Contents

List of Tables	x
List of Figures	xi
Notes on Contributors	xv
Abbreviations	xii
Preface	xxv

Part One POLICY AND ORGANIZATION

1 The Quality Concept and Objectives	3
<i>Frank Price</i>	
Quality: the latest buzzword? — Quality: Is it important? — Quality: leadership through commitment.	
2 Quality Organization and Programmes	13
<i>Don Harrison</i>	
Organizing for design quality — Formal organization for conformance quality — Vendor assurance — Informal organization for conformance quality — Establishing a quality programme.	
3 Training for Quality	33
<i>Darek Celinski</i>	
Improving the general quality of products and services — Improving specific aspects of quality — Training to use quality control and quality improvement systems — Conclusion.	

Part Two QUALITY-RELATED BUDGETS AND COSTS

4 Quality-related Costs	57
<i>John Edge and David J. Smith</i>	

Types of quality-related costs — Life cycle costs — Introducing a quality cost system — Further reading and references.

5 Budgeting for Quality 71

John Hunt

The historical and organizational background — Quality function: parametric or global estimates — Quality audits, assessments and reviews — Developing global estimates through synthesis — Further reading and references.

Part Three QUALITY IN ENGINEERING AND DESIGN

6 Design Objectives 103

Robin Plummer

Motivation — Get market intelligence — Clarify the express requirements — Evaluate the implied requirements — Clarify the express and implied requirements of related legislation — Choice of market sector — Design parameters — Quality assured design — Failure mode effect and criticality analysis — Feedback from production — The role of the Design Council — Design objectives.

7 National and International Engineering Design Standards 117

Trevor C. Ashton

Aims and principles of standardization — International standardization — National standards — Company standards — The value of standards — Further reading.

8 Statutory Provisions and Obligations 135

David J. Smith

The Health and Safety Executive — The Health and Safety at Work Act 1974 — Industrial hazards — Product liability — The role of quality management — Further reading.

9 Quality Control of Design 147

Robin Plummer

Definitions — Design teams — design interfaces — Design architecture — Design methodology — Design review — Documentation change and configuration control — Conclusion.

10 Control of Engineering Changes and Design Modifications 161

Dennis Lock

The framework of control — Origins and timings of engineering changes and modifications — Class B changes — Emergency changes — Concessions and related procedures — Documents and records.

11	Product Reliability	187
	<i>Peter Foyer and Eric Wallbank</i>	
	Reliability: the crucial 'hygiene factor' — Methodologies for achieving reliability — Availability calculations — The prototype phase — In-service activities — Total life economics — Some conclusions — References and further reading.	
Part Four SOFTWARE QUALITY		
12	The Traditional Approach to Software Quality	213
	<i>David J. Smith</i>	
	Software failures — Standards and guidelines — Traditional methods — Typical checklists — Further reading.	
13	Quality Software through Formal Methods	229
	<i>David J. Smith</i>	
	The software design cycle — Formal requirements methods — Static analysis — Dynamic test tools — Metrics — Accreditation — Further reading.	
Part Five — STATISTICAL METHODS FOR QUALITY CONTROL IN MANUFACTURING		
14	An Introduction to Statistics for Quality Applications	243
	<i>David Newton</i>	
	Data — Probability — Probability plotting — Further reading.	
15	Process Capability	287
	<i>David Newton</i>	
	Assignable and unassignable causes — Capability analysis.	
16	Control Charts: 1. Shewhart Charts	305
	<i>David Newton</i>	
	To interfere or to ignore? — Control chart for sample averages — Control of variation: the ranges chart — The average and range (\bar{x}, R) chart — Control charts for attributes — Software for statistical process control (SPC) — Further reading.	
17	Control Charts: 2. Cusum Charts	333
	<i>David Newton</i>	
	Basic cusum procedure — Cusum charts for variables — Summary and recommendations for further reading.	
Part Six PARTICIPATIVE QUALITY IMPROVEMENT		
18	Common and Special Problems	351
	<i>John Edge</i>	

Management-controllable variation — Worker-controllable variation — Managing organizations and people: when quality participation does not work — The need for statistical control techniques — Further reading.

19 Quality Improvement: Lessons for Management 375

John Edge

The approach to quality in the late 1980s — Quality management — Further reading.

20 Quality Improvement Activities and Techniques 405

John Edge

Involving people: quality and project improvement teams — Involving people: quality circles — The factory as a people-driven system — Statistical techniques — Participation: summary and conclusion — Further reading.

Part Seven QUALITY PLANNING FOR MANUFACTURE

21 Just-in-time and Supplier Development 451

D. M. Lascelles and B. G. Dale

The JIT concept — The customer-supplier relationship — Starting supplier development — References and further reading.

22 Essential Quality Procedures 469

David J. Smith and John Edge

The need for procedures — Hierarchy of procedures — Appendix 1: Example of a typical quality manual — Appendix 2: Example of a quality procedure — Appendix 3: A typical work instruction document.

23 Quality Audits and Reviews 495

Gordon Staples

Reasons for audits — Types of audits — Internal audits — External audits — Audit reports and records — Follow up activities — Conclusion.

Part Eight QUALITY FUNCTIONS IN MANUFACTURING

24 Quality of Bought-out Materials 537

R. Plummer

Auditing and assessing, techniques, theory and practice — Purchase specifications — Purchase orders — Goods inwards — Stores procedures — Vendor rating — Inspection.

25	Quality of Bought-out Services <i>R. Plummer</i> An understanding of the problem – The building blocks – Statistical process control – Incident reporting – Specifying the objectives to be obtained by the service – Auditing and assessing – Quality management of services such as maintenance contracts – Consultancy – Product and design support – Conclusion.	547
26	Inspection <i>R. Plummer</i> Definition of inspection – Reasons for inspection – Planning inspection – Fitness for purpose – How much to inspect – Seriousness classification – Inspection stamps – Errors in inspection – Cost of inspection.	559
27	Metrology <i>Jim Bell, National Physical Laboratory</i> Some definitions – The role of measurement in achieving quality – The role of Government – Measurement traceability and measurement assurance – The operation of NAMAS – Future measurement needs – International cooperation.	571
28	Functional Testing <i>Geoffrey Leaver</i> Fitness for purpose – Measurement – Testing – Automation of testing – Test procedures – Further reading.	589
29	Managing Non-conformances <i>Ray H. Spencer</i> The pitfalls and the opportunities – Definitions – Specifications and standards – Subjectivity – Precedent – Attitude – Objectivity – Process – Costing – Controls – Improvements – Future designs – Further reading.	607
