## CONTENTS

### PART 1: SURVEY PAPERS

<i>Z. Schuss and B.J. Matkowsky</i> Dynamical systems driven by small white noise: asymptotic analysis and applications.	2
Introduction to the paper by V.S. Butuzov and A.B. Vasil'eva. <i>V.F. Butuzov and A.B. Vasil'eva</i>	35
Singularly perturbed differential equations of parabolic type.	38
<i>J. Grasman</i> Asymptotic methods in mathematical biology.	76
Introduction to the paper by A.S. Bakaj. <i>A.S. Bakaj</i>	96
Integral manifolds and adiabatic invariants of systems in slow evolution.	99
<i>F. Verhulst</i> Asymptotic analysis of Hamiltonian systems.	137
Appendix by Els van der Aa: Non-genuine first-order resonance with three degrees of freedom.	184
<i>E. Sanchez-Palencia</i> Homogenization method for the study of composite media.	192
<i>V. Drăgan and A. Halanay</i> Uniform asymptotic expressions for the fundamental matrix of singularly perturbed linear systems and applications.	215

### PART 2: SURVEY PAPERS WITH RESEARCH ASPECTS

<i>Robert E. O'Malley, Jr.</i> Slow/fast decoupling for linear boundary value problems.	248
<i>P.W. Hemker</i> Numerical aspects of singular perturbation problems.	267
<i>Jan A. Sanders</i> The (driven) Josephson equation: an exercise in asymptotics.	288

<i>Richard Cushman</i>	
Periodic solutions of the autonomous Josephson equation.	319
<i>A. van Harten</i>	
On the interaction of flames and sound.	327
PART 3: RESEARCH PAPERS	
Introduction to the research papers.	348
<i>G.G. Rafael</i>	
Application of a combined Galerkin-averaging method	349
<i>V. Dragăn</i>	
Asymptotic expansions for singularly perturbed differential matrix Riccati equations with applications to linear-quadratic optimization problems.	370
<i>J. Grasman and B.J. Matkowsky</i>	
Singular perturbations of epidemic models involving a threshold.	400
<i>A.H.P. van der Burgh</i>	
An asymptotic theory for the free vibrations of an iced two-conductor bundled transmission line.	413
<i>V.N. Bogaevsky and A.Ya. Povzner</i>	
Linear methods in nonlinear problems with a small parameter.	431
<i>Wiktor Eckhaus</i>	
Relaxation oscillations including a standard chase on French ducks.	449
BIOGRAPHICAL MATERIAL	495
