

ULTRASTRUCTURE PROCESSING OF ADVANCED MATERIALS

EDITED BY

DONALD R. UHLMANN

DONALD R. ULRICH

A WILEY-INTERSCIENCE PUBLICATION

JOHN WILEY & SONS, INC.

NEW YORK / CHICHESTER / BRISBANE / TORONTO / SINGAPORE

CONTENTS

| | | |
|---------------|--|-----------|
| PART 1 | PRECURSORS, CHEMISTRY, AND STRUCTURE DEVELOPMENT IN ULTRASTRUCTURE PROCESSING | 1 |
| 1 | Chemistry and Reactions of Metal Alkoxides <i>D. C. Bradley</i> | 3 |
| 2 | Molecular-Level Understanding of the Sol–Gel Process <i>J. Jonas</i> | 13 |
| 3 | Role of Complexation in the Sol–Gel Chemistry of Metal Oxides <i>M. Henry, J. P. Jolivet, and J. Livage</i> | 23 |
| 4 | Neutral and Anionic Hypervalent Silicon Complexes in Silanol Polymerization <i>L. W. Burggraf, L. P. Davis, and M. S. Gordon</i> | 47 |
| 5 | Characterization of Structural Development in Sol– Gel Systems by Cryogenic Transmission Electron Microscopy <i>J. K. Bailey and M. L. Mecartney</i> | 57 |
| 6 | Effect of Hydrogen Ion Concentration on Gelation of Tetrafunctional Silicate Sol–Gel Systems <i>B. K. Coltrain, S. M. Melpolder, and J. M. Salva</i> | 69 |

| | | |
|--------------------------|---|------------|
| 7 | Calorimetric Study of Sol and Gel Formation | 77 |
| | <i>J. W. Fleming, S. A. Fleming, and D. Kelly</i> | |
| 8 | Nuclear Magnetic Resonance Investigations of Lithium Niobium Alkoxide Solutions | 87 |
| | <i>D. J. Eichorst, K. E. Howard, and D. A. Payne</i> | |
| 9 | Initial Evidence for Si–O–Ti Bond Formation in Organically Modified Silicon Titanates by Solid-State ²⁹Si Nuclear Magnetic Resonance Spectroscopy | 95 |
| | <i>C. L. Schutte, J. R. Fox, R. D. Boyer, and D. R. Uhlmann</i> | |
| 10 | The Gelation of Colloidal Gels and the D.L.V.O. Theory | 103 |
| | <i>A. C. Pierre</i> | |
| 11 | Quantum Calculations on Sol–Gel Silica Clusters | 111 |
| | <i>J. K. West, S. Wallace, L. L. Hench, and C. R. Lishawa</i> | |
| PART 2 PROCESSING | | 119 |
| 12 | Ultrastructure Processing of Shaped Ceramic Bodies from Liquids | 121 |
| | <i>J. D. Mackenzie</i> | |
| 13 | Sonogels—Development and Perspectives | 135 |
| | <i>J. Zarzycki</i> | |
| 14 | Biomimetic Processing of Ceramics and Composites | 149 |
| | <i>P. Calvert</i> | |
| 15 | Sol–Gel Processing of Large Silica Optics | 159 |
| | <i>L. L. Hench, M. J. R. Wilson, C. Balaban, and J. L. Noguès</i> | |
| 16 | Physics of Drying | 179 |
| | <i>G. W. Scherer</i> | |
| 17 | Phase Separation and Clustering in Systems of Rodlike Particles | 201 |
| | <i>L. A. Chick, C. Viney, and I. A. Aksay</i> | |

| | |
|--|------------|
| 18 Sol-Gel Processing of Controlled Pore Films | 211 |
| <i>C. J. Brinker, G. C. Frye, A. J. Hurd, K. J. Ward, and C. S. Ashley</i> | |
| 19 Sol-Gel Processing of Oxycarbide Glasses and Glass Matrix Composites | 223 |
| <i>H. Zhang and C. G. Pantano</i> | |
| 20 Seeded Transformation of Aluminum Chlorohydrate Gels | 233 |
| <i>J. M. Boulton, S. Subramoney and D. R. Uhlmann</i> | |
| 21 Photoelectrochemical Deposition of Thallium(III) Oxide Thin Films onto <i>n</i>-Silicon | 239 |
| <i>J. A. Switzer, R. J. Phillips, and M. J. Shane</i> | |
| 22 Real Time Monitoring of Silica Gel Drying Behavior | 247 |
| <i>M. J. R. Wilson and L. L. Hench</i> | |
| PART 3 POWDERS, FILMS, AND MONOLITHS | 255 |
| 23 The Science of Ultrafine Powders: Well-Defined Composite and Coated Particles | 257 |
| <i>E. Matijević</i> | |
| 24 Preparation of Narrow-Site-Distribution Borosilicate Powders by Alkoxide Hydrolysis | 269 |
| <i>L. V. Janavicius, E. A. Barringer, A. B. Hardy, H. K. Bowen, and J. Dynys</i> | |
| 25 Synthesis and Processing of Alkaline Earth Metal, Titanate Gels, Powders, and Thin Films | 277 |
| <i>P. P. Phule and S. H. Risbud</i> | |
| 26 Formation of V_2O_5 Gels from Vanadyl Alkoxides | 285 |
| <i>H. Hirashima, K. Tsukimi and R. Muratake</i> | |
| 27 Properties of Alkali Silicate Gels and Their Sintered Fused Silica Glasses | 291 |
| <i>R. D. Shoup</i> | |

