

ILO Codes of Practice

**Protection of workers
against noise and vibration
in the working environment**

International Labour Office Geneva

Contents

	Page
Introduction	1
Definitions	4
1. General	11
1.1 Duties of employers	11
1.2 Duties of the workers	11
1.3 Co-operation	11
1.4 Inspection by official services	12
2. Organizing principles of prevention	13
2.1 Aims	13
2.2 Control	13
2.3 Implementation	14
3. Noise measurement and assessment	16
3.1 General	16
3.2 Hearing conservation	16
3.3 Oral communications	18
3.4 Fatigue	18
3.5 Measuring instruments	19
3.6 Instrument accuracy and calibration	19
3.7 Recording of data	19
4. Noise limit levels	21
4.1 General	21
4.2 Hearing impairment	21
4.3 Special provisions	22
4.4 Ultrasound and infrasound	22
4.5 Oral communications	22
4.6 Fatigue and comfort	23

Protection of workers against noise and vibration

	Page
5. Vibration measurement	24
5.1 General	24
5.2 Measuring instruments	24
5.3 Instrument accuracy and calibration	24
5.4 Recording of data	25
6. Vibration limits	26
6.1 General	26
6.2 Vibration transmitted to hands and arms	26
6.3 Whole-body vibration	26
6.4 Comfort	27
7. Identification of risk areas	28
7.1 Risk assessment	28
7.2 Ambient noise	28
7.3 Sources of noise and vibration	29
7.4 Assessment of exposure	29
7.5 Other noise measurements	30
7.6 Marking of areas and equipment	30
8. Noise and vibration control: new equipment	32
8.1 Specifications for new equipment	32
8.2 Testing	32
8.3 Replacement of hazardous equipment or processes	33
8.4 Design and installation	33
9. Noise and vibration control in the working environment	35
9.1 General	35
9.2 Control methods	35
9.3 Control at source	35
9.4 Control of propagation, amplification and reverberation	37
9.5 Remote control and isolation	38
9.6 New risks	39

10. Protective equipment and reduction of exposure time

- 10.1 General
- 10.2 Choice of personal protective equipment
- 10.3 Testing of protective equipment
- 10.4 Issuing and training in use of equipment
- 10.5 Inspection and maintenance
- 10.6 Reduction in exposure time
- 10.7 Co-operation with workers

11. Health supervision

- 11.1 General
- 11.2 Organisation and aims
- 11.3 Frequency of health examinations
- 11.4 Structure of the medical examinations
- 11.5 Results and interpretation
- 11.6 Audiometric testing
- 11.7 Audiometric methods and equipment
- 11.8 Staff training

12. Monitoring

- 12.1 General
- 12.2 Environmental monitoring
- 12.3 Health monitoring
- 12.4 Comparisons of findings

Appendices

- 1. Existing international standards and other international provisions
- 2. The health hazards of noise, ultrasound, infrasound and vibration
- 3. Maximum allowable levels of ultrasound
- 4. Noise hazard contours
- 5. Signs indicating noise zones
- 6. Medical aspects: contra-indications
