools of Microeconomics 697**

Model of Supply and Demand	697
The Market Demand Curve	697
The Market Supply Curve	699
Elasticities of Demand and Supply	700
Market Equilibrium	701
Shortage of Surplus	702
Market Effects of Changes in Demand or Supply	703
Theory of Consumer Choice	704
Constructing an Indifference Curve	705
An Indifference Map	707
The Budget Set and Budget Line	708
Maximizing Utility	710
Changes in Price and Income	712
Theory of Worker's Choice	713
Indifference Curves for Worker	713
Budget Line for Worker	713
Maximizing Utility	714
Marginal Decision Making	715
Marginal Benefits and Costs	715
Using the Marginal Principle	716

Index 717