| | | |
|---------------|---|------------|
| 28 | Effects of Ultrastructure on Elastic and Thermal Properties of Glass | 303 |
| | <i>N. Soga</i> | |
| 29 | Determination of the Skeletal Density of Silica Gels from Wide-Angle X-Ray Diffraction | 315 |
| | <i>L. Esquivias, C. Barrera-Solano, N. de la Rosa-Fox, F. L. Cumbreira, and J. Zarzycki</i> | |
| 30 | Modulus of Rupture for Room-Temperature Gels Derived from Methyltrimethoxsilane | 327 |
| | <i>G. E. Wheeler and S. A. Fleming</i> | |
| 31 | Sol-Gel-Derived Titania-Silica Gel-Glasses | 333 |
| | <i>Y.-C. Cheng and L. L. Hench</i> | |
| PART 4 | COMPOSITES INCLUDING ORGANIC-MODIFIED CERAMICS | 341 |
| 32 | Conventional and Molecular Composites—Past, Present, and Future | 343 |
| | <i>W. W. Adams and S. Kumar</i> | |
| 33 | Structure-Property Relationships in Silica-Siloxane Molecular Composites | 361 |
| | <i>D. W. Schaefer, J. E. Mark, L. Jian, C.-C. Sun, D. McCarthy, C.-Y. Jiang, Y.-P. Ning, and S. Spooner</i> | |
| 34 | Preparation of $(\text{Pb}_{0.5}\text{Bi}_{0.5})(\text{Ti}_{0.5}\text{Fe}_{0.5})\text{O}_3$ Ceramic Powder from Metal Organic Precursors for 0-3 Ceramic-Polymer Composites | 377 |
| | <i>K. H. Han, R. E. Riman, and A. Safari</i> | |
| 35 | Sol-Gel Synthesis of Alumina-Zirconia and Mullite-Zirconia | 385 |
| | <i>J. M. Boulton, S. Subramoney, and D. R. Uhlmann</i> | |
| 36 | Densification of Silica-Cubic Boron Nitride Composites: I | 393 |
| | <i>A. Nazeri-Eshghi and J. D. Mackenzie</i> | |

- 37 Mechanical Behavior of (Poly)methylmethacrylate-Impregnated Silica Gels** 401
B. Abramoff and L. C. Klein
- 38 Organically Modified Ceramics—Materials with “History” or “Future”?** 409
H. Schmidt
- 39 Structure–Property Study of Hybrid Materials Incorporating Organic Oligomers into Sol–Gel Systems** 425
H. Huang, R. H. Glaser, A. B. Brennan, D. Rodrigues, and G. L. Wilkes
- 40 Structure–Property Investigations in Heat-Treated Polyquinoline Fibers** 439
S. Subramoney, D. R. Uhlmann, M. Featherstone, G. C. Berry, A. Parker, J. Tsang, and J. K. Stille

PART 5 OPTICAL AND ELECTRICAL APPLICATIONS 445

- 41 Recent Optical Studies of the Local Environment of Rare Earth Ions in Glass** 447
M. J. Weber
- 42 Nonlinear Optical Processes in Polymers and Sol–Gel Glass Composites** 461
P. N. Prasad
- 43 Phase Change Materials for Optical Data Storage** 475
D. P. Birnie III
- 44 Structure-Dependent Optical Properties of Composite Materials** 491
B. G. Potter, E. M. Clausen, C. J. Simmons, and J. J. Simmons
- 45 Gradient-Index Materials by the Sol–Gel Process** 509
M. Yamane

- 46 Laser Behavior and Nonlinear Optical Properties in Organic Dye-Doped Sol-Gel Materials** **519**
E. T. Knobbe, B. Dunn, P. D. Fuqua, F. Nishida, and J. I. Zink
- 47 Optical Properties of Artificially Structured Metals** **531**
C. M. Falco, J. M. Slaughter, and B. N. Engel
- 48 Sol-Gel Synthesis of Planar Optical Waveguides and Integrated Components** **545**
R. L. Roncone, L. A. Weller-Brophy, and B. J. J. Zelinski
- 49 Chemical Synthesis of Lanthanum Sesquisulfide Powders for Infrared Optical Applications** **555**
P. N. Kumata and S. H. Risbud
- 50 Fabrication of Superconducting Oxide Coatings Films and Fibers by the Sol-Gel Method** **565**
S. Sakka and H. Kozuka
- 51 Superconductivity and Microstructure in Lead-Substituted Bi-Sr-Ca-Cu-O Ceramics** **579**
H. C. Ling
- 52 Ultrastructure Processing of Ceramics in Electronics Packaging** **599**
H. T. Sawhill
- 53 Synthesis, Characterization, and Applications of Lead and Barium Titanate Materials Prepared by the Sol-Gel Method** **613**
M. A. Aegerter, Y. Charbouillot, N. Mohallem, and L. H. de Godoy
- 54 A Novel Process for Fabrication of Bi-Ca-Sr-Cu-O High- T_c Superconductors—A Glass-to-Ceramic Process** **629**
H. Zheng and J. D. Mackenzie
- 55 Sol-Gel Growth of Vanadium Dioxide Phase Transition Materials** **641**
K. R. Speck, H. S.-W. Hu, R. A. Murphy, and R. S. Potember
